16. Conclusion

Every chapter below discusses how Geleza SA works for real school stakeholders. Role chapters dedicate a page to each module so the document remains useful as a product tour, training pack, and institutional reference — not a sparse screenshot album.

1. Introduction

Geleza SA (Geleza South Africa) is a digital school management and learning platform built for South African secondary schools that deliver the Curriculum and Assessment Policy Statement (CAPS) under the Department of Basic Education. The product name and brand presented to users is Geleza SA, with the motto “Geleza Smart, The Future Is Thine.”

The platform unifies administration, teaching, learning, and parental oversight in one secure web application. Registered schools can manage admissions, attendance, assessments, CAPS report cards, communications, fees (where enabled), sports and extracurriculars, inter-school competitions, and AI-assisted study tools for Grades 8–12.

This document describes why Geleza SA exists, what problems it solves, the mission and objectives of the project, and a complete walkthrough of the experience for every primary role: Learner, Parent, Teacher, and Principal / School Administrator. Screenshots from the live application illustrate each major public surface and the support pathways available to all users.

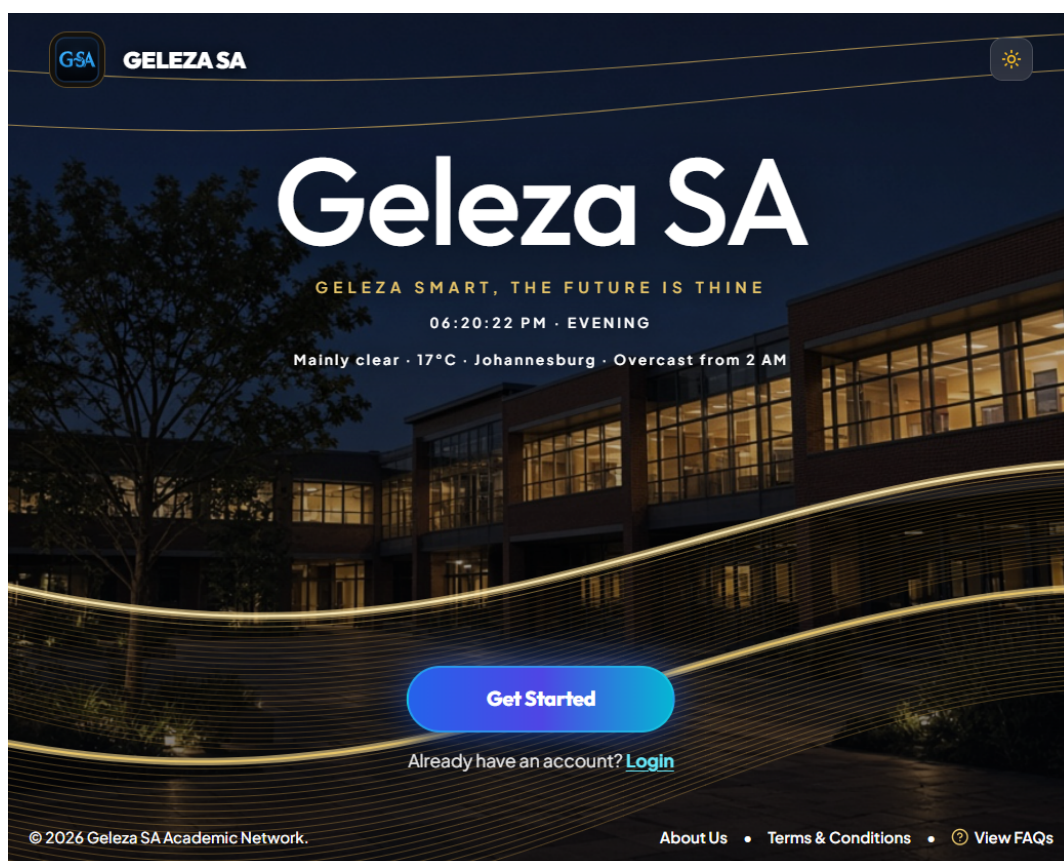

Figure 1. Geleza SA landing page — brand-first hero with campus atmosphere, live time/weather context, and Get Started entry.

2. Problem statement

South African high schools often run academic and administrative processes across disconnected tools: paper registers, spreadsheets, WhatsApp groups, separate fee systems, and ad-hoc email. This fragmentation creates friction for every stakeholder.

2.1 Pain points by stakeholder

- Learners struggle to find timetable, homework, verified marks, seating plans, and study support in one place; fake “placeholder” marks erode trust.
- Parents cannot reliably link to enrolled children, view CAPS report cards, track attendance, book consultations, or resolve application mistakes (wrong email/phone/ID) without long office queues.
- Teachers spend disproportionate time on marksheets, attendance, leave relief, textbook tracking, and parent messaging without a unified classroom cockpit.
- Principals / school admins lack a single command surface for users, admissions, parent portal applications, fees, timetable publishing, report-card studio, and multi-school oversight.
- When users enter wrong details on applications, there is often no structured way to request corrections — blocking login and creating abandoned journeys.

2.2 Systemic risks

- Data inconsistency between admissions, learner numbers, and parent accounts.
- Weak audit trail for who changed what on critical records.
- Session confusion when the same account is used on multiple devices.
- Poor mobile-friendly access for guardians who only engage via phone.
- Limited CAPS-aligned reporting and SBA moderation visibility for leadership.

3. The solution — Geleza SA

Geleza SA provides a role-based portal for each stakeholder, backed by a Node.js API, PostgreSQL data store, email OTP recovery, optional WebAuthn fingerprint sign-in, and Firebase Hosting for the client. Schools register on the platform; Geleza SA executives can approve schools and appoint school administrators. Once a school is live, principals and admins enrol staff and learners, review parent applications, publish timetables and report cards, and operate a Support Desk for user corrections.

3.1 Solution pillars

- One brand, one campus-styled experience across landing, login, registration, and recovery.
- Strict role-based access: learner, parent, teacher, admin (principal / school admin), with Geleza SA superadmin for multi-school control.
 - CAPS-aligned academics: SBA marksheets, moderation, report card studio, matric analytics.
 - Family linkage: parent portal applications, child verification, sibling linking.
 - Human support: Contact Admin tickets plus admin correction of mistaken application fields.
 - Always-available help: searchable FAQs, Geleza SA AI assistant, and side-edge chatbot FAB on authenticated pages.

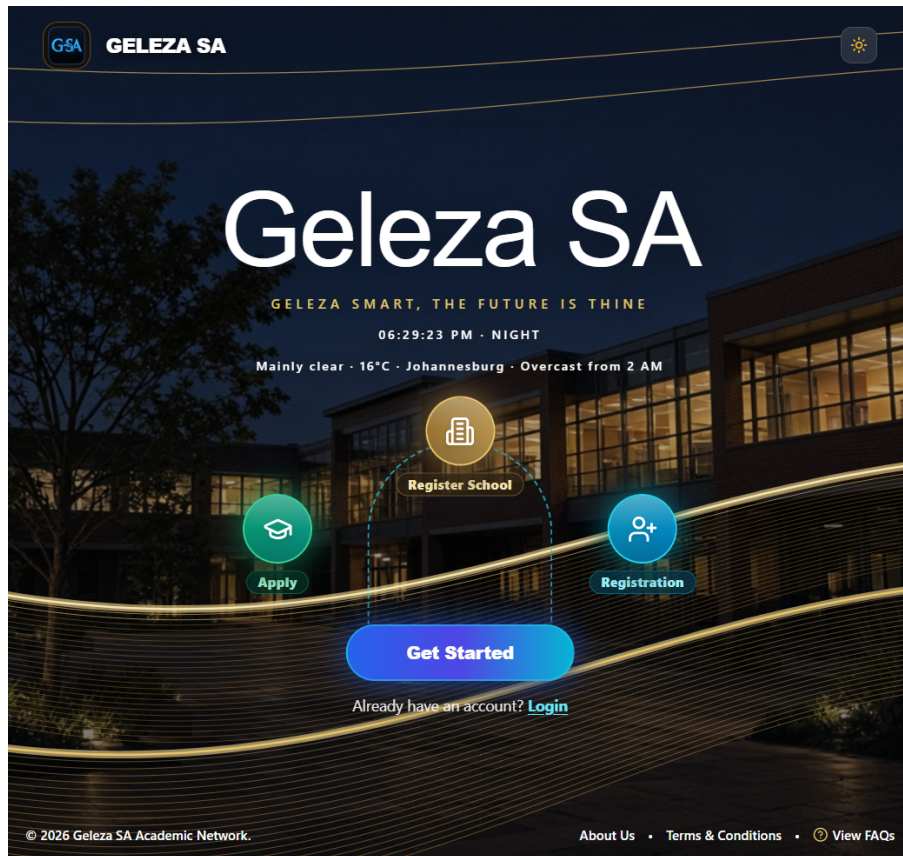

Figure 2. Get Started orbit — Apply, Register School, and Registration paths from the public home page.

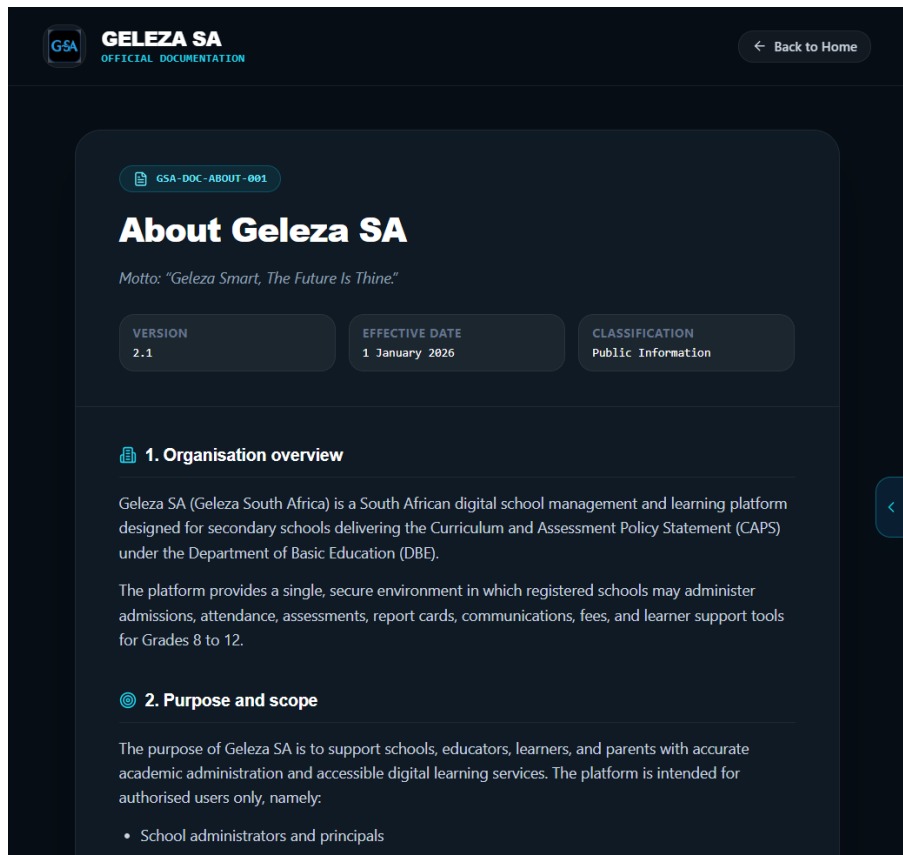

Figure 3. Official About Geleza SA documentation (GSA-DOC-ABOUT-001) describing organisation, purpose, CAPS alignment, and capabilities.

4. Objectives

- Digitise core school operations for Grades 8–12 in a CAPS-aligned manner.
- Give each role a clear home dashboard and a discoverable module directory (More hub).
- Ensure academic data shown to learners and parents is verified — no dummy marks.
- Enable principals to govern users, admissions, parent applications, fees, and communications.
- Enable teachers to teach, assess, mark attendance, manage conduct, and communicate efficiently.
- Enable parents to oversee linked learners' academics, attendance, fees, and consultations.
- Enable learners to study, track progress, access AI tutoring, and manage campus life tools.
- Provide a support pathway so application and personal-data mistakes can be corrected without restarting from zero.
 - Uphold POPIA-aware handling of personal information and secure session management.
 - Ship a mobile-responsive web experience hosted for production use (Firebase) with API services for data and mail.

5. Mission statement

“Geleza Smart, The Future Is Thine.”

Geleza SA exists to empower South African schools, educators, learners, and families with accurate, accessible, and dignified digital tools for secondary education. We believe every learner deserves clarity about their academic journey; every teacher deserves tools that respect their time; every parent deserves transparent oversight; and every principal deserves operational command without chaos.

Our mission is to make school administration and learning support feel like one coherent campus — beautiful enough to invite daily use, rigorous enough for CAPS compliance, and human enough that when mistakes happen, help is one Contact Admin request away.

6. Public user journey (with screenshots)

Before any role-specific dashboard, every visitor meets the same public surfaces. These screens establish brand trust and route people into the correct onboarding path.

6.1 Landing & Get Started

The landing page is a full-bleed campus hero. Brand is the primary signal. Visitors see live local time/period and Johannesburg weather context, then open Get Started to choose Apply (admissions), Register School (principals), or Registration (parent/teacher style portals). Returning users choose Login.

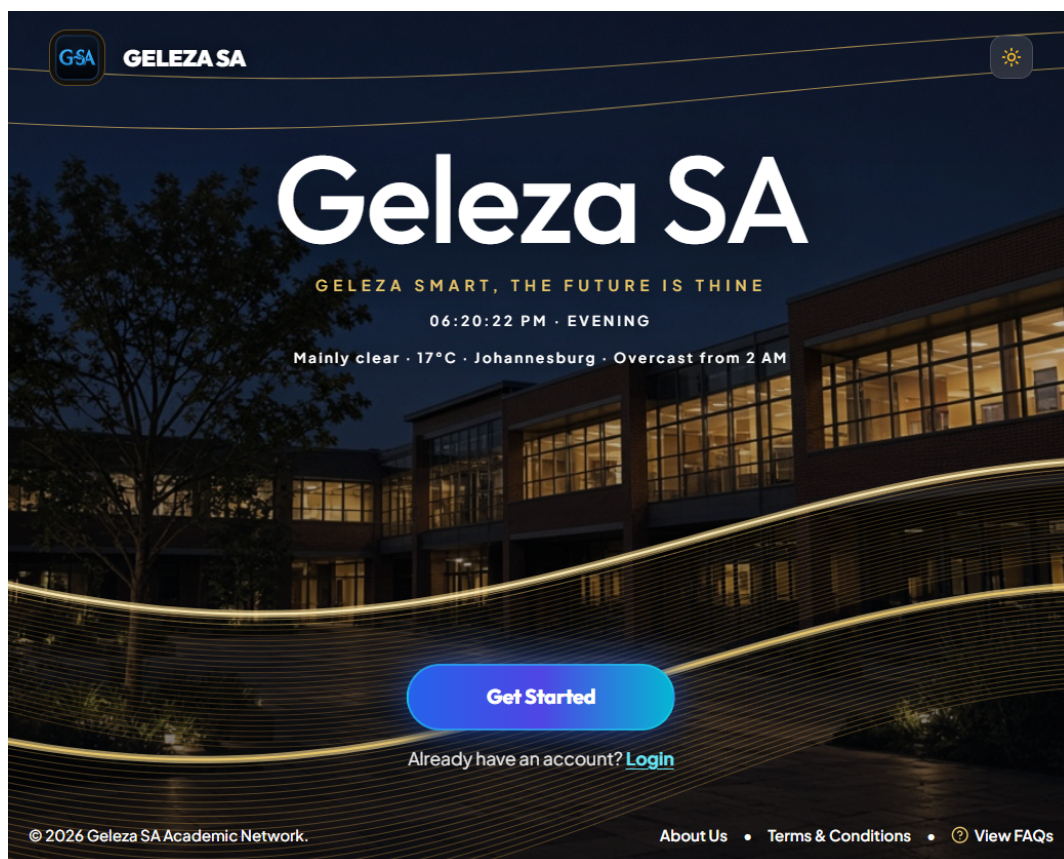

Figure 4. Landing — first viewport composition for Geleza SA.

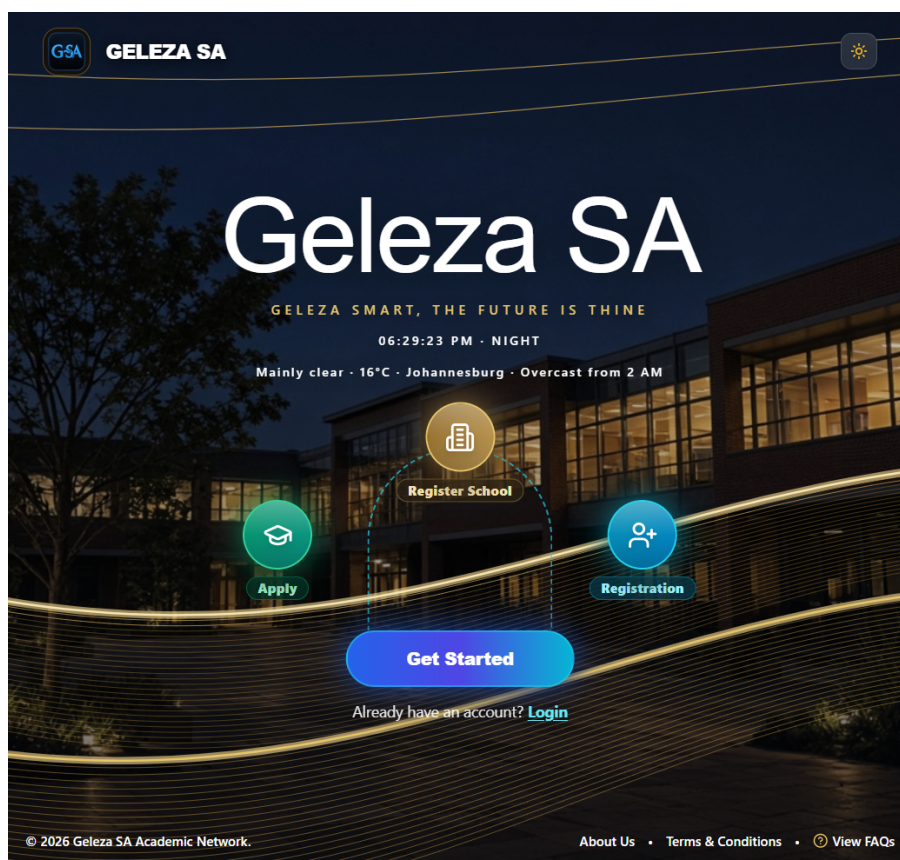

Figure 5. Get Started orbit expanded with Apply, Register School, and Registration.

6.2 Sign in

Login accepts email or learner ID plus password. Features include Remember Me, Forgot Password, and optional fingerprint (WebAuthn) sign-in. Signing in on a new device replaces the previous active session so only one live session remains.

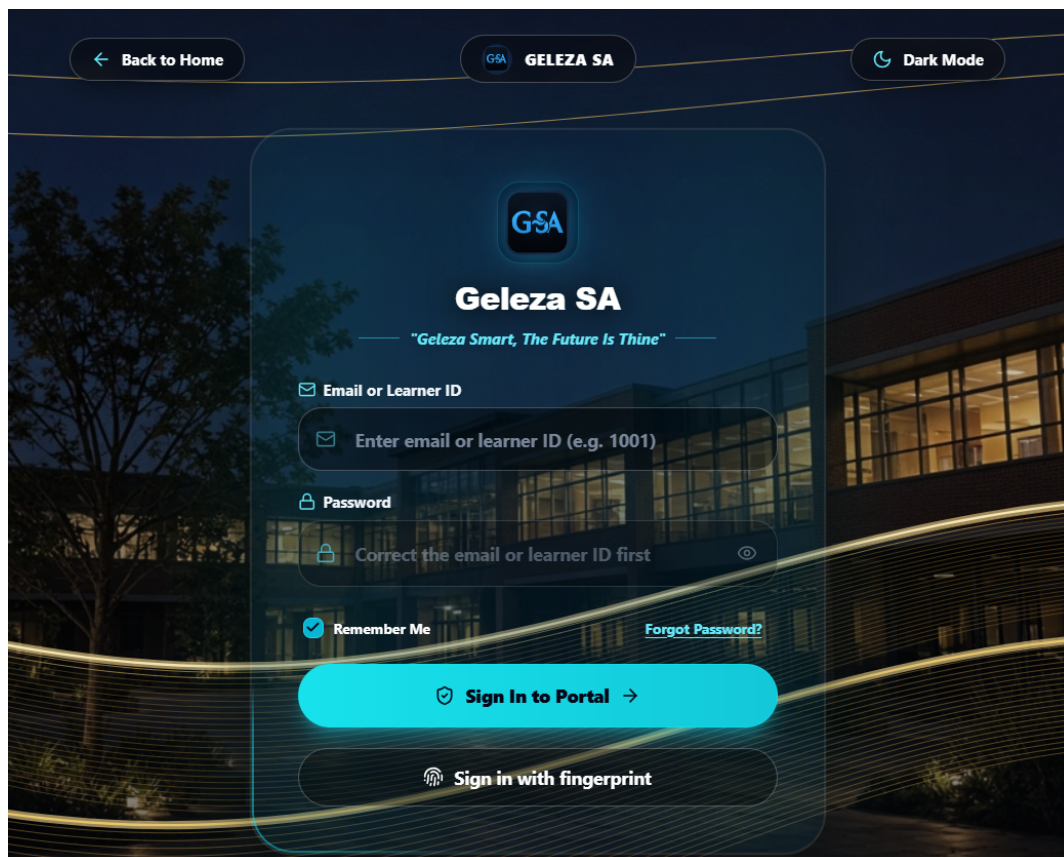

Figure 6. Campus-styled Sign In portal with password and fingerprint options.

