GELEZA SMART, THE FUTURE IS THINE

## Executive Brief

Stakeholder summary — problem, solution, roles, Support Desk.

Full module walkthrough: [Geleza\\_SA\\_Full\\_Project\\_Documentation.pdf](#)

# 1. Why Geleza SA

---

South African secondary schools often run academics and administration across paper registers, spreadsheets, WhatsApp groups, and disconnected fee tools. Geleza SA unifies learner, parent, teacher, and principal experiences in one CAPS-aligned web platform.

- Verified marks only — no placeholder scores for families.
- Role-based portals with a searchable More hub for every module.
- Contact Admin + Support Desk to correct mistaken emails, phones, and IDs.
- AI study / lesson tools positioned as support under school integrity rules.

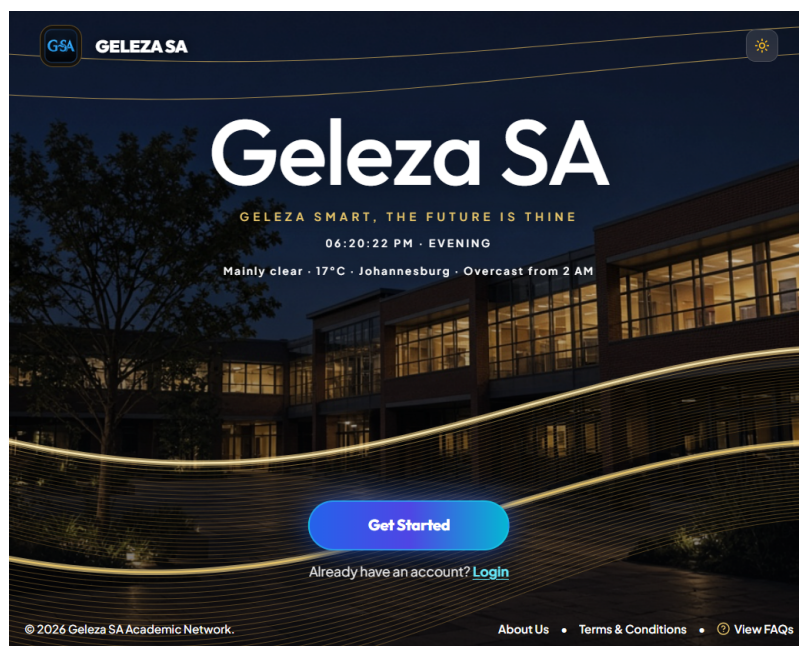

Figure 1. Public landing — brand-first campus experience.

## 2. Solution pillars

---

- One campus-styled public journey (landing, login, register, recovery, help).
- Learner cockpit for subjects, reports, homework, AI tutor, timetable, bursaries.
- Parent family hub for children, attendance, fees, consultations.
- Teacher classroom tools for SBA, attendance, assignments, early-warning.
- Principal command center for users, report studio, fees, Support Desk.

# Learner

The learner portal is a personal academic cockpit. Geleza SA shows verified school data only — never invented marks — and groups every academic, study, and campus-life tool under Home and the More hub.

Modules covered in the full documentation: 14.

- My Enrolled Subjects Workspace — Learners need one place per CAPS subject instead of scattered files and chat groups.
- Academic Performance & Marks — Trust collapses when portals show placeholder scores.
- CAPS Term Report Cards — Families historically wait for paper reports or informal photos of mark sheets.
- Homework & Digital Assignments — Homework deadlines get lost across WhatsApp and paper diaries.
- CAPS AI Study Tutor — After-hours revision support is uneven across households.
- Weekly Class Timetable — Period changes and room moves confuse learners without a live grid.

...and 8 more modules detailed in GSA-DOC-PROJECT-001.