6.3 Registration (Parent portal example)

Registration is role-aware. The Parent Registration portal captures SA ID, names (letters only), email, phone (digits), and school selection. Step 2 links enrolled learners. Principals are directed to Register & Onboard Your School. Validation rules prevent garbage data at source.

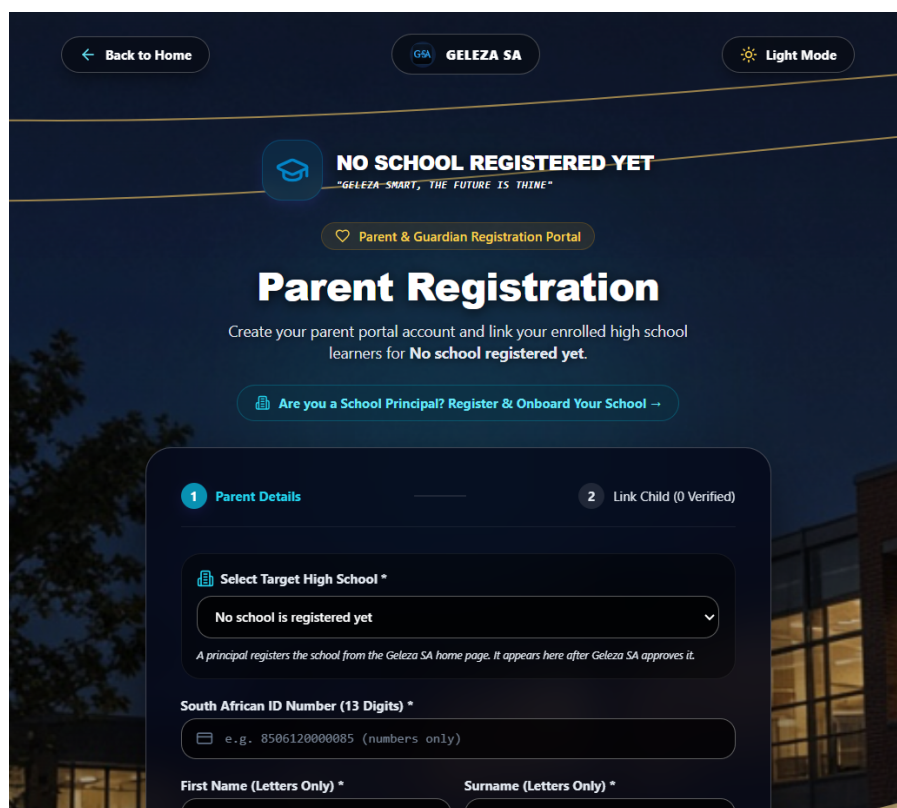

Figure 7. Parent Registration — Step 1 Parent Details with school selection and field rules.

6.4 Account recovery

Forgot Password uses a three-step OTP flow: Choose identifier (email, learner number, or ID) !' Verify 5-minute recovery code !' Set new password. This replaces fragile channel-hopping recovery patterns.

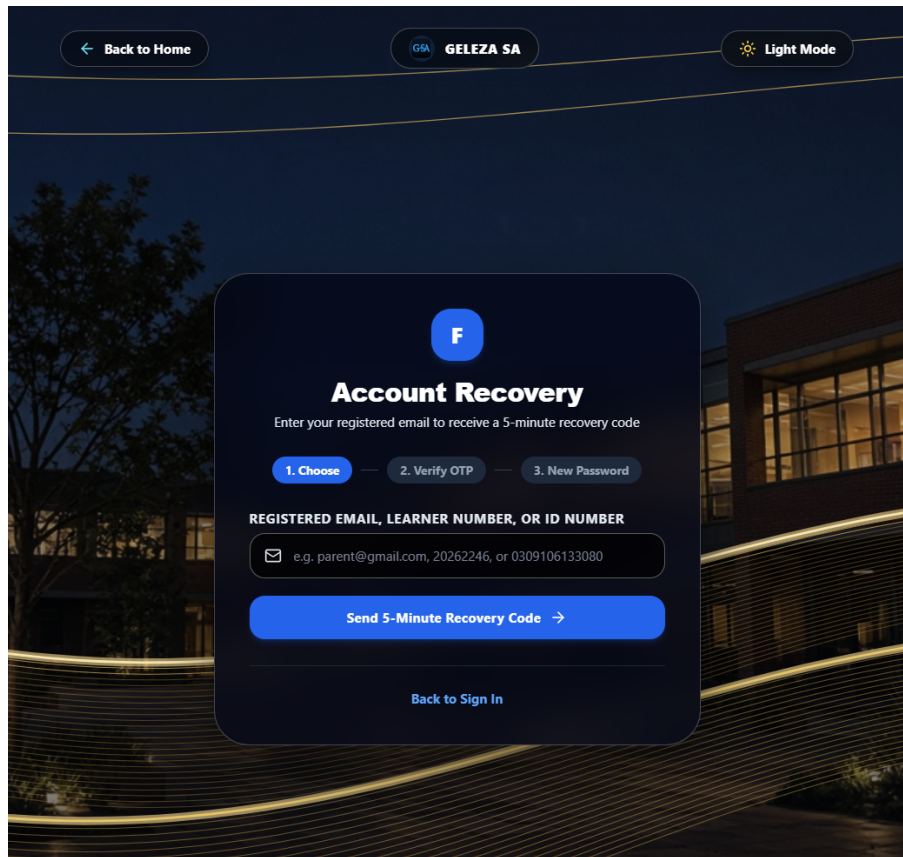

Figure 8. Account Recovery — step 1 of email/OTP password reset.

6.5 Policies & FAQs

About Us and Terms are published as professional Geleza SA documents. Help & Support provides searchable FAQs (GSA-DOC-FAQ-001), 24/7 AI help, and Contact Admin for human escalation.

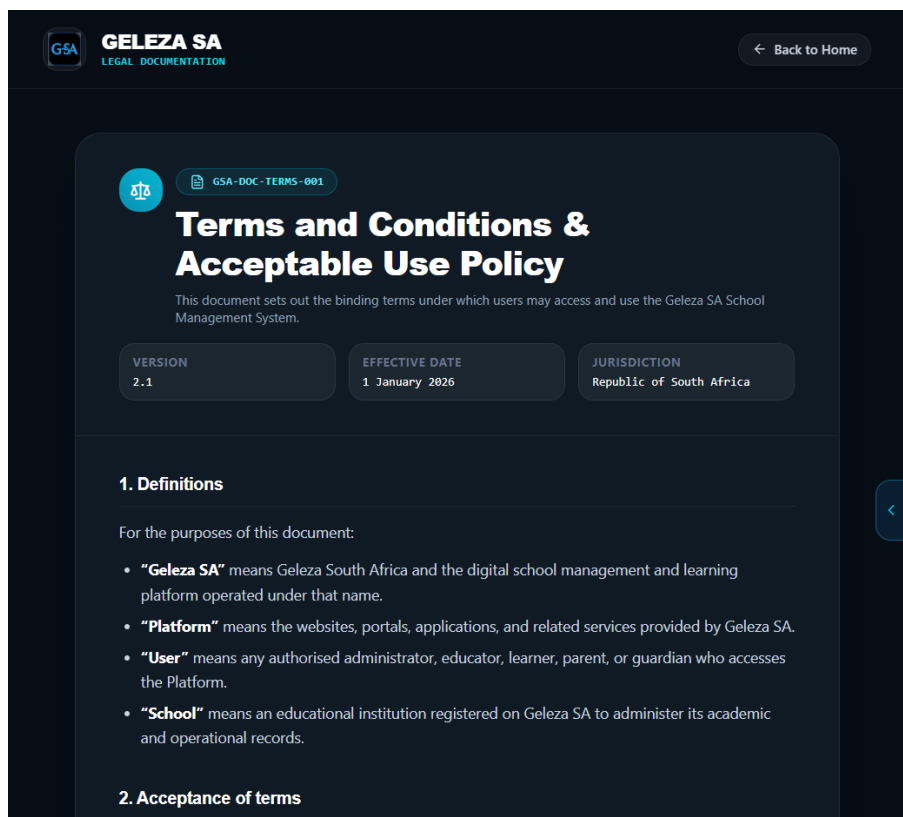

Figure 9. Terms and Conditions & Acceptable Use Policy (GSA-DOC-TERMS-001).

The screenshot shows the 'Geleza SA Support Documentation' interface. At the top, there's a header with a headset icon, the title 'Geleza SA Support Documentation', and a sub-header 'Official FAQs and AI assistance for registered Geleza SA users'. Below this is a navigation bar with three items: 'View FAQs' (highlighted with a question mark icon), '24/7 AI Help & Support' (with a chat icon), and 'Contact Admin' (with a person icon). A search bar is present with the placeholder text 'Search documentation (e.g. report card, link learner, session, fees)...'. The main content area is titled 'SECTION A — PLATFORM OVERVIEW' and contains several expandable FAQ items: 'What is Geleza SA?', 'Who may use Geleza SA?', 'How do I change between dark and light appearance?', 'Where can I read the official policies?', and 'I entered the wrong email, phone, or details on my application. What should I do?'. Below this is 'SECTION B — LEARNERS' with one expandable item: 'How do I open a subject workspace?'.

Figure 10. Support Documentation — FAQ categories for platform, learners, parents, and access.

The screenshot shows the 'Contact Admin' form within the 'Geleza SA Support Documentation' interface. The header and navigation bar are identical to Figure 10. The main content area is titled 'Request help from school admin or Geleza SA' and includes a sub-header: 'Use this form if you entered the wrong email, phone, ID, or learner details on an application, or if you need help with login or your account. Your school principal / admin can correct eligible records: Geleza SA can also assist.' The form consists of several input fields: 'FULL NAME', 'CONTACT EMAIL (FOR REPLY)', 'PHONE' (with a placeholder '0812345678'), and 'APPLICATION REF (OPTIONAL)' (with a placeholder 'e.g. PAR-2026-48192'). There is a dropdown menu for 'WHAT WENT WRONG?' with the selected option 'Wrong email address on application / account'. Below this is a 'SUBJECT' field with the placeholder 'Short summary of the problem'. At the bottom is a 'DETAILS' field with the placeholder 'Explain the mistake (e.g. I typed the wrong email on my parent application). Include the correct details we should use.'

Figure 11. Contact Admin form — structured tickets for wrong email, phone, ID, and related issues.

7. Cross-cutting platform experience

7.1 Navigation pattern

- Primary tabs: Home / Overview, Calendar, Discover (where applicable), Messages, Profile, More.
- More hub: searchable module directory with favourites and categories.
- Inside a module: page header with Back; bottom Menu dock is hidden so modules feel focused.
- Theme: light / dark (and navy-aware components) saved per device.

7.2 Geleza SA AI

- Floating side-edge arrow FAB on authenticated pages (hidden on landing, login, register, forgot-password).
- Phone-style AI chat panel with cyan (#13C8D9) and navy (#0B1F33) brand system.
- Learner AI Tutor / exam studios; teacher AI lesson & test paper studio; early-warning radar for educators.

7.3 Idle & session safety

- After idle time, Stay / Log out prompt appears (configured around five minutes of inactivity).
- New sign-in takes over the previous device session (session_replaced) instead of a hard concurrent-login block.

7.4 Help everywhere

- FAQs cover platform overview, learners, parents, access, and corrections.
- Contact Admin creates a support ticket emailed to school admins and acknowledged to the requester.
- School Support Desk lets principal/admin correct parent application fields and resolve tickets.

8. Learner walkthrough

Role: Learner · Route: /dashboard/learner

The learner portal is a personal academic cockpit. Geleza SA shows verified school data only — never invented marks — and groups every academic, study, and campus-life tool under Home and the More hub.

Live screenshots in this chapter were captured with tester Lerato Walters (learner.walters@gelezasa.co.za) — Grade 10 Science, Makgoka High (GSA-MKG-001). Password used for the documentation suite: password123.

8.1 Journey map

1

Sign in

Use learner number/email + password, or fingerprint if enrolled.

2

Home overview

See timetable highlights, notices, and shortcuts into subjects and performance.

3

Subjects workspace

Open each enrolled subject for resources, past papers, and study tools.

4

Performance & reports

View verified marks and CAPS term report cards when published.

5

Study with AI

Use CAPS AI Tutor / Exam Studios; treat AI as revision support, not a substitute for honest assessment.

6

Campus life

Sports clubs, inter-school events, exam seating slips, textbooks, bursaries, fee statements.

7

Profile & settings

Digital student ID, theme, security, and Help / Contact Admin if something is wrong.

8.2 Home & More hub

Every learner session begins on Home and discovers the full module set through the More hub. The following screens establish that orientation before the module-by-module pages.

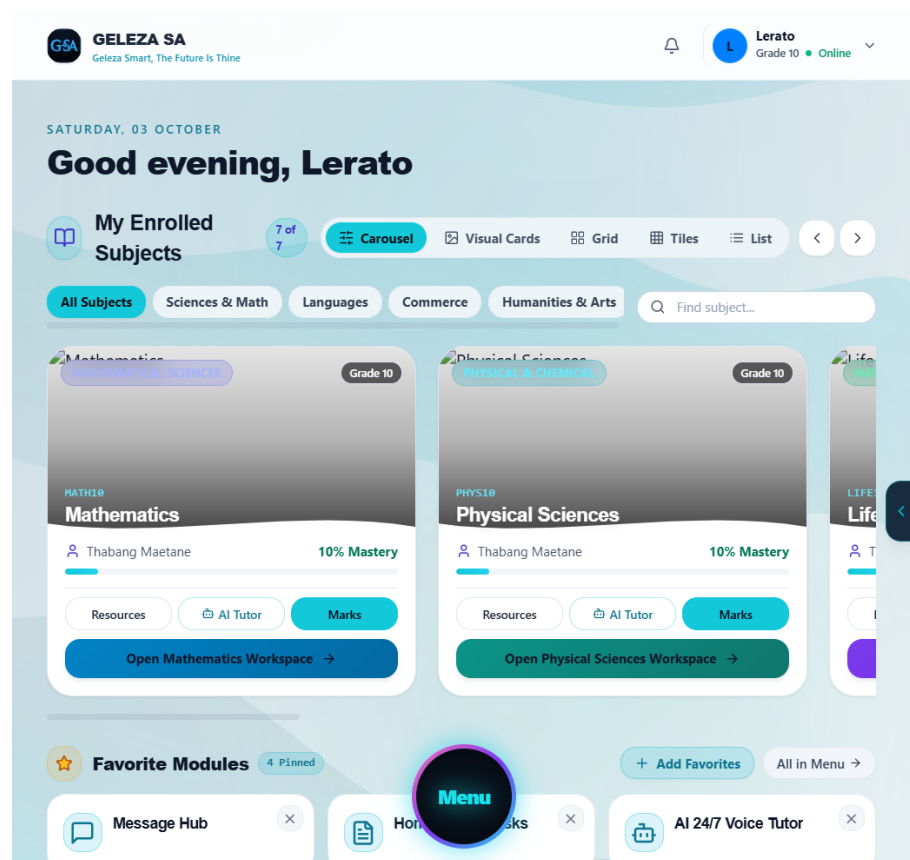

Figure 12. Learner Home — enrolled subjects carousel, Resources / AI Tutor / Marks shortcuts, and pinned Favorite Modules.

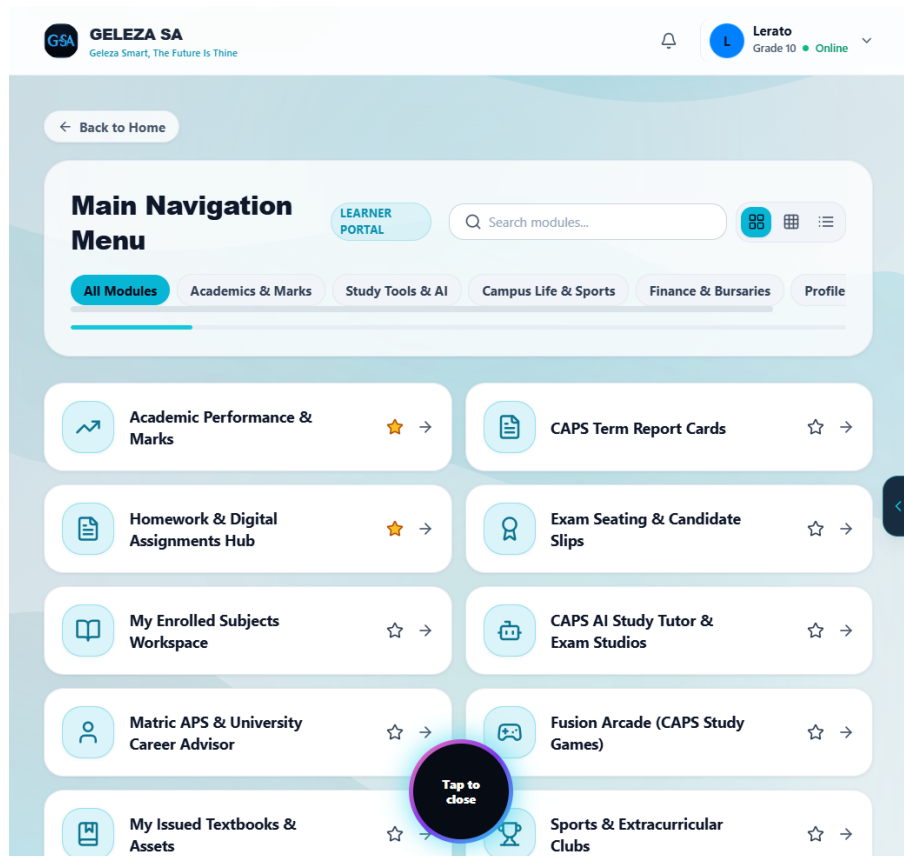

Figure 13. Learner Main Navigation Menu — academics, study/AI, campus life, finance, and profile modules.

8.3 Role principles

- No dummy marks — Geleza SA only shows verified school data.
- Back navigation inside modules; Menu dock hidden while working.
- AI is supportive study help; academic integrity remains school policy.
- Help !' Contact Admin when profile or access data is wrong.

8.4 Module-by-module guide

The next 14 pages each cover one learner module in Geleza SA: the school problem it addresses, what the app does, how to open it, and a live screenshot.

My Enrolled Subjects Workspace

Why this matters in South African schools

Learners need one place per CAPS subject instead of scattered files and chat groups.

What Geleza SA provides

In Geleza SA, each enrolled subject opens as a focused workspace. From here learners reach subject resources, past papers, AI tutor shortcuts, and marks for that subject. The module reinforces curriculum identity (subject name, grade, stream) so study time stays CAPS-aligned rather than generic browsing.

How users open this module

Open More !' My Enrolled Subjects, or tap a subject card on Home. Use Resources for materials, AI Tutor for revision, and Marks for verified results when the school has published them.

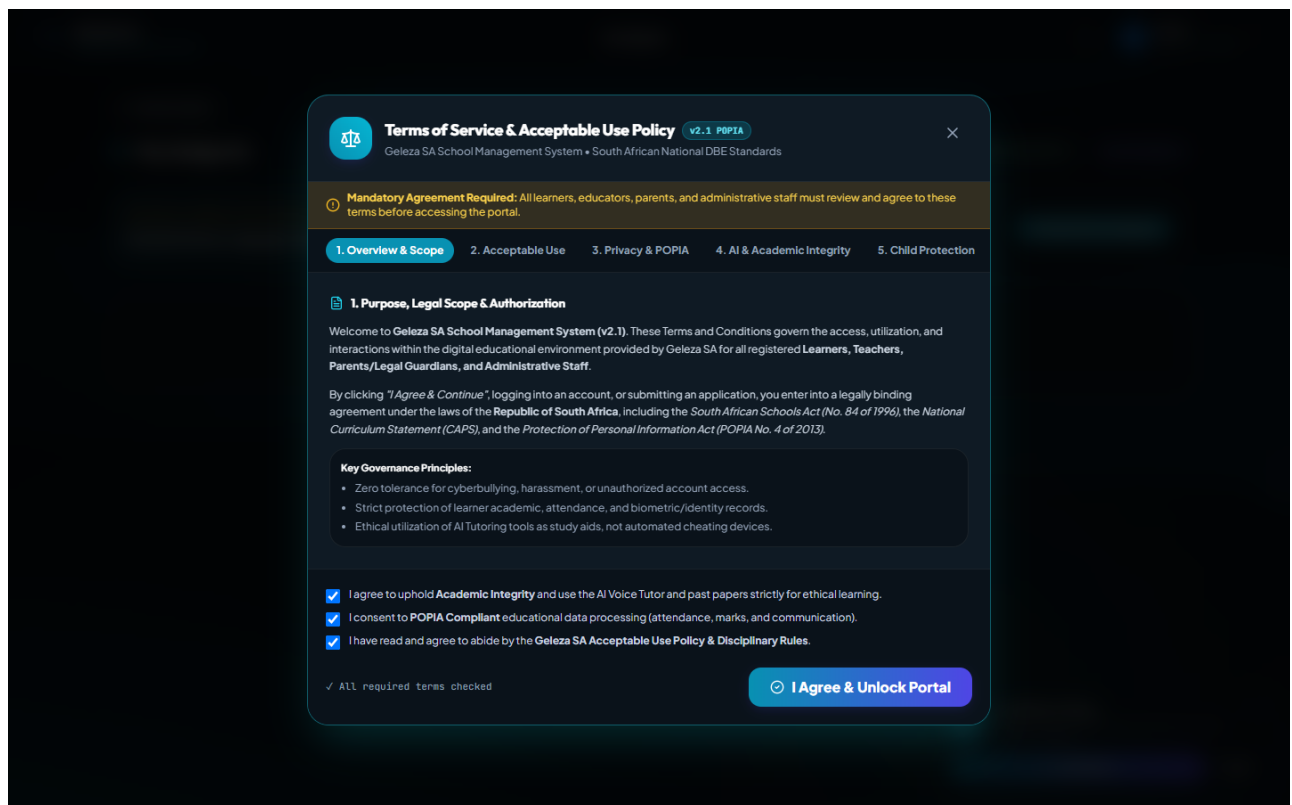

Figure 14. Learner: My Enrolled Subjects Workspace — live Geleza SA screen.