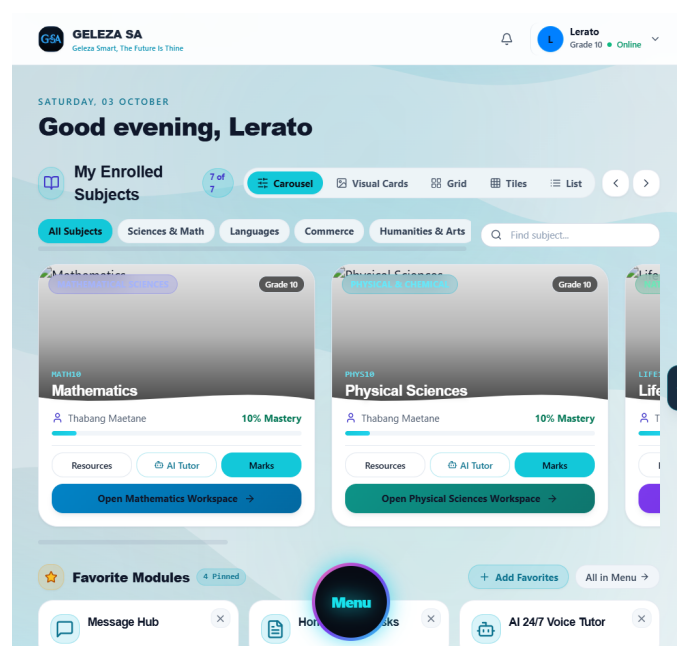

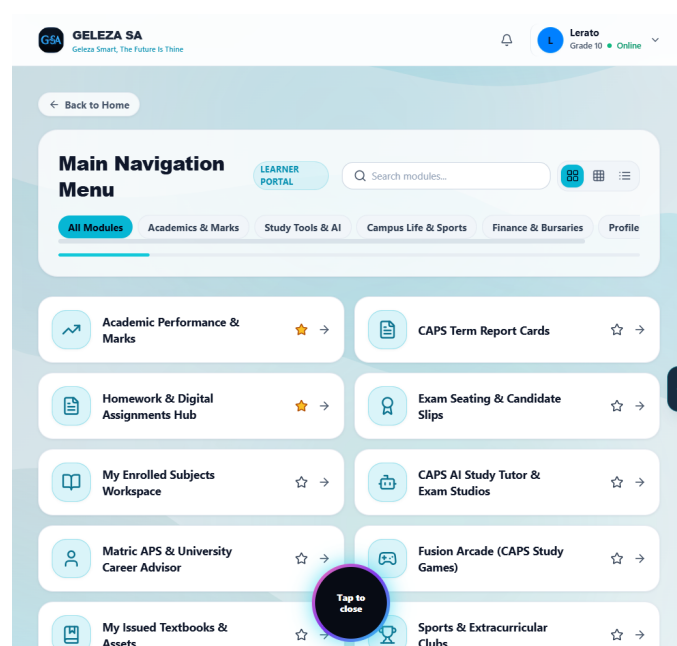

Figure 4. Learner Home — enrolled subjects carousel, Resources / AI Tutor / Marks shortcuts, and pinned Favorite Modules.

*Figure 5. Learner Main Navigation Menu — academics, study/AI, campus life, finance, and profile modules.*

## Parent / Guardian

Parents enter Geleza SA after a Parent Portal Application is approved (or after registration and child linkage). The Family Learning Hub centres linked children so guardians oversee marks, attendance, fees, and consultations without visiting the office for every update.

Modules covered in the full documentation: 10.

- My Children & Marks — Guardians need one verified view of each linked learner.
- CAPS Report Cards — Parents previously relied on paper collection days or informal shares.
- Attendance Records — Absence patterns are hard to spot from occasional SMS notes.
- Student Timetable — Parents support homework and transport when they know the period grid.
- School Fees & Statements — Fee queries drive many office visits.
- Parent-Teacher Consultations — Booking meetings by WhatsApp is unreliable at scale.

...and 4 more modules detailed in GSA-DOC-PROJECT-001.