Academic Performance & Marks

Why this matters in South African schools

Trust collapses when portals show placeholder scores.

What Geleza SA provides

The Subject Academic Performance view surfaces SBA and term results only after the school uploads verified assessment data. Until then, Geleza SA shows an honest pending state. This design choice is central to the product: learners and parents see the same truth the school recorded.

How users open this module

Home or More !' Academic Performance. Filter by subject. Contact Admin if a published mark looks wrong after school confirmation.

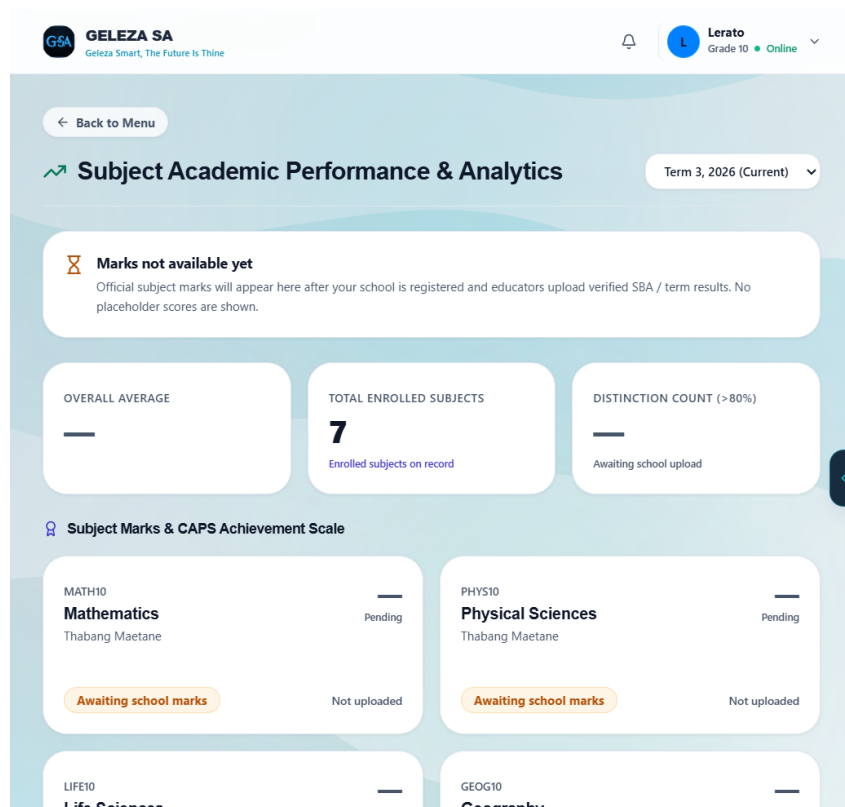

Figure 15. Learner: Academic Performance & Marks — live Geleza SA screen.

CAPS Term Report Cards

Why this matters in South African schools

Families historically wait for paper reports or informal photos of mark sheets.

What Geleza SA provides

When the principal publishes CAPS report cards from the Report Card Studio, learners open the official term report digitally. Layout and levels follow CAPS language so the on-screen document matches what the school would print.

How users open this module

More !' CAPS Term Report Cards. Select the published term. Download or view when the school has released the cycle.

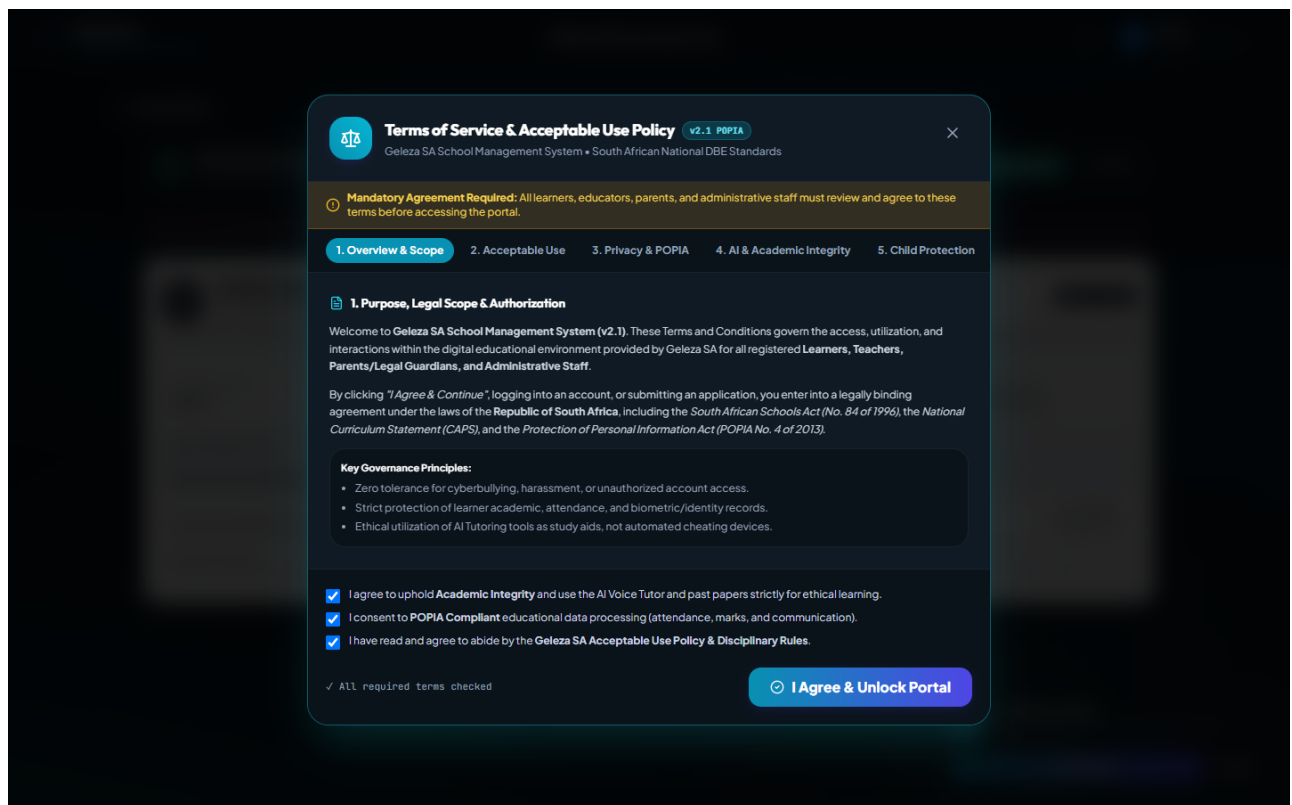

Figure 16. Learner: CAPS Term Report Cards — live Geleza SA screen.

Homework & Digital Assignments

Why this matters in South African schools

Homework deadlines get lost across WhatsApp and paper diaries.

What Geleza SA provides

The Homework & Digital Assignments Hub lists teacher-issued tasks, due dates, and submission status. Learners work inside Geleza SA so teachers and parents share one assignment timeline instead of fragmented reminders.

How users open this module

More !' Homework & Digital Assignments. Open a task, attach or complete work, and watch status update after teacher review.

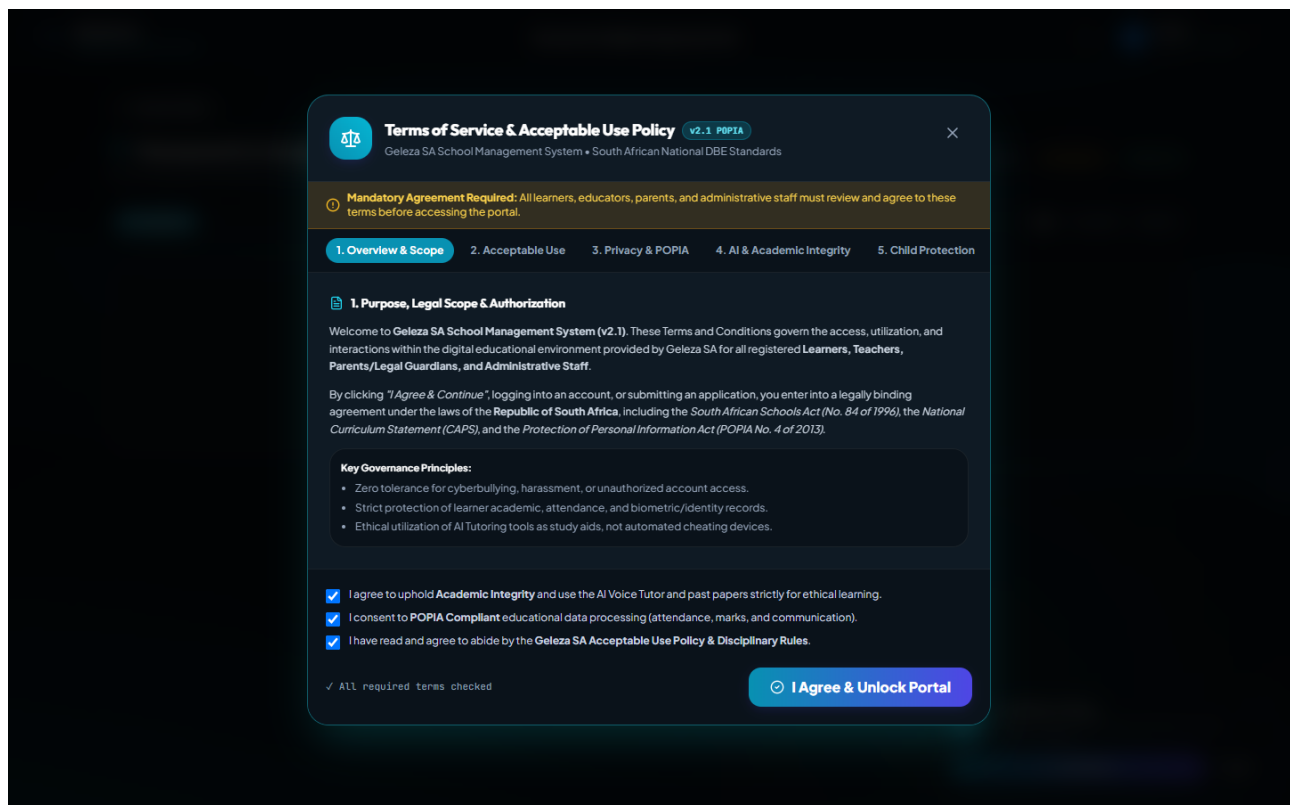

Figure 17. Learner: Homework & Digital Assignments — live Geleza SA screen.

CAPS AI Study Tutor

Why this matters in South African schools

After-hours revision support is uneven across households.

What Geleza SA provides

Geleza SA's CAPS AI Study Tutor and Exam Studios guide Grade 8–12 revision with curriculum-aware prompts. AI is positioned as study support under school academic-integrity rules — not a substitute for honest assessment.

How users open this module

More !' CAPS AI Study Tutor, or use subject shortcuts on Home. Prefer practice explanations; never paste controlled-test answers into AI tools against school policy.

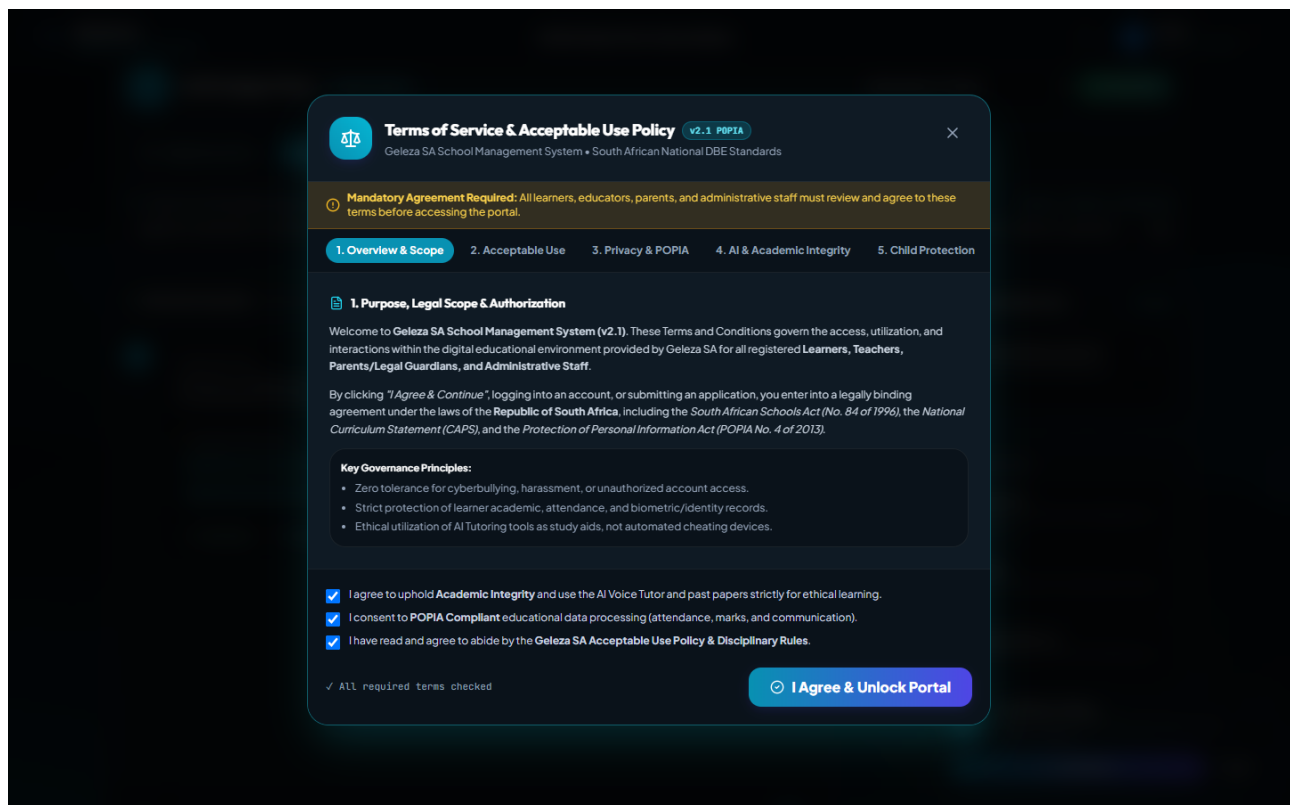

Figure 18. Learner: CAPS AI Study Tutor — live Geleza SA screen.

Weekly Class Timetable

Why this matters in South African schools

Period changes and room moves confuse learners without a live grid.

What Geleza SA provides

The Weekly Class Timetable shows the learner's published period grid once the school allocates and publishes the timetable. It anchors the rest of the day: attendance, subjects, and exam seating all reference the same schedule world.

How users open this module

More ! Weekly Class Timetable (also available from Home highlights when configured).

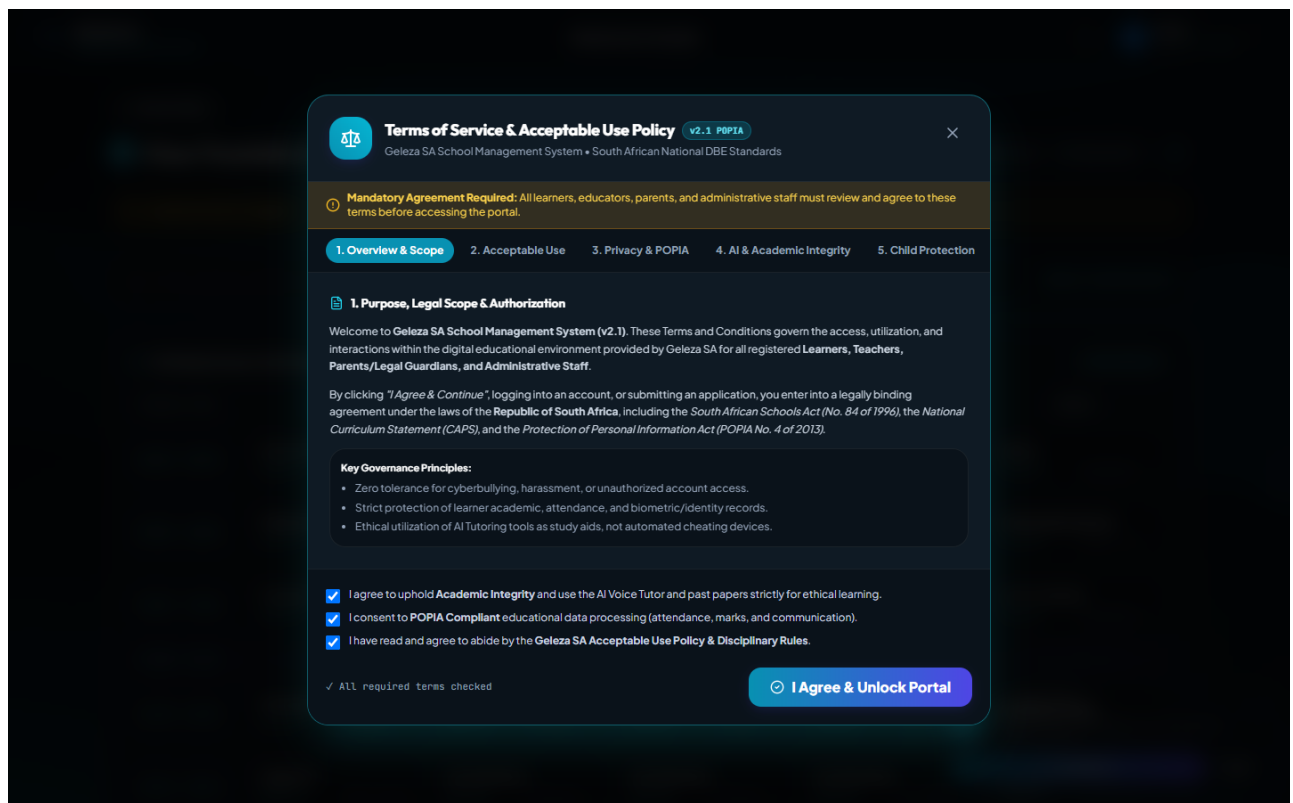

Figure 19. Learner: Weekly Class Timetable — live Geleza SA screen.

School Calendar

Why this matters in South African schools

Term dates, sports fixtures, and exam windows live in too many places.

What Geleza SA provides

The School Calendar consolidates institutional events, term boundaries, and key academic dates. Learners use it to plan study blocks around real school life, not rumour.

How users open this module

Bottom navigation Calendar tab or More !' School Calendar.

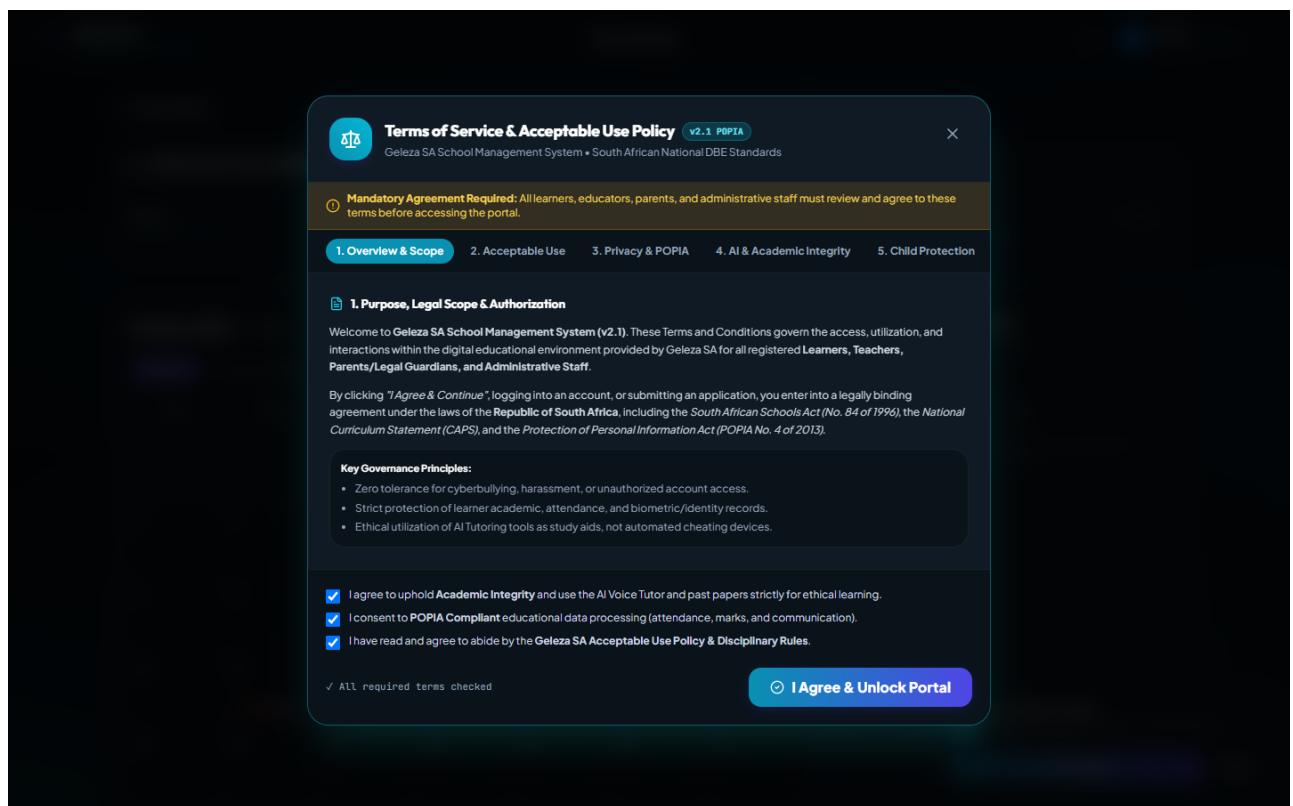

Figure 20. Learner: School Calendar — live Geleza SA screen.

Message Hub

Why this matters in South African schools

Important school messages drown in personal chat apps.

What Geleza SA provides

Message Hub keeps institutional and peer messaging inside Geleza SA. Learners receive school-context conversations without mixing them into private social channels.

How users open this module

Messages tab or More !' Message Hub. Use Help !' Contact Admin for account/data mistakes rather than messaging casually.

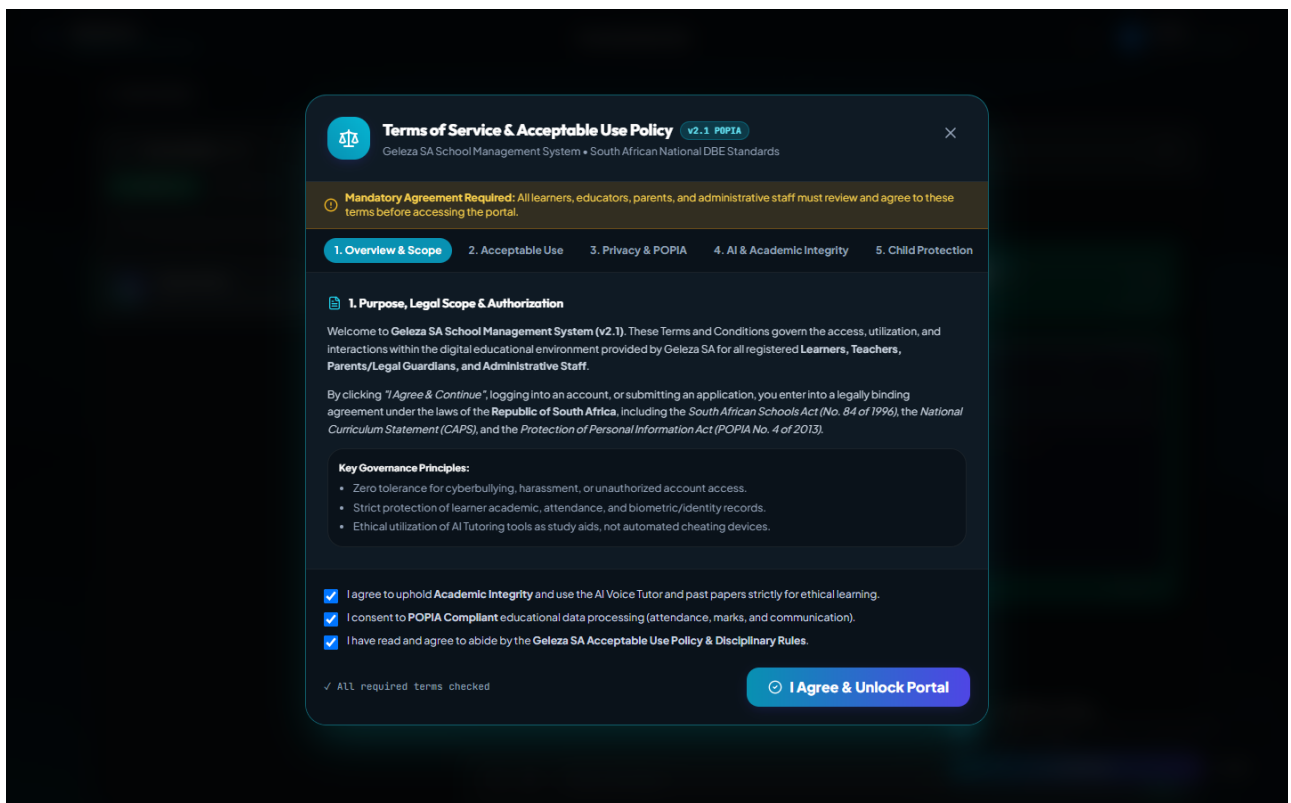

Figure 21. Learner: Message Hub — live Geleza SA screen.

NSFAS & Bursary Finder

Why this matters in South African schools

FET learners need early visibility of tertiary funding options.

What Geleza SA provides

The NSFAS & Tertiary Bursary Finder surfaces funding and bursary information for senior learners. It connects career aspiration (APS guidance elsewhere) with practical next-step discovery.

How users open this module

More !' NSFAS & Tertiary Bursary Finder. Explore listings and follow official application channels outside the app where required.

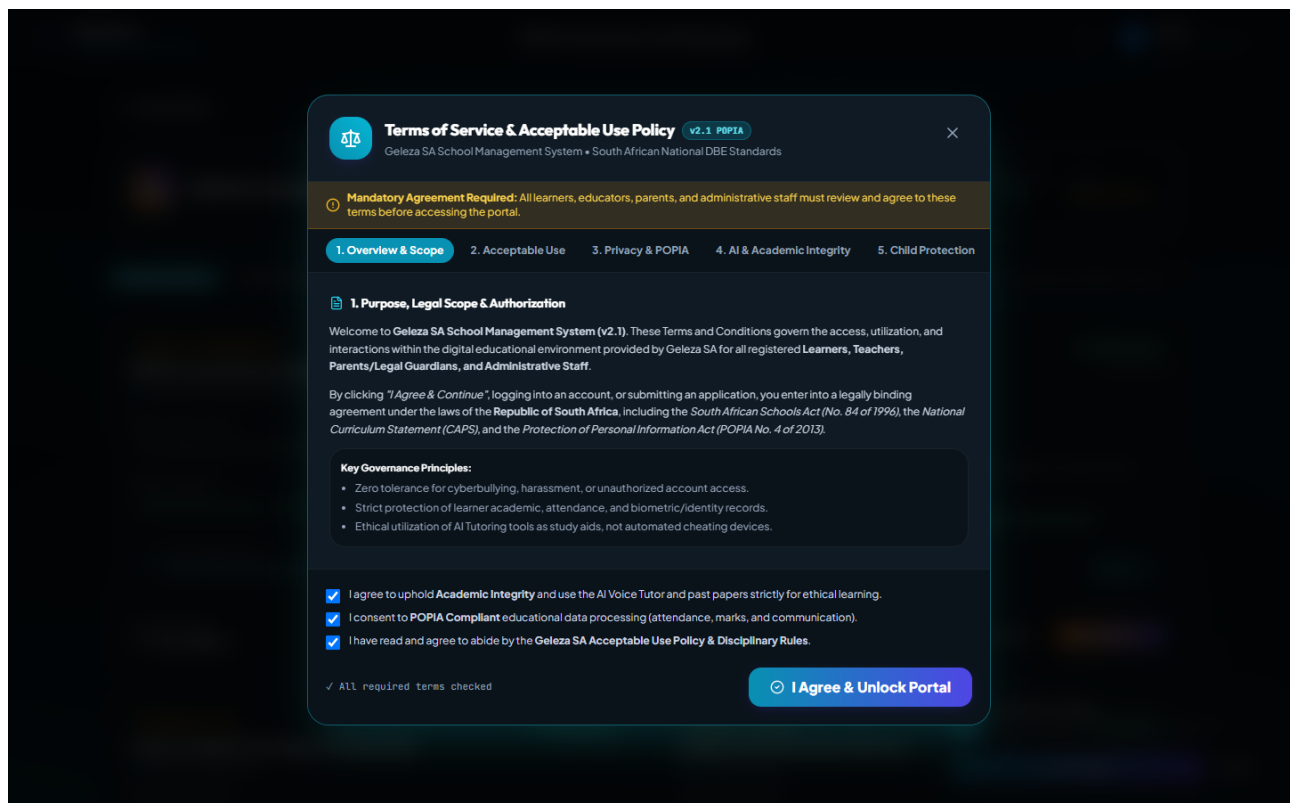

Figure 22. Learner: NSFAS & Bursary Finder — live Geleza SA screen.

School Fee Statements

Why this matters in South African schools

Fee opacity creates tension between school and home.

What Geleza SA provides

Where the school enables fee modules, learners can view statements and receipts that match the finance records parents and admins see. Geleza SA treats fees as school-truth data, not marketing placeholders.

How users open this module

More !' School Fee Statements & Receipts when the module is enabled for the school.

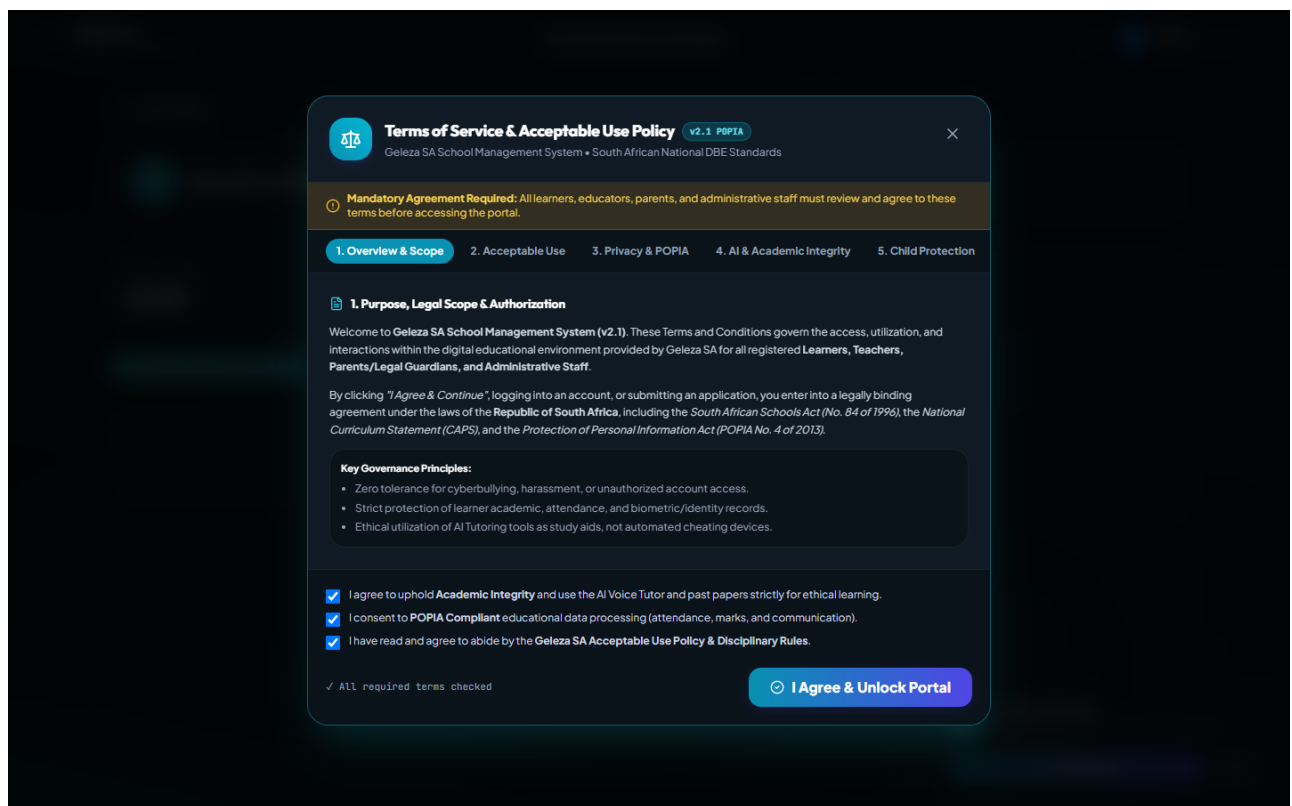

Figure 23. Learner: School Fee Statements — live Geleza SA screen.

Sports & Extracurriculars

Why this matters in South African schools

Campus life is part of school belonging, not an afterthought.

What Geleza SA provides

Sports & Extracurricular Clubs let learners discover and follow school activities. Together with inter-school derbies (where enabled), this module keeps non-academic participation visible in the same app as academics.

How users open this module

More ! Sports & Extracurricular Clubs.

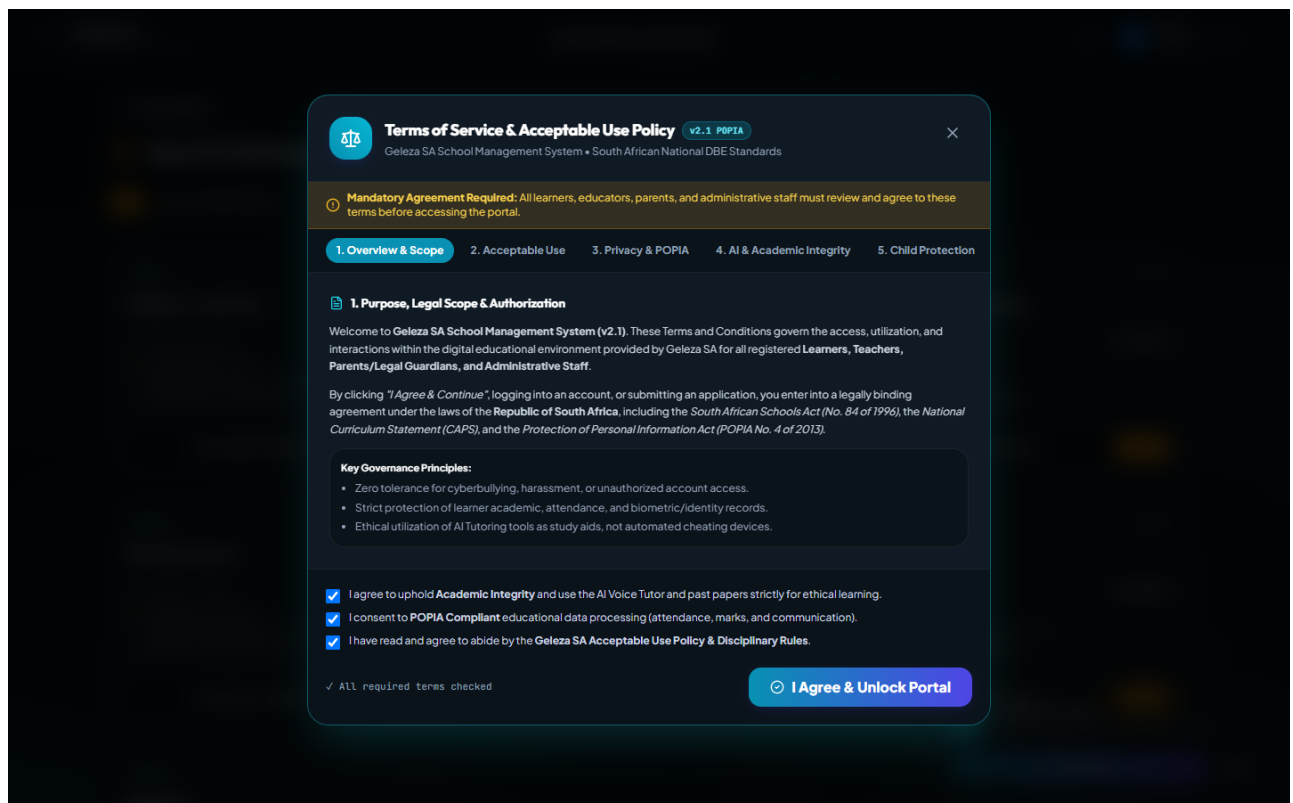

Figure 24. Learner: Sports & Extracurriculars — live Geleza SA screen.

App & Technical Settings

Why this matters in South African schools

Accessibility and security preferences differ per device and learner.

What Geleza SA provides

Settings cover theme, notifications, security, and Help & Support. From here learners reach FAQs, Geleza SA AI help, and Contact Admin when profile or access data is wrong.

How users open this module

More !' App & Technical Settings, or Profile !' Settings.

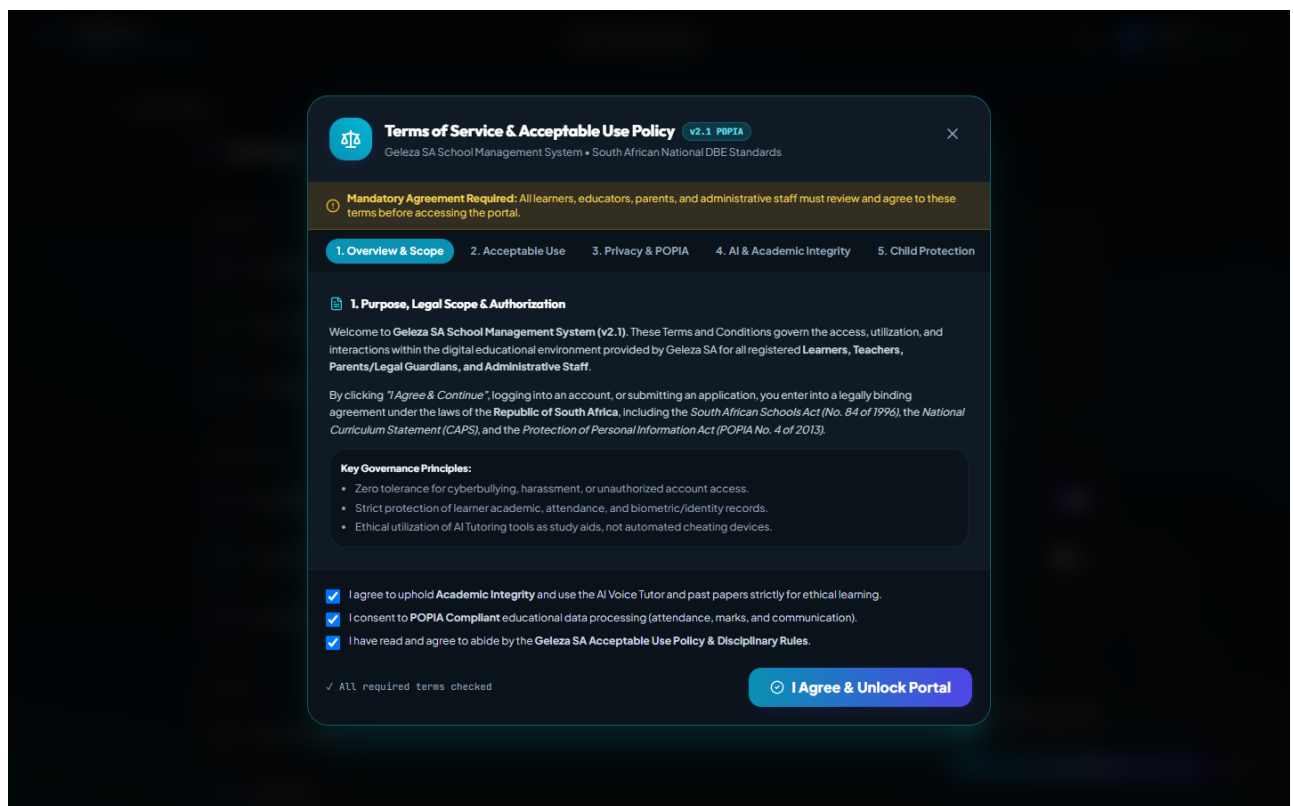

Figure 25. Learner: App & Technical Settings — live Geleza SA screen.

Exam Seating & Candidate Slips

Why this matters in South African schools

Exam-day anxiety rises when seating is announced only on paper boards.

What Geleza SA provides

Exam Seating & Candidate Slips show hall grids and admission tickets once the school publishes seating. Learners confirm venue and seat before exam day inside Geleza SA.

How users open this module

More !' Exam Seating & Candidate Slips after the school releases the seating plan.

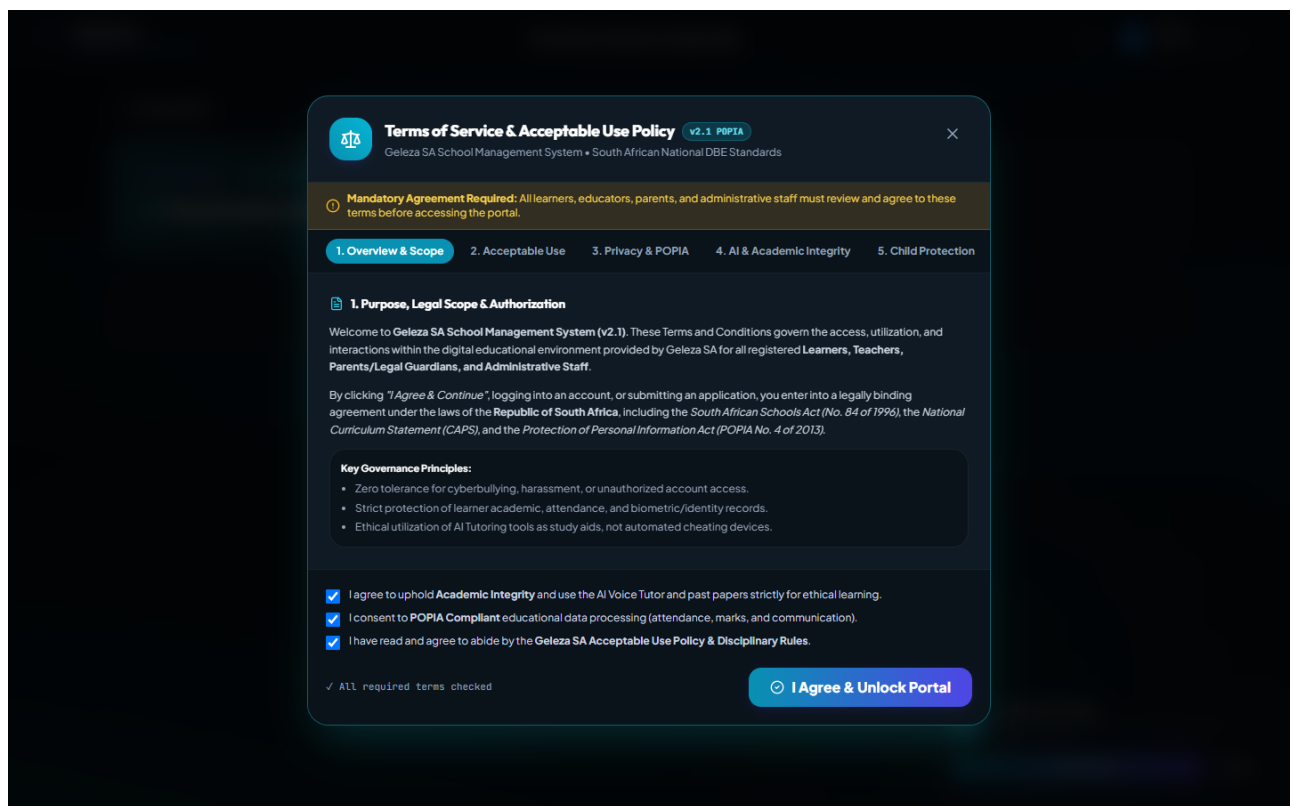

Figure 26. Learner: Exam Seating & Candidate Slips — live Geleza SA screen.