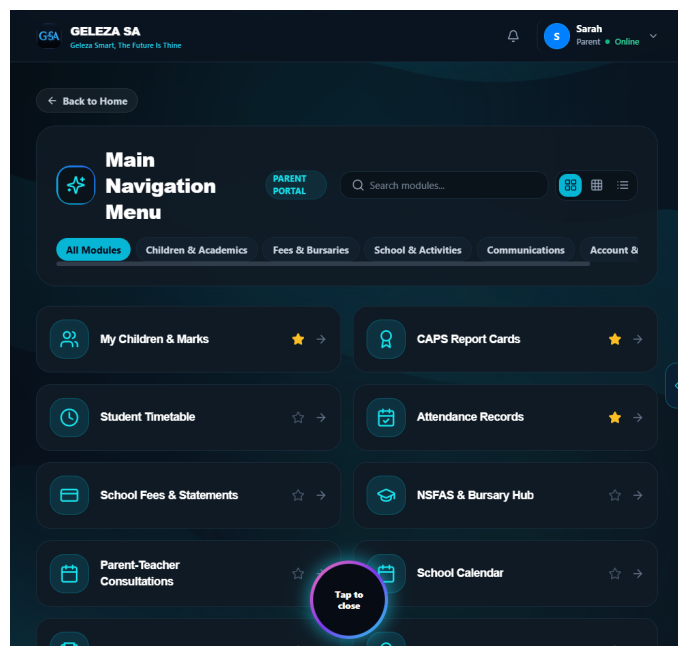

Figure 7. Parent Main Navigation Menu — children & academics, fees, school life, communications, and account.

# Teacher / Educator

Teachers work from a classroom-first Educator Workspace. Geleza SA scopes marksheets, attendance, assignments, conduct, and AI lesson tools to the classes and subjects assigned by the school.

Modules covered in the full documentation: 10.

- SBA Marksheets & Grading — CAPS SBA capture is the spine of secondary assessment.
- Class Attendance Register — Paper registers delay parent visibility and leadership oversight.
- Homework & Assignment Hub — Issuing and marking homework across channels wastes teaching time.
- AI Lesson & Test Paper Studio — Lesson prep and draft papers consume evenings.
- AI Early-Warning Radar — At-risk learners are often noticed too late.
- Educator Timetable — Teaching load and venues must be clear each day.

...and 4 more modules detailed in GSA-DOC-PROJECT-001.

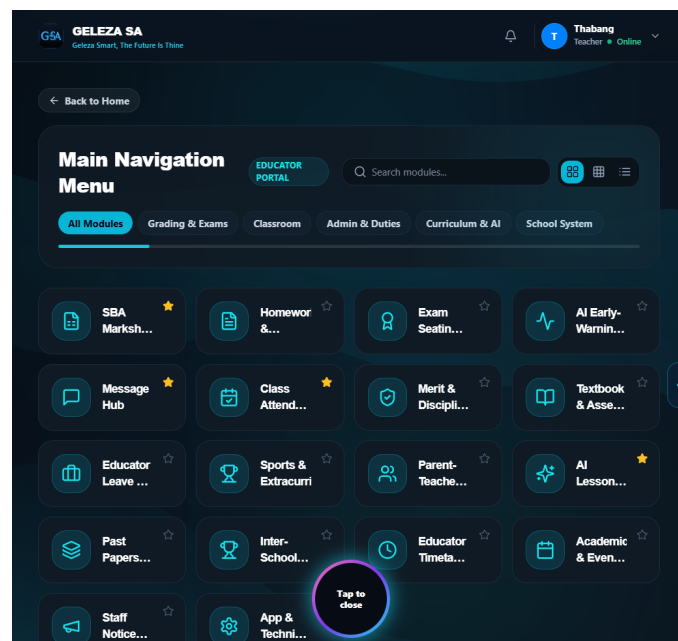

Figure 9. Educator Main Navigation Menu — grading, classroom ops, curriculum/AI, and school system modules.

# Principal / School Admin

Principals and school admins operate the Administrative Control Center. After Geleza SA approves the school, leadership governs users, admissions, parent applications, academics, fees, communications, and the User Support Desk from one role-based portal.

Modules covered in the full documentation: 12.

- User Directory & Roles — Schools cannot run without governed employee, learner, and parent accounts.
- User Support Desk — Wrong email/phone/ID on applications previously stranded users.
- CAPS Mark Audits — Leadership must moderate SBA quality before families see results.
- CAPS Report Card Studio — Official reports must be composed and published deliberately.
- Dynamic Classes & Homerooms — Class structures change every year and mid-year.
- Timetable Allocations — A school runs on a published period grid.

...and 6 more modules detailed in GSA-DOC-PROJECT-001.