My Profile & Digital Student ID

Why this matters in South African schools

Learners need a clear identity card for school interactions.

What Geleza SA provides

The learner profile presents a digital student ID with learner number, grade, contacts, and SA ID fields the school holds. It is the identity anchor for login, seating, and support tickets.

How users open this module

Profile tab. Use Contact Admin if any identity field is incorrect.

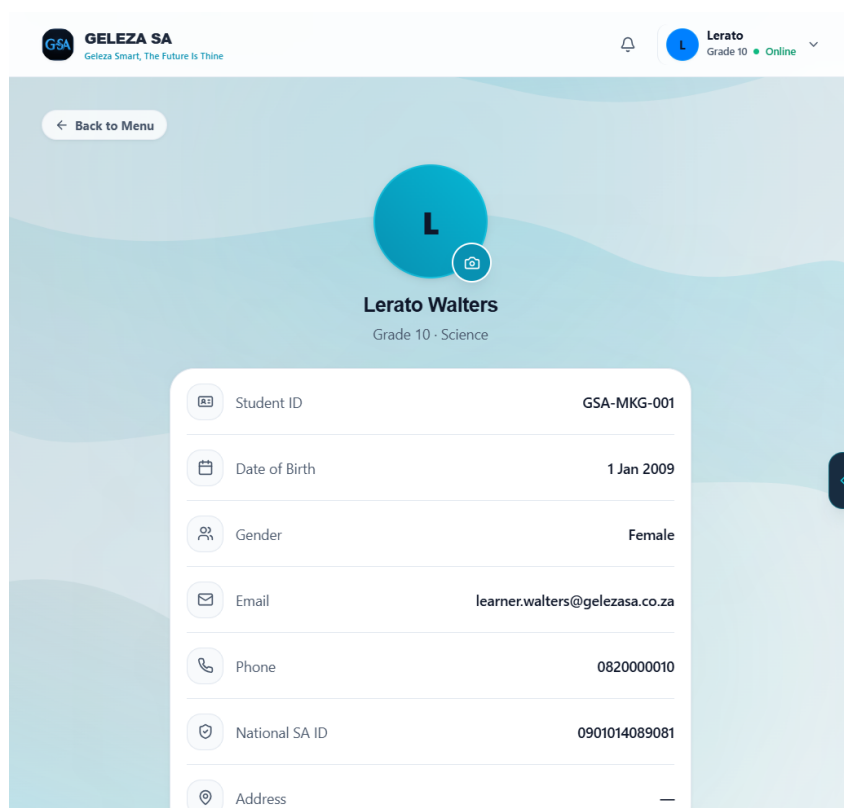

Figure 27. Learner: My Profile & Digital Student ID — live Geleza SA screen.

9. Parent / Guardian walkthrough

Role: Parent / Guardian · Route: /dashboard/parent

Parents enter Geleza SA after a Parent Portal Application is approved (or after registration and child linkage). The Family Learning Hub centres linked children so guardians oversee marks, attendance, fees, and consultations without visiting the office for every update.

Live screenshots in this chapter were captured with tester Sarah Walters (parent.walters@gelezasa.co.za) — linked to Lerato Walters. Password used for the documentation suite: password123.

9.1 Journey map

1

Discover & register / apply

From Get Started !' Registration or Parent Portal Application with school + learner claims.

2

Admin review

Principal/admin verifies enrolment match and accepts or rejects the application.

3

Welcome & sign in

Approved parents receive email credentials and sign into /dashboard/parent.

4

My Children

View linked learners marks, timetable, attendance, and report cards.

5

Fees & bursaries

Open statements/receipts and explore NSFAS/bursary information.

6

Engage the school

Book parent-teacher consultations, read announcements, message teachers.

7

Fix mistakes

Contact Admin with PAR- reference; admin corrects fields in Support Desk / Parent Applications.

9.2 Home & More hub

Every parent / guardian session begins on Home and discovers the full module set through the More hub. The following screens establish that orientation before the module-by-module pages.

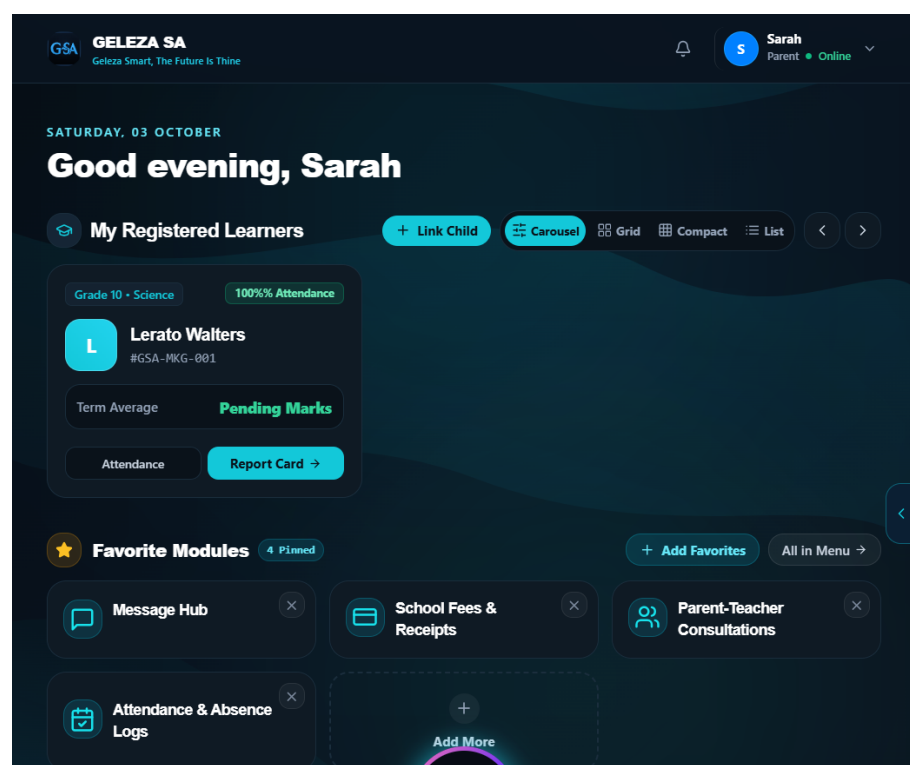

Figure 28. Parent Family Learning Hub — registered learner card with Attendance and Report Card actions.

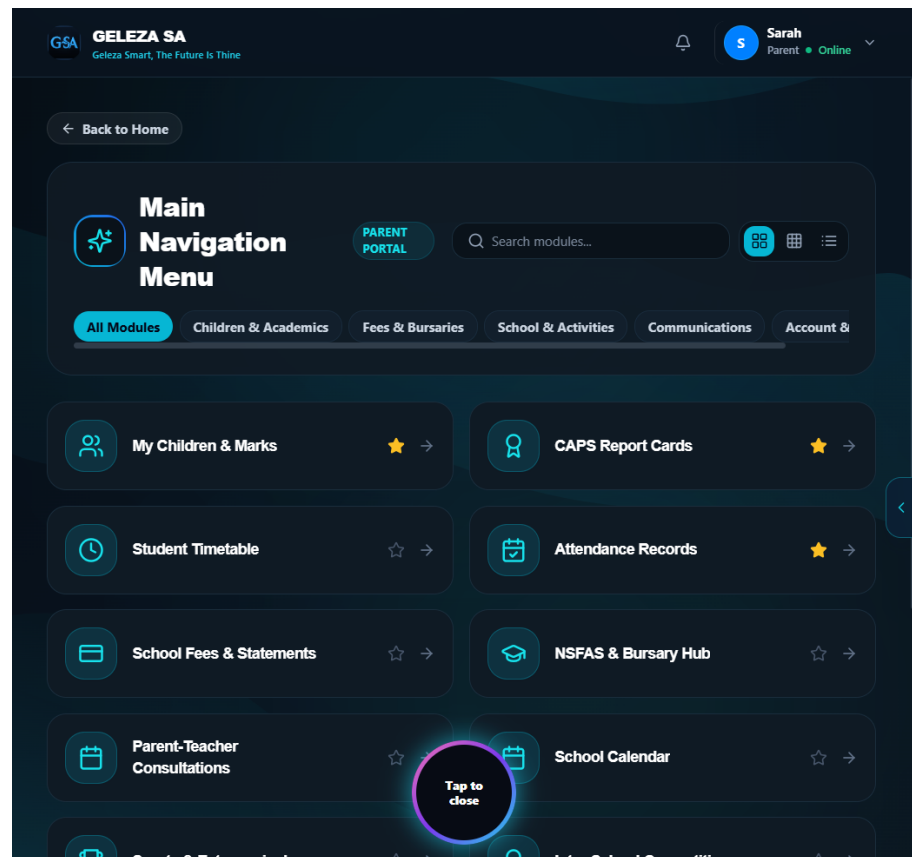

Figure 29. Parent Main Navigation Menu — children & academics, fees, school life, communications, and account.

9.3 Role principles

- Parent visibility follows school publication — same verified-data principle as learners.
- Application mistakes (wrong email/phone/ID) are recoverable via Contact Admin + Support Desk.
- Registration and Parent Portal Application remain the public onboarding paths into this role.

9.4 Module-by-module guide

The next 10 pages each cover one parent / guardian module in Geleza SA: the school problem it addresses, what the app does, how to open it, and a live screenshot.

My Children & Marks

Why this matters in South African schools

Guardians need one verified view of each linked learner.

What Geleza SA provides

My Children & Marks is the parent's primary academic surface. Linked learners appear with access to marks and related actions. Visibility follows school publication rules — the same verified-data principle used on the learner portal.

How users open this module

Home learner cards or More !' My Children & Marks. Switch child if multiple learners are linked.

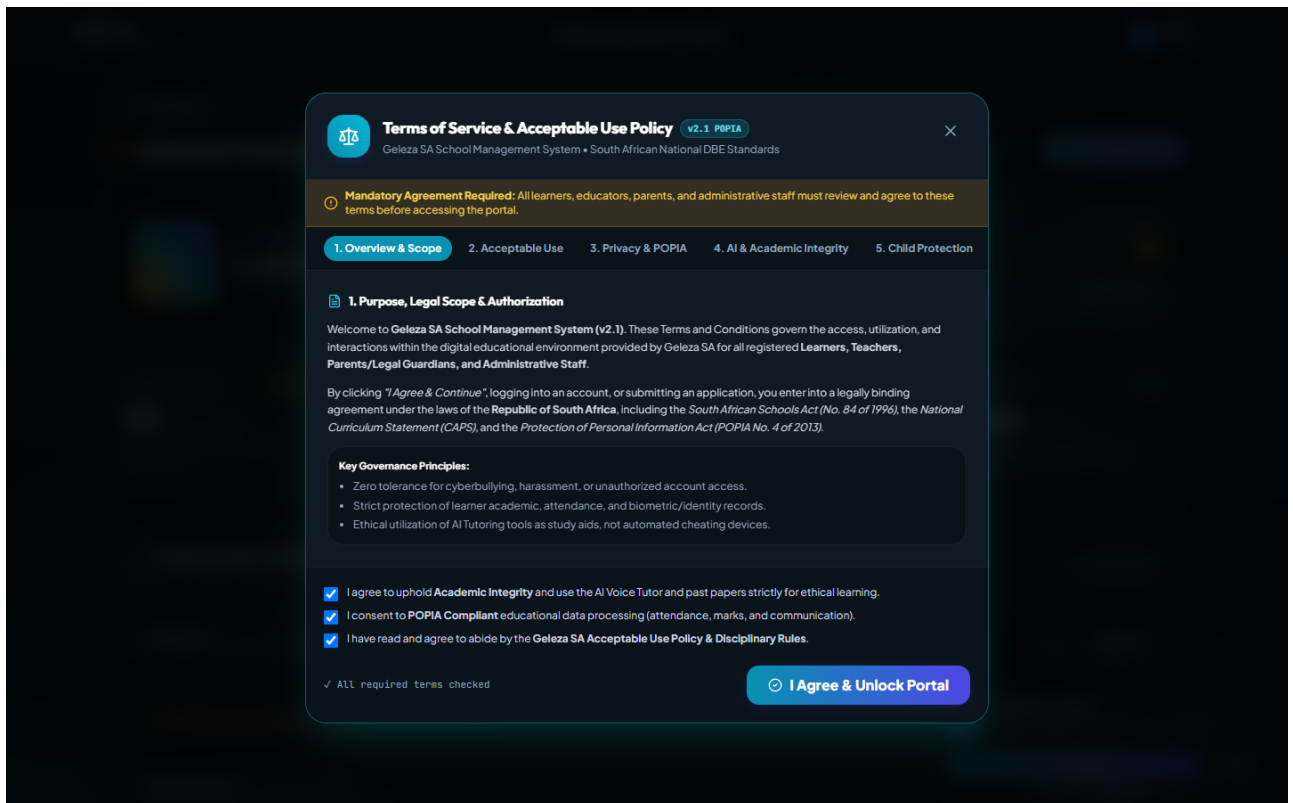

Figure 30. Parent / Guardian: My Children & Marks — live Geleza SA screen.

CAPS Report Cards

Why this matters in South African schools

Parents previously relied on paper collection days or informal shares.

What Geleza SA provides

Published CAPS report cards appear for each linked child. Parents read the same official document the school produced in the Report Card Studio, supporting transparent family conversations about progress.

How users open this module

More !' CAPS Report Cards, or Report Card action on the child card.

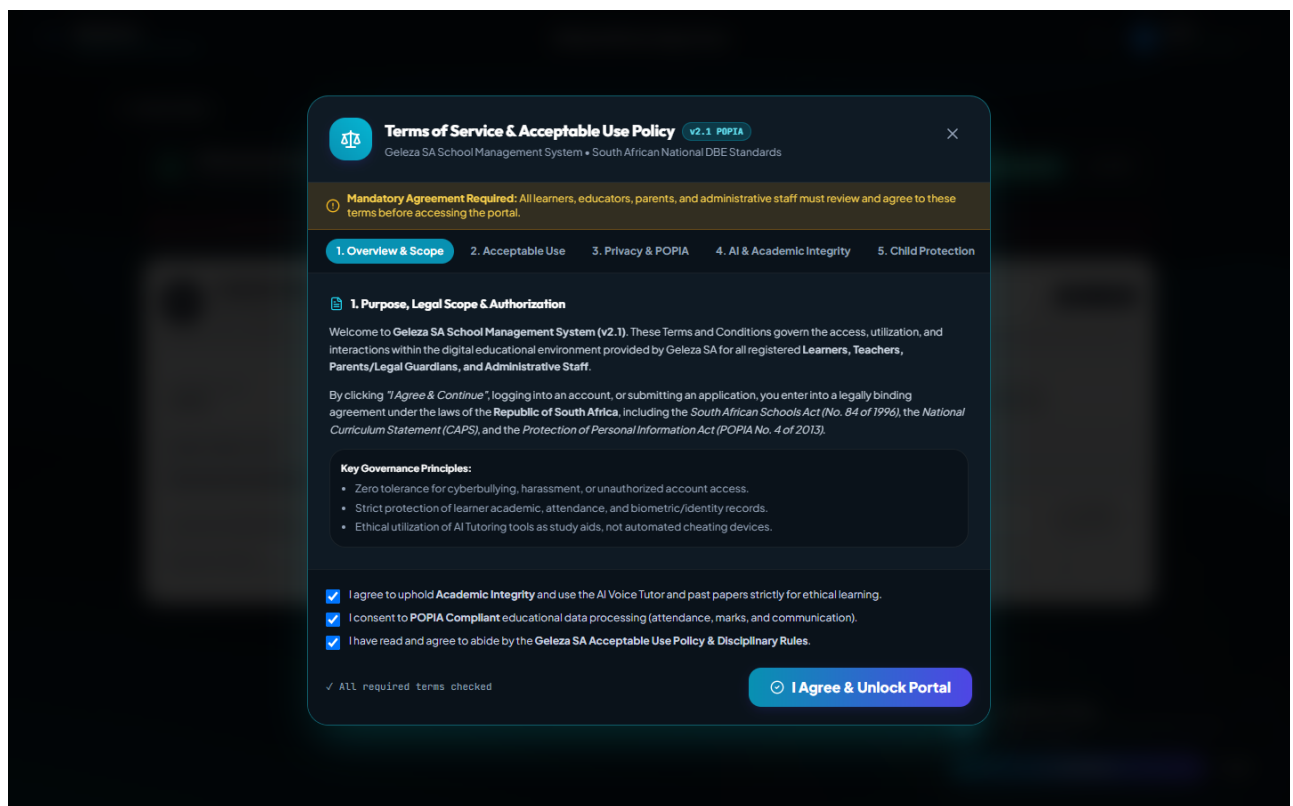

Figure 31. Parent / Guardian: CAPS Report Cards — live Geleza SA screen.

Attendance Records

Why this matters in South African schools

Absence patterns are hard to spot from occasional SMS notes.

What Geleza SA provides

Attendance Records show presence history captured by teachers' registers. Parents can spot trends early and engage the school before academic impact compounds.

How users open this module

More !' Attendance Records or Attendance on the child card.

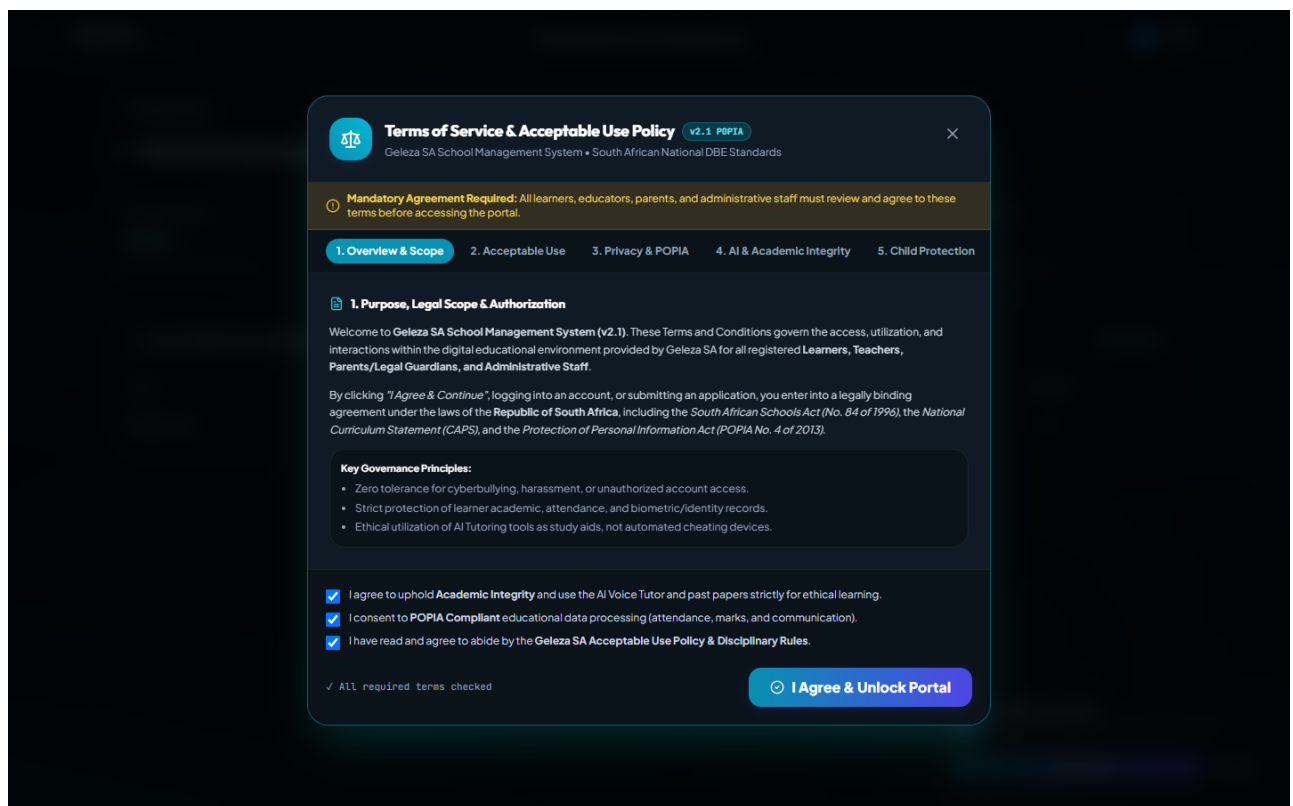

Figure 32. Parent / Guardian: Attendance Records — live Geleza SA screen.

Student Timetable

Why this matters in South African schools

Parents support homework and transport when they know the period grid.

What Geleza SA provides

The Student Timetable mirrors the learner's published weekly schedule so guardians can plan afternoons, sport, and study support around real class times.

How users open this module

More !' Student Timetable.

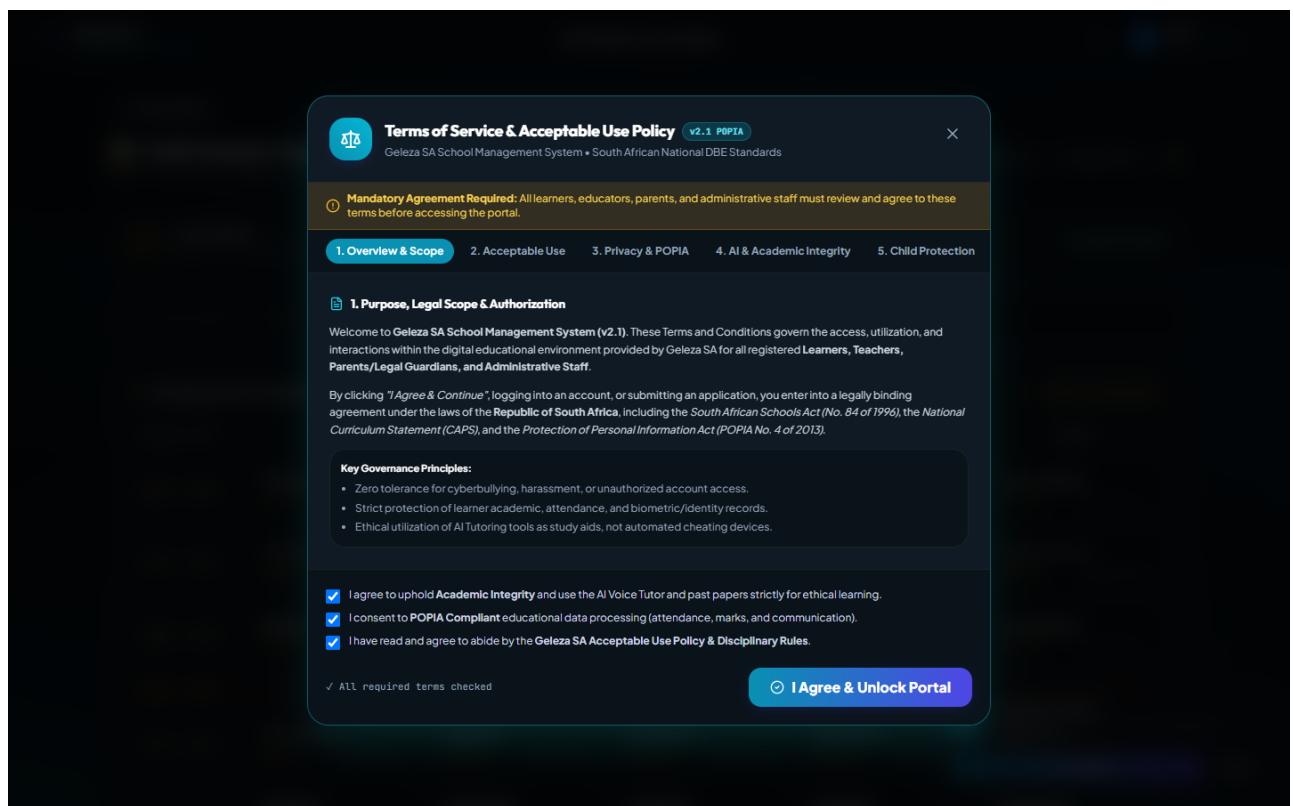

Figure 33. Parent / Guardian: Student Timetable — live Geleza SA screen.

School Fees & Statements

Why this matters in South African schools

Fee queries drive many office visits.

What Geleza SA provides

Where enabled, School Fees & Statements give parents invoices, balances, and receipts aligned to school finance records. Combined with Contact Admin, fee disputes have a structured path instead of lost emails.

How users open this module

More !' School Fees & Statements.

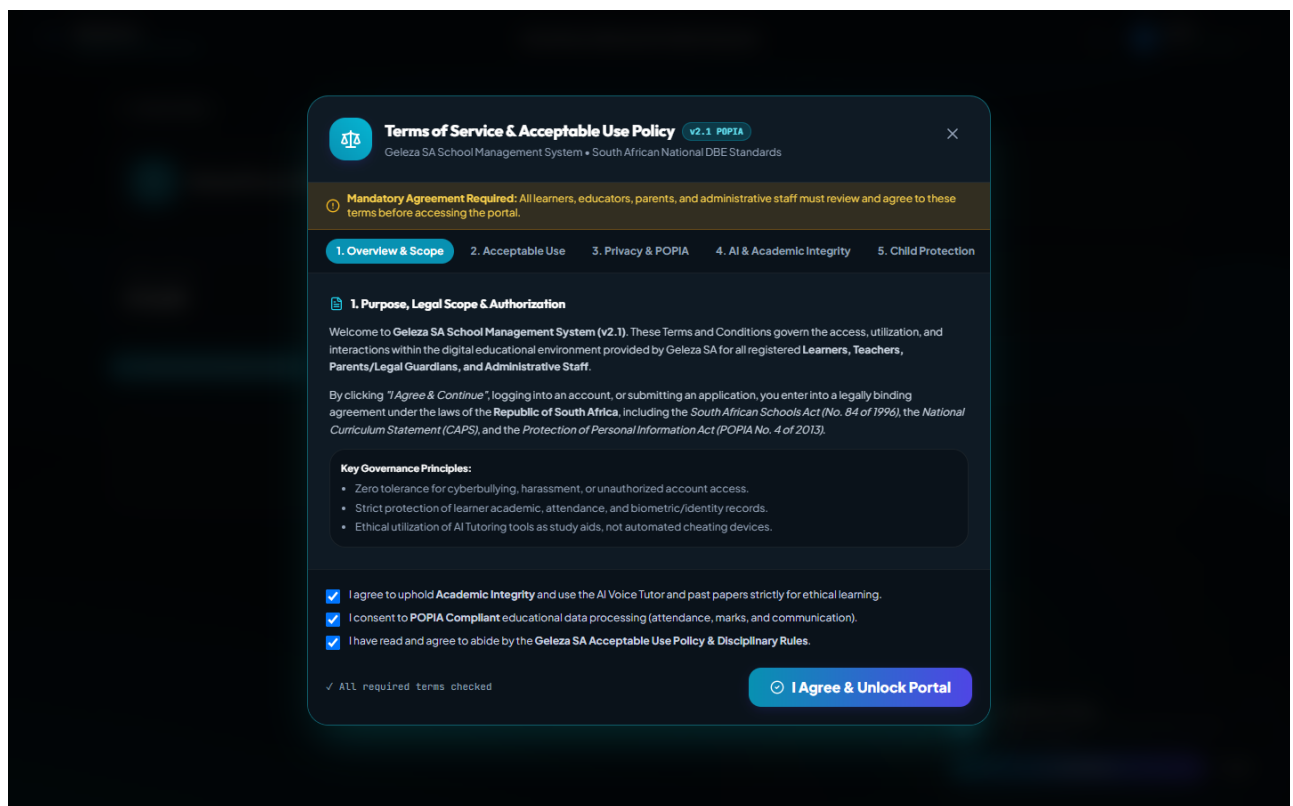

Figure 34. Parent / Guardian: School Fees & Statements — live Geleza SA screen.

Parent-Teacher Consultations

Why this matters in South African schools

Booking meetings by WhatsApp is unreliable at scale.

What Geleza SA provides

Parent-Teacher Consultations let guardians book and manage academic meetings with educators inside Geleza SA, keeping schedules visible to both sides.

How users open this module

More !' Parent-Teacher Consultations.

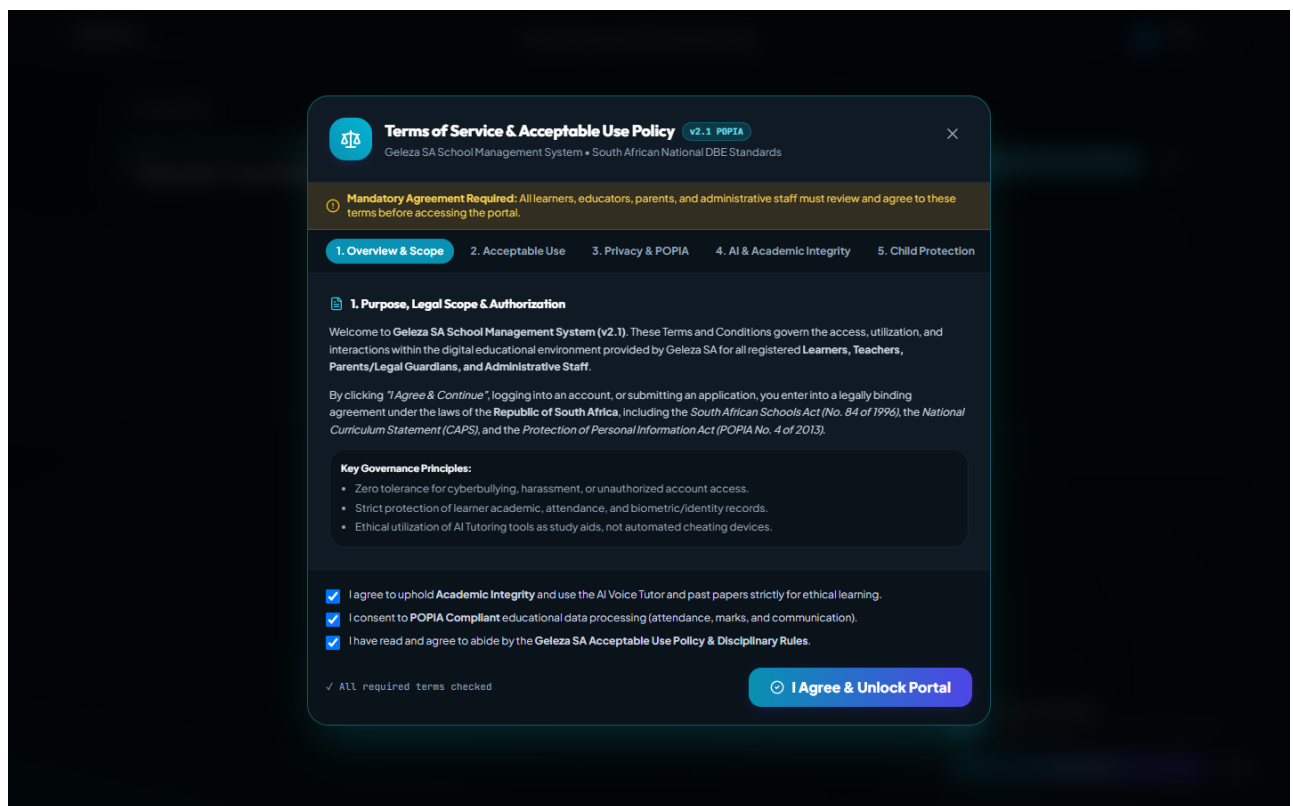

Figure 35. Parent / Guardian: Parent-Teacher Consultations — live Geleza SA screen.

Message Hub

Why this matters in South African schools

School–home communication needs an audit-friendly channel.

What Geleza SA provides

Message Hub & Teacher Chat keep parent–school dialogue in context. For wrong application details (email, phone, ID), parents should use Contact Admin so the Support Desk can correct records formally.

How users open this module

Messages tab or More !' Message Hub. Help !' Contact Admin for data corrections.

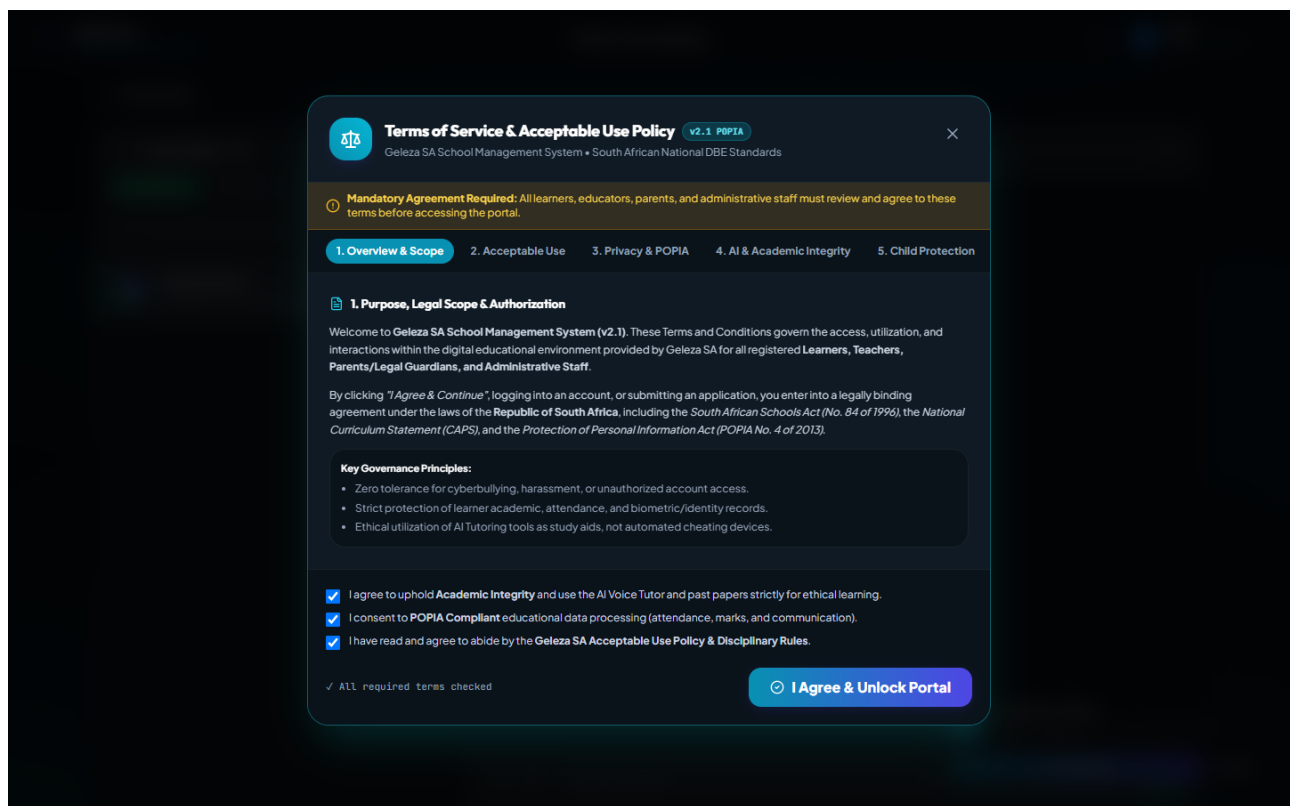

Figure 36. Parent / Guardian: Message Hub — live Geleza SA screen.

School Calendar

Why this matters in South African schools

Guardians miss events announced only at assemblies.

What Geleza SA provides

The School Calendar surfaces term dates, meetings, and school events so family planning matches institutional reality.

How users open this module

Calendar tab or More !' School Calendar.

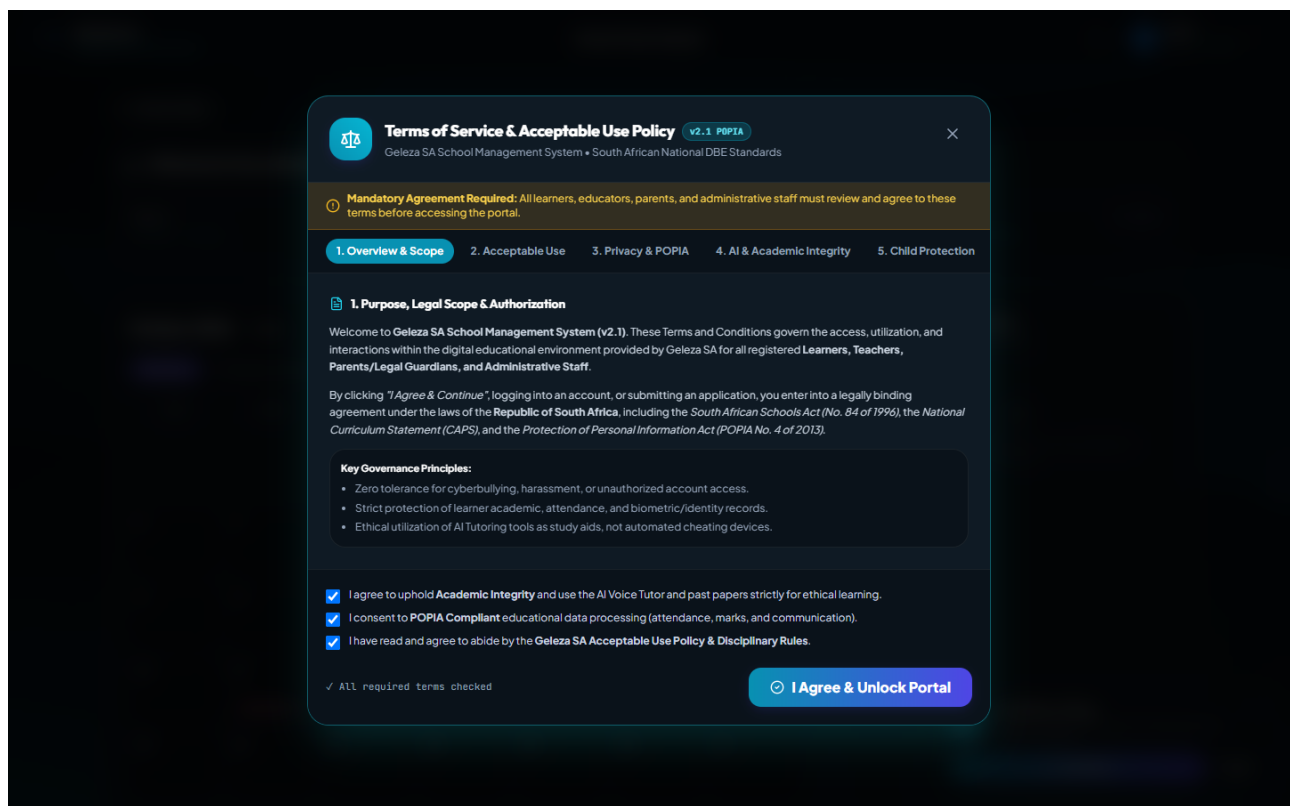

Figure 37. Parent / Guardian: School Calendar — live Geleza SA screen.

NSFAS & Bursary Hub

Why this matters in South African schools

Parents co-drive tertiary funding research for FET learners.

What Geleza SA provides

The NSFAS & Bursary Hub helps families explore funding options alongside their child's academic journey in Geleza SA.

How users open this module

More !' NSFAS & Bursary Hub.

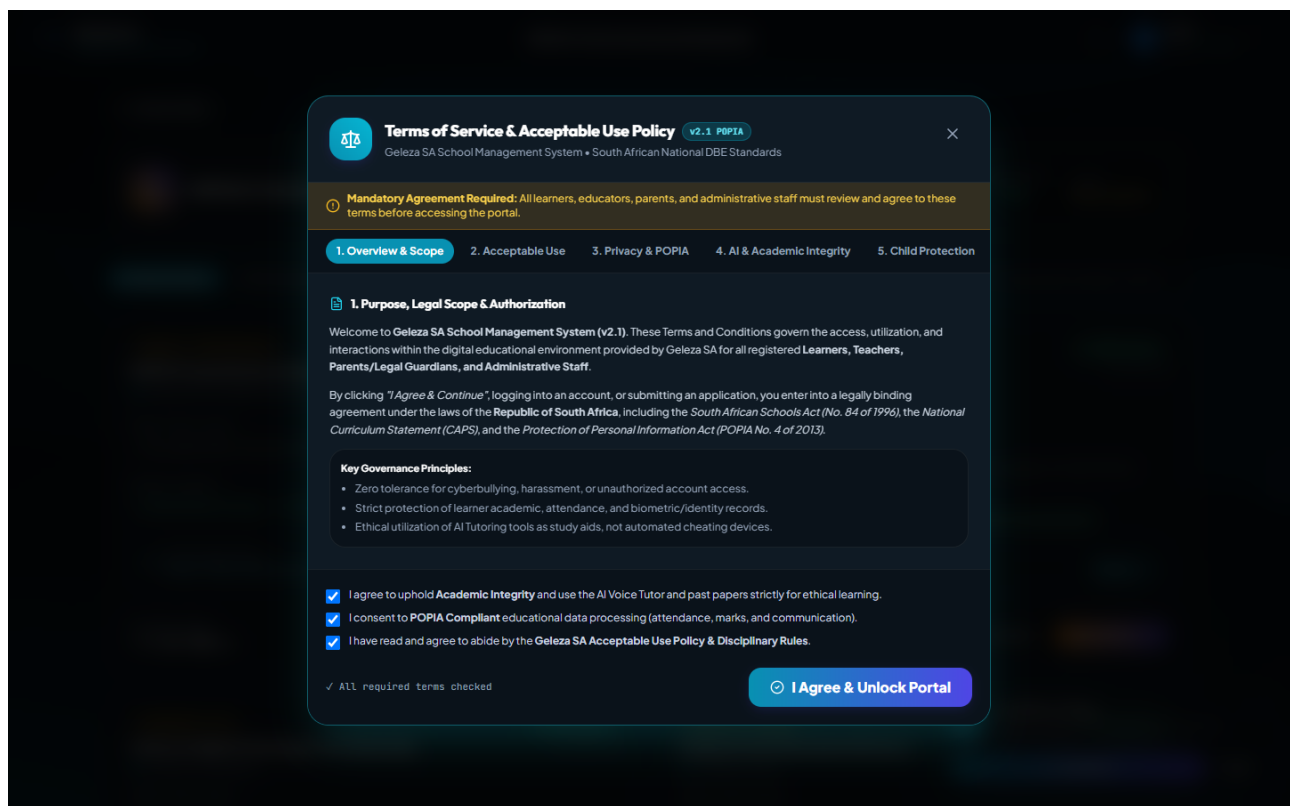

Figure 38. Parent / Guardian: NSFAS & Bursary Hub — live Geleza SA screen.

Portal Settings

Why this matters in South African schools

Parents need secure, readable preferences on phone and desktop.

What Geleza SA provides

Portal Settings cover theme, security, and Help & Support. This is also the path into FAQs and Contact Admin when an application used the wrong email, phone, or ID.

How users open this module

More !' Portal Settings !' Help & Support / Contact Admin as needed.

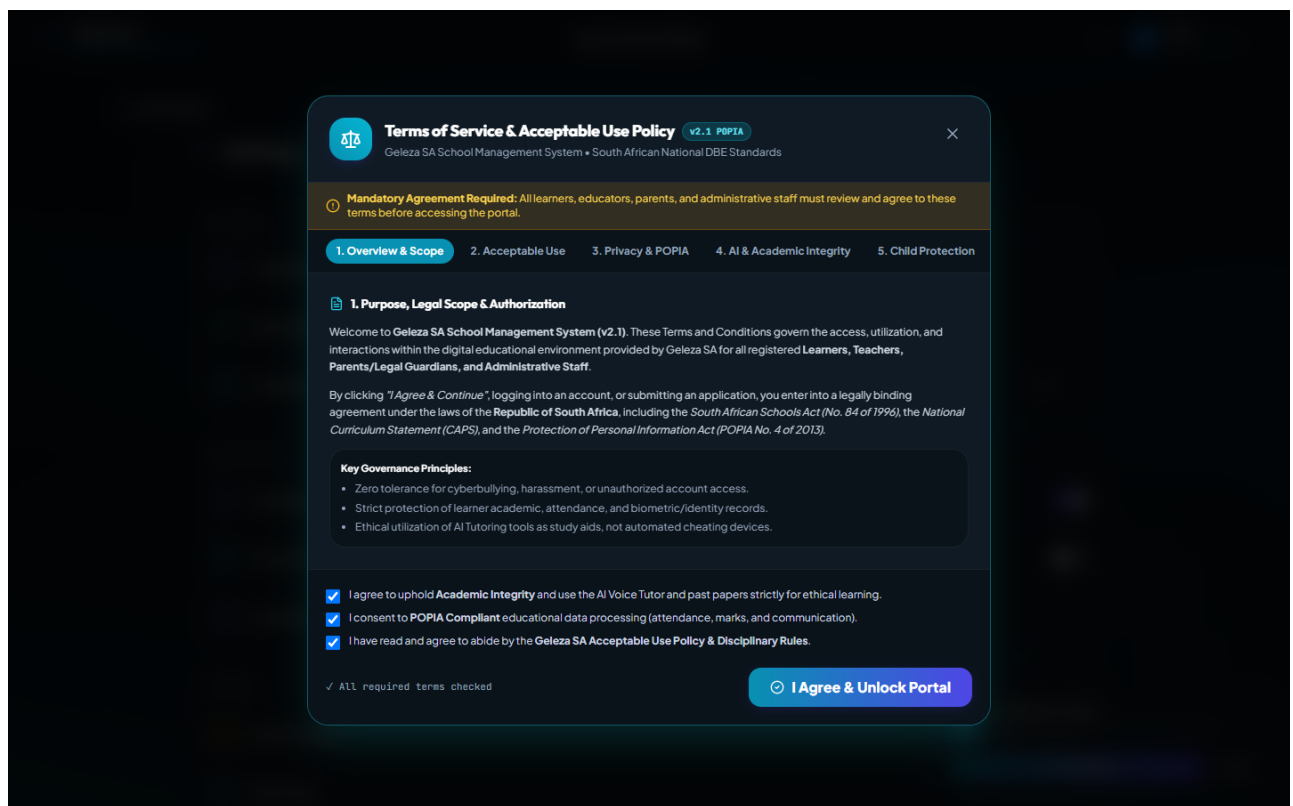

Figure 39. Parent / Guardian: Portal Settings — live Geleza SA screen.

9.5 Public parent onboarding & support (reference)

Before the parent dashboard exists, Geleza SA still talks about the family journey on public surfaces. Registration captures guardian details with field validation; Contact Admin is the escape hatch when those details are wrong.

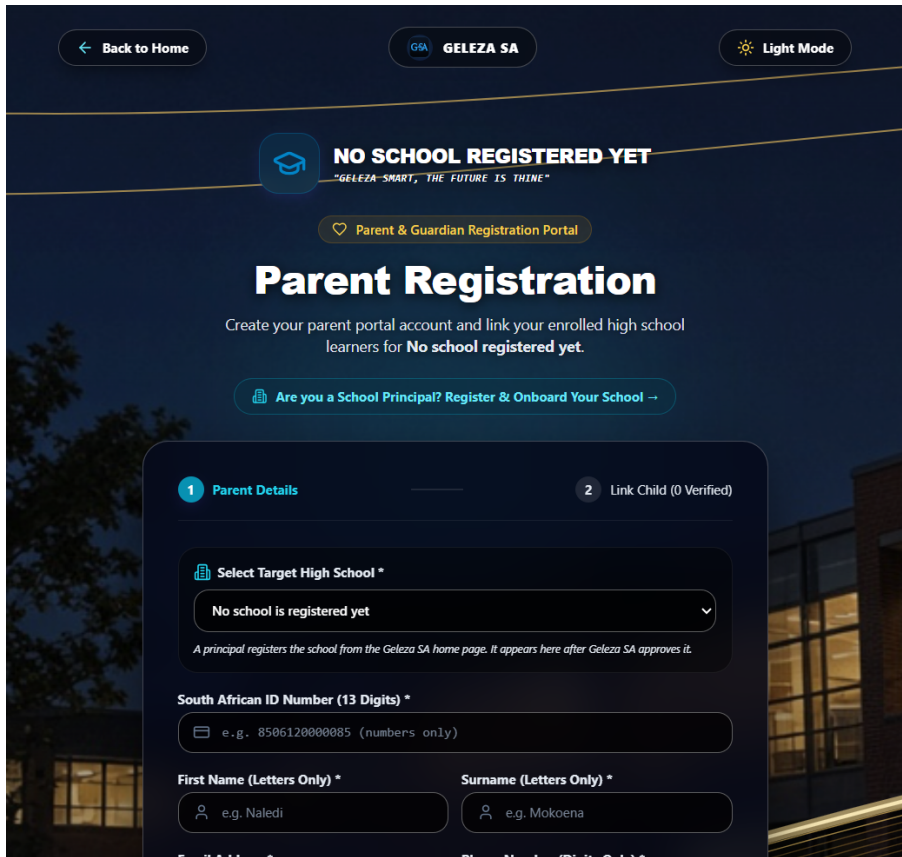

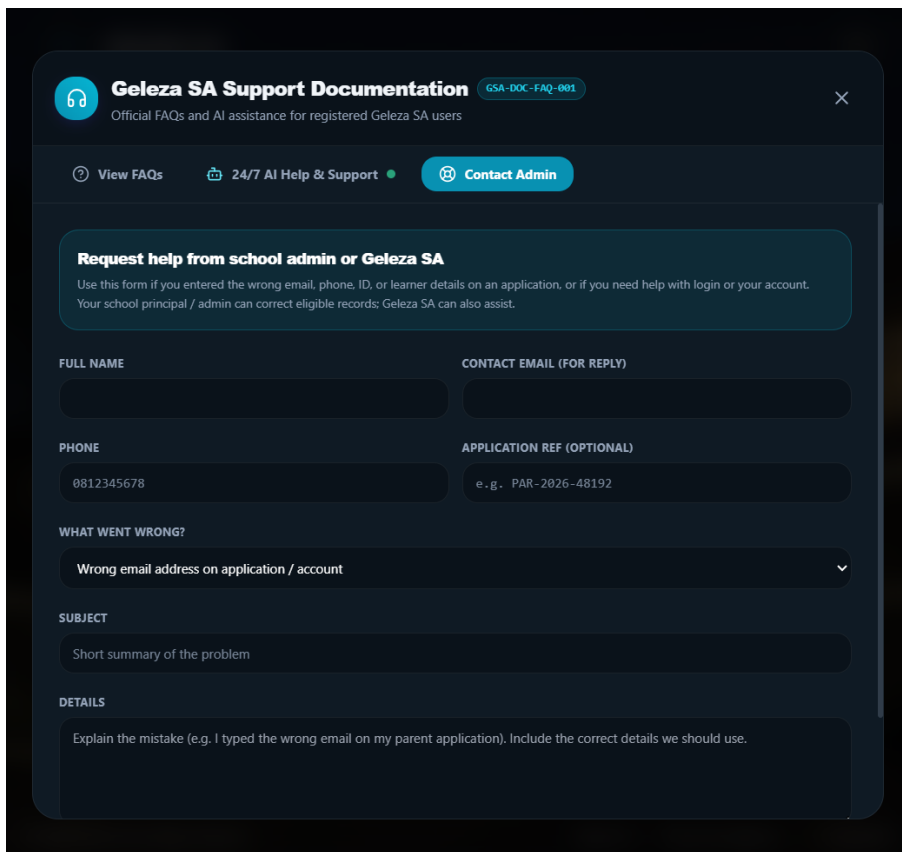

Figure 40. Parent Registration portal — public onboarding before child linkage.

10. Teacher / Educator walkthrough

Role: Teacher / Educator · Route: /dashboard/teacher

Teachers work from a classroom-first Educator Workspace. Geleza SA scopes marksheets, attendance, assignments, conduct, and AI lesson tools to the classes and subjects assigned by the school.

Live screenshots in this chapter were captured with tester Thabang Maetane (teacher.science@gelezasa.co.za) — Physical Sciences / Life Sciences / Mathematics. Password used for the documentation suite: password123.

10.1 Journey map

1

Receive access

Staff invite approval or admin-created employee account with subjects/grades.

2

Sign in

Email + password (or fingerprint) into /dashboard/teacher.

3

Daily classroom ops

Mark attendance, review messages, check timetable and calendar.

4

Assess & capture SBA

Use marksheets/grading modules; submit for admin moderation where required.

5

Assign & feedback

Homework hub for digital assignments.

6

Support learners

Early-warning radar, conduct merits/discipline, textbook issuance.

7

Collaborate

Parent–teacher consultations, sports duties, leave & relief requests.

10.2 Home & More hub

Every teacher / educator session begins on Home and discovers the full module set through the More hub. The following screens establish that orientation before the module-by-module pages.

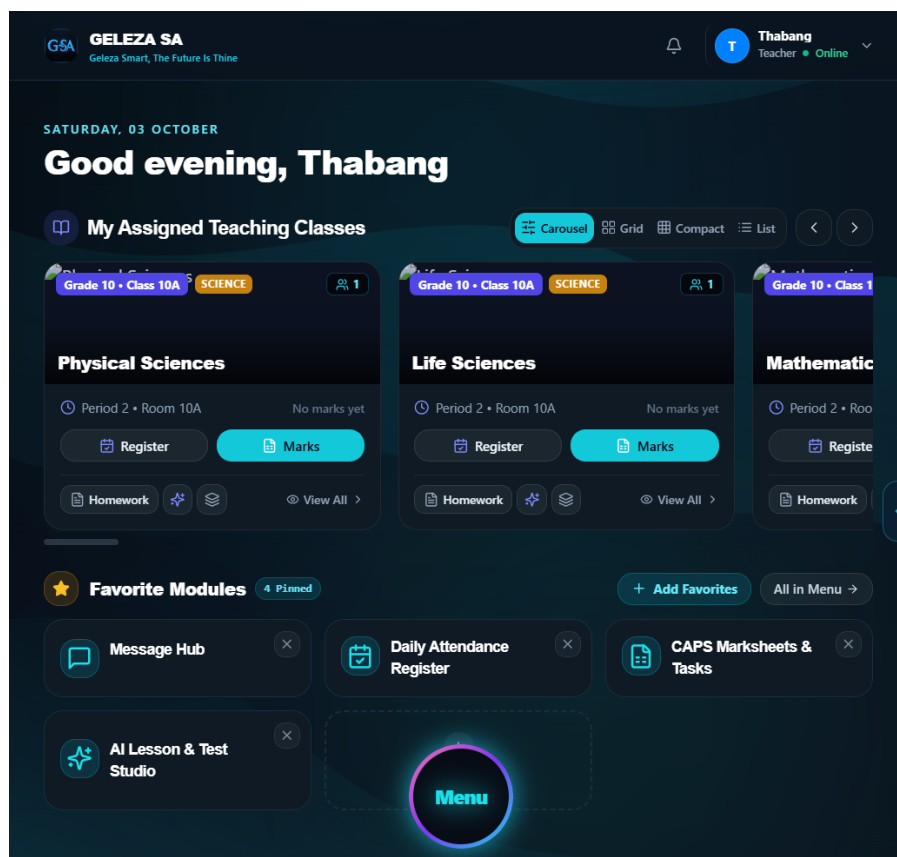

Figure 42. Educator Workspace — assigned teaching classes with Register and Marks actions.

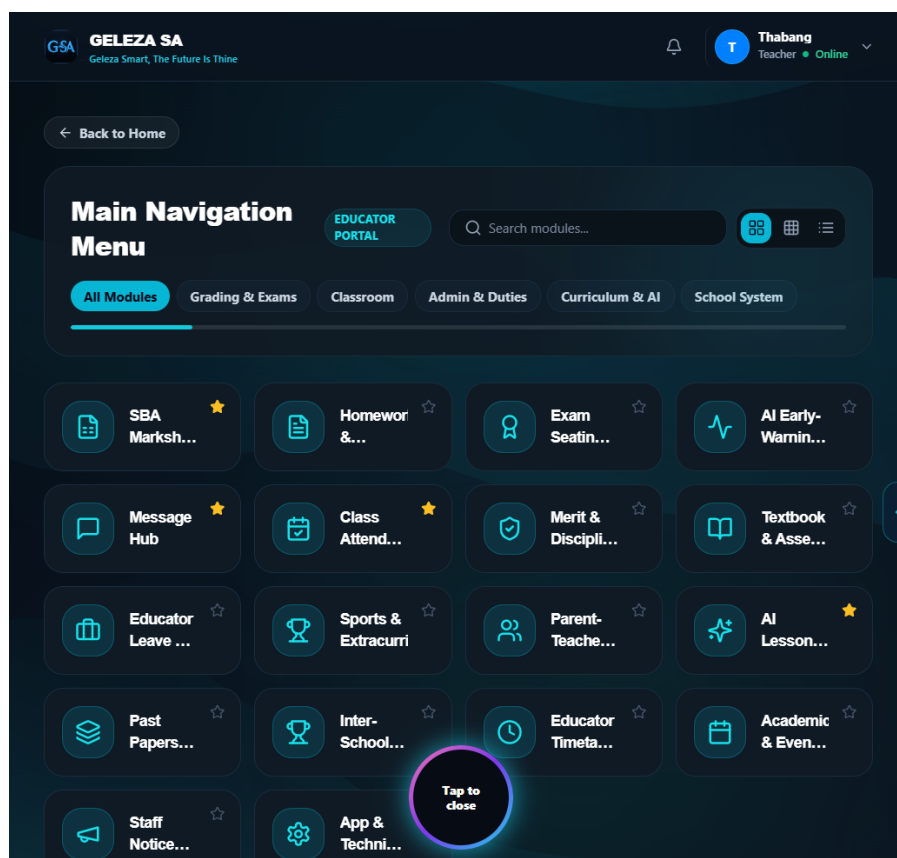

Figure 43. Educator Main Navigation Menu — grading, classroom ops, curriculum/AI, and school system modules.

10.3 Role principles

- Teacher tools are scoped to assigned classes and subjects.
- SBA capture feeds the same marks families eventually see — accuracy first.
- AI lesson/test tools draft; educators remain accountable for final assessment quality.

10.4 Module-by-module guide

The next 10 pages each cover one teacher / educator module in Geleza SA: the school problem it addresses, what the app does, how to open it, and a live screenshot.

SBA Marksheets & Grading

Why this matters in South African schools

CAPS SBA capture is the spine of secondary assessment.

What Geleza SA provides

Learner Assessment & Performance Matrix lets teachers select class and subject, review formal assessment averages, term composites, and AI activity averages, then capture marks against the CAPS Formal Assessment Schedule by term. Data feeds learner/parent views only when verified and published per school process.

How users open this module

Home class !' Marks, or More !' SBA Marksheets & Grading. Choose class, subject, term, then Capture New Marks.

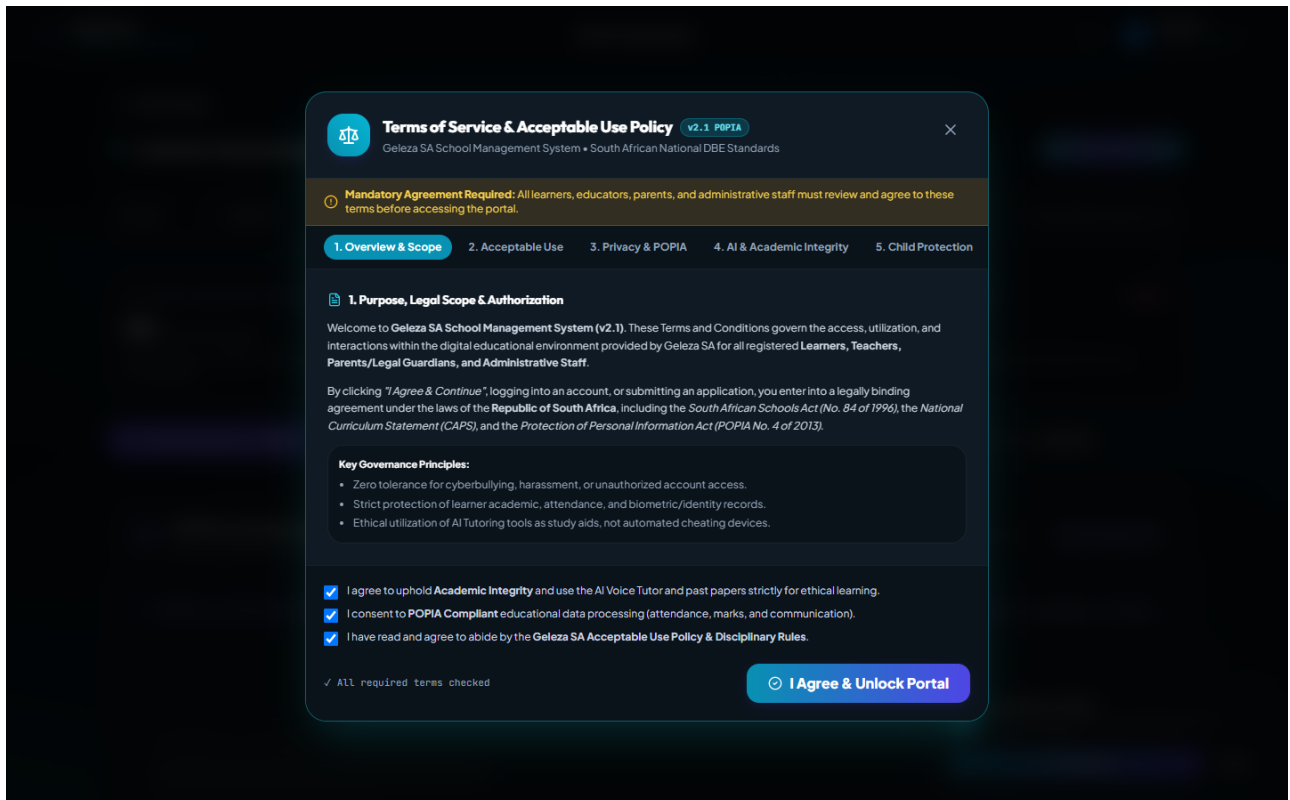

Figure 44. Teacher / Educator: SBA Marksheets & Grading — live Geleza SA screen.

Class Attendance Register

Why this matters in South African schools

Paper registers delay parent visibility and leadership oversight.

What Geleza SA provides

The Class Attendance Register captures period presence for the teacher's classes. Attendance feeds parent records and school analytics, closing the loop between classroom reality and family oversight.

How users open this module

Home !' Register on a class card, or More !' Class Attendance Register.

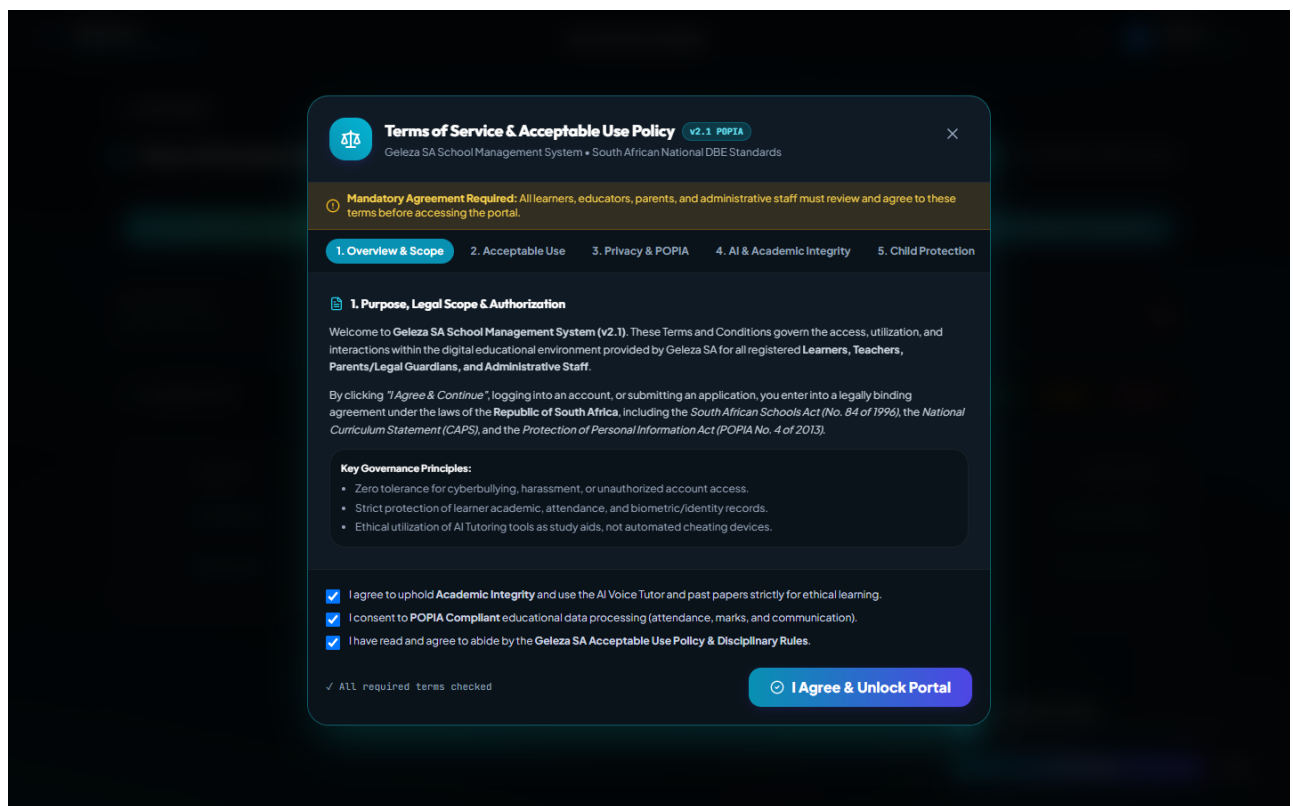

Figure 45. Teacher / Educator: Class Attendance Register — live Geleza SA screen.

Homework & Assignment Hub

Why this matters in South African schools

Issuing and marking homework across channels wastes teaching time.

What Geleza SA provides

Teachers create, issue, and review digital assignments in one hub. Learner submissions and feedback stay attached to the class context inside Geleza SA.

How users open this module

More !' Homework & Assignment Hub.

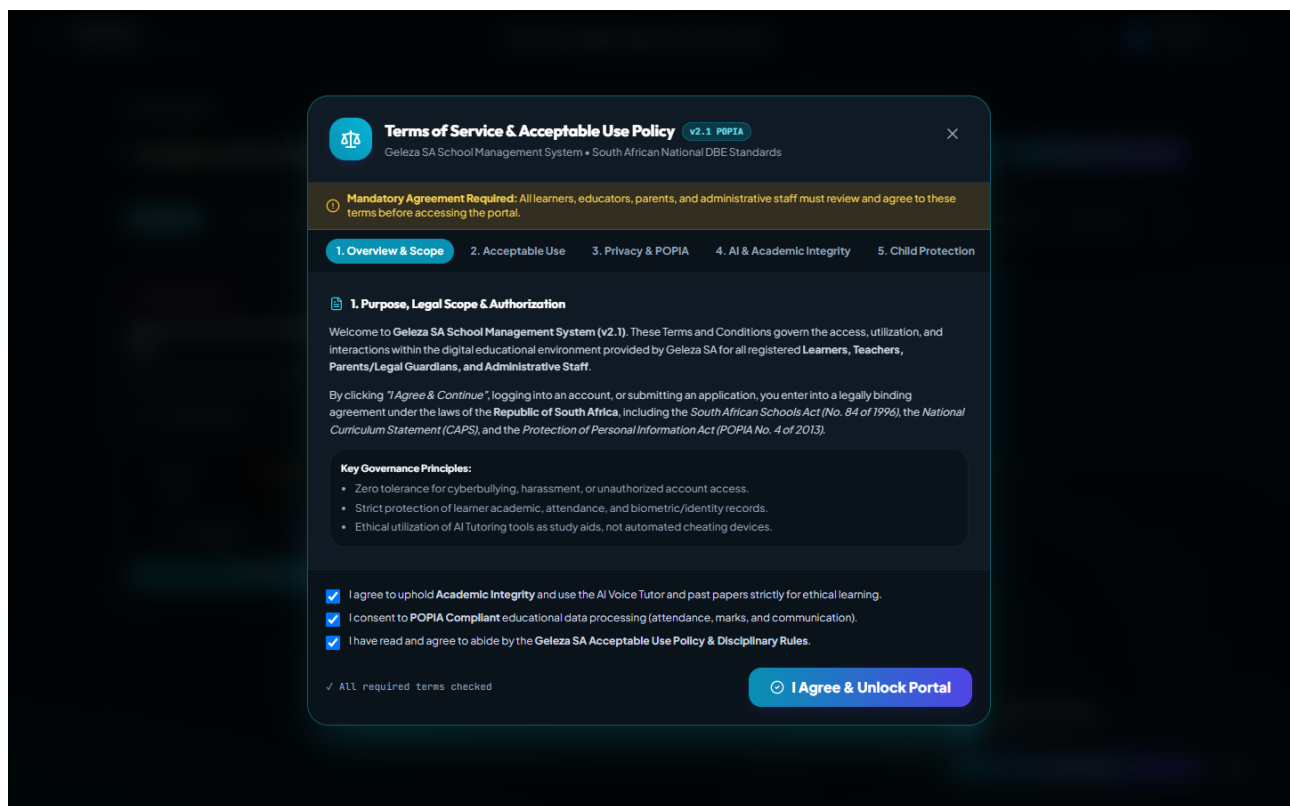

Figure 46. Teacher / Educator: Homework & Assignment Hub — live Geleza SA screen.

AI Lesson & Test Paper Studio

Why this matters in South African schools

Lesson prep and draft papers consume evenings.

What Geleza SA provides

AI Lesson & Test Paper Studio helps educators draft CAPS-oriented lessons and practice papers. Outputs are starting points for professional judgment — teachers remain accountable for final assessment quality.

How users open this module

More !' AI Lesson & Test Paper Studio.

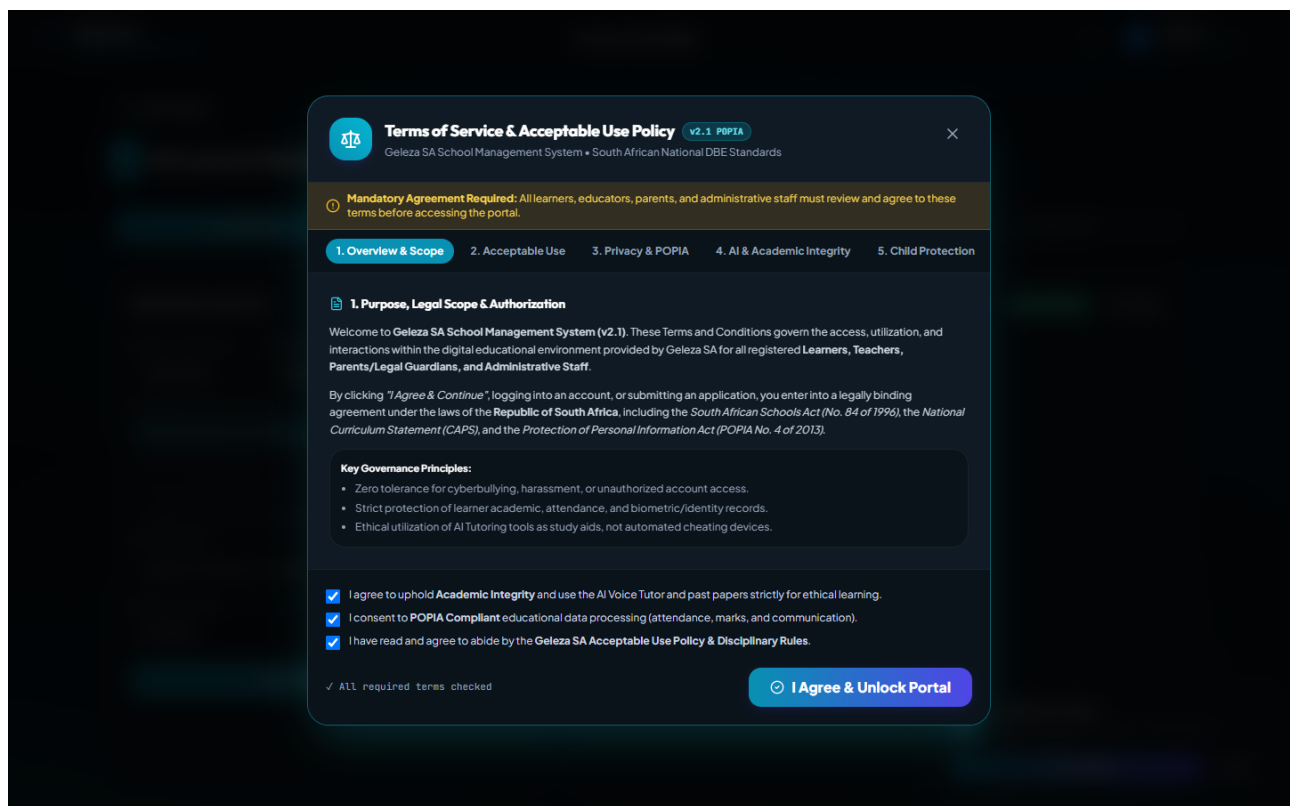

Figure 47. Teacher / Educator: AI Lesson & Test Paper Studio — live Geleza SA screen.

AI Early-Warning Radar

Why this matters in South African schools

At-risk learners are often noticed too late.

What Geleza SA provides

AI Early-Warning Radar highlights learners who may need intervention based on academic signals available in the system, supporting pastoral and subject support before failure consolidates.

How users open this module

More !' AI Early-Warning Radar. Follow school intervention protocols after reviewing signals.

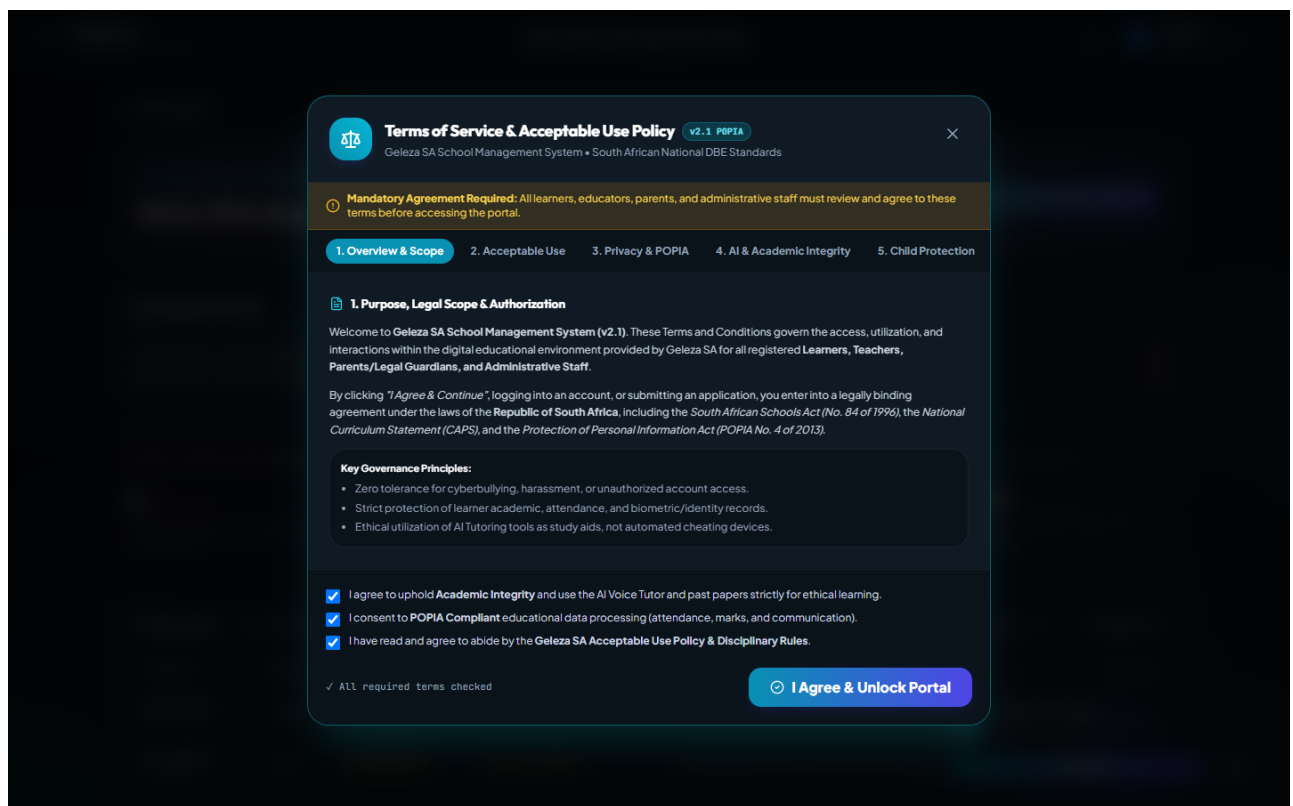

Figure 48. Teacher / Educator: AI Early-Warning Radar — live Geleza SA screen.

Educator Timetable

Why this matters in South African schools

Teaching load and venues must be clear each day.

What Geleza SA provides

Educator Timetable & Rooms shows the teacher's allocated periods and venues from the school's published timetable — the same source learners and parents consult.

How users open this module

More !' Educator Timetable & Rooms.

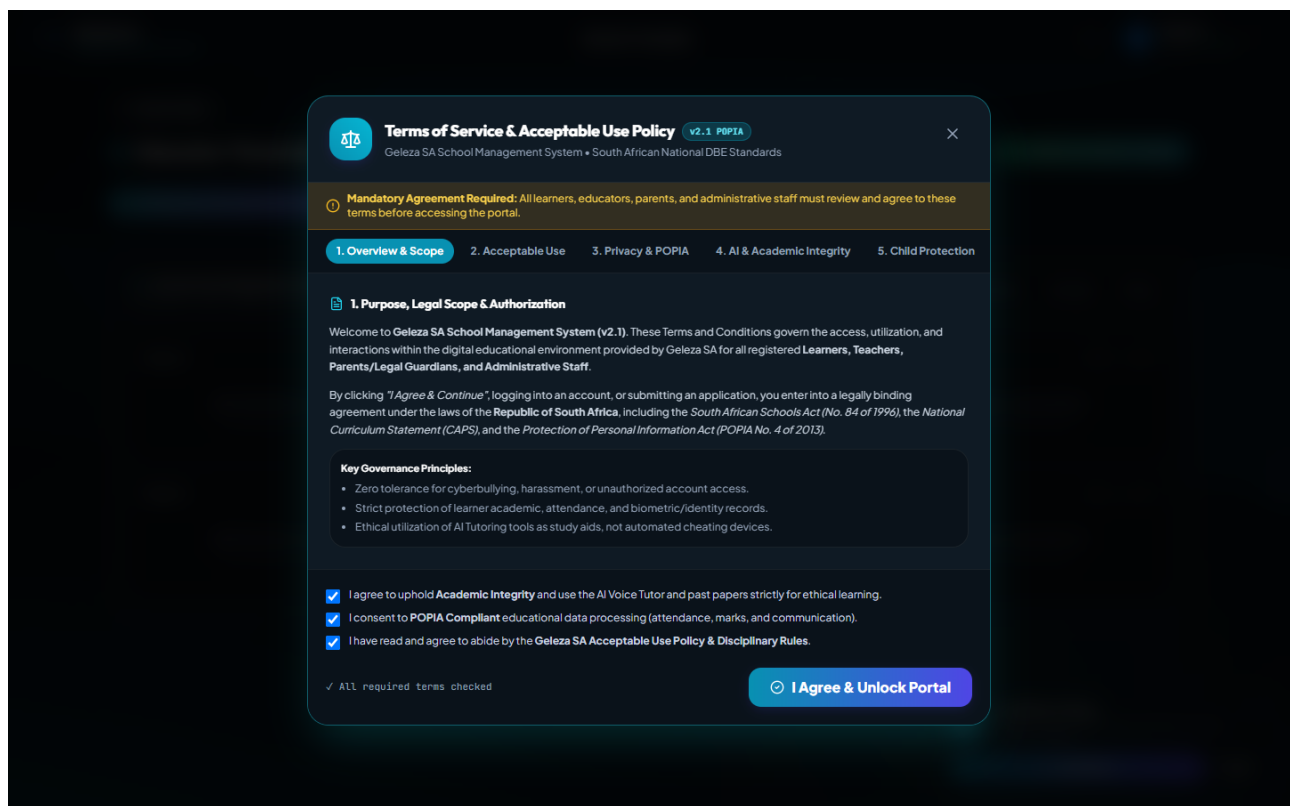

Figure 49. Teacher / Educator: Educator Timetable — live Geleza SA screen.

Message Hub

Why this matters in South African schools

Staff–parent messaging needs structure.

What Geleza SA provides

Teachers use Message Hub for staff and parent communications without losing context in personal messaging apps.

How users open this module

Messages tab or More !' Message Hub.

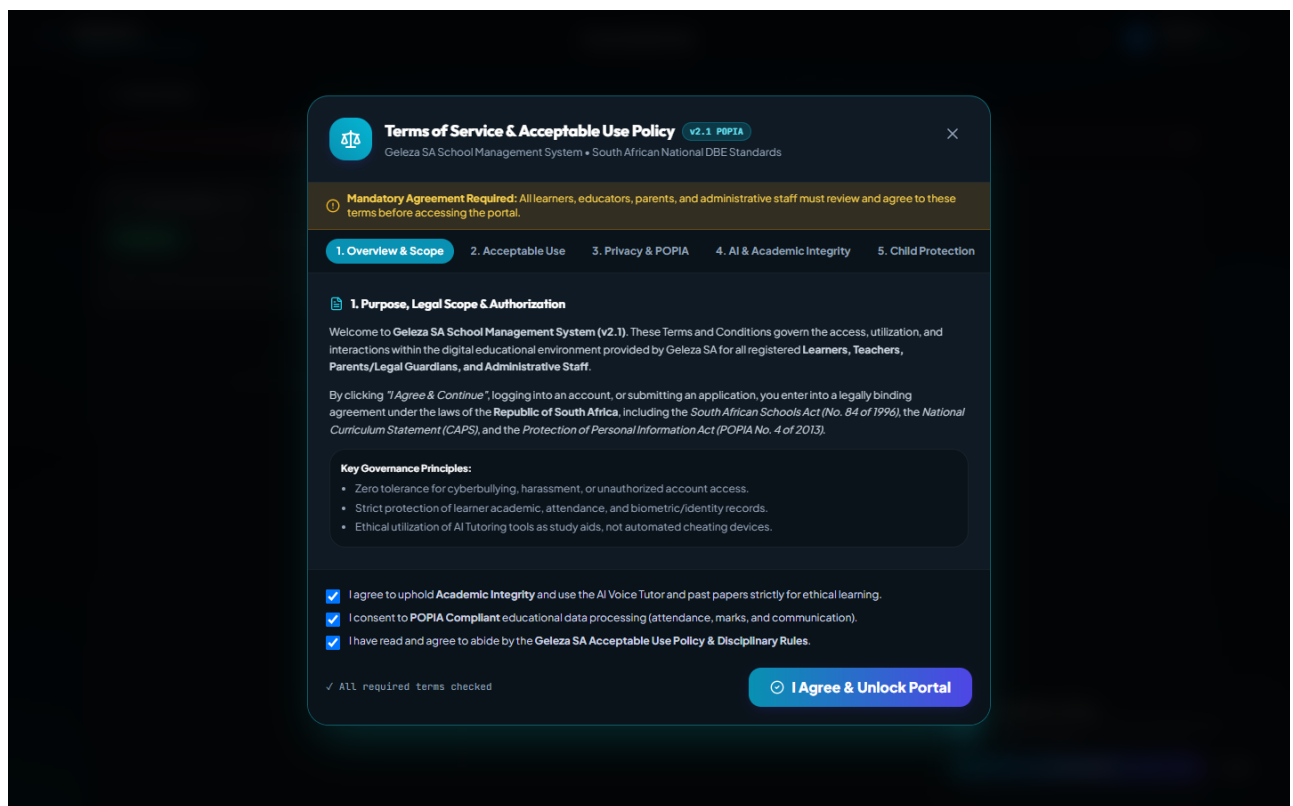

Figure 50. Teacher / Educator: Message Hub — live Geleza SA screen.

Merit & Disciplinary Conduct

Why this matters in South African schools

Conduct records must be fair, dated, and visible to leadership.

What Geleza SA provides

Merit & Disciplinary Conduct records positive and corrective events against learners. This supports consistent behaviour management across the school.

How users open this module

More !' Merit & Disciplinary Conduct.

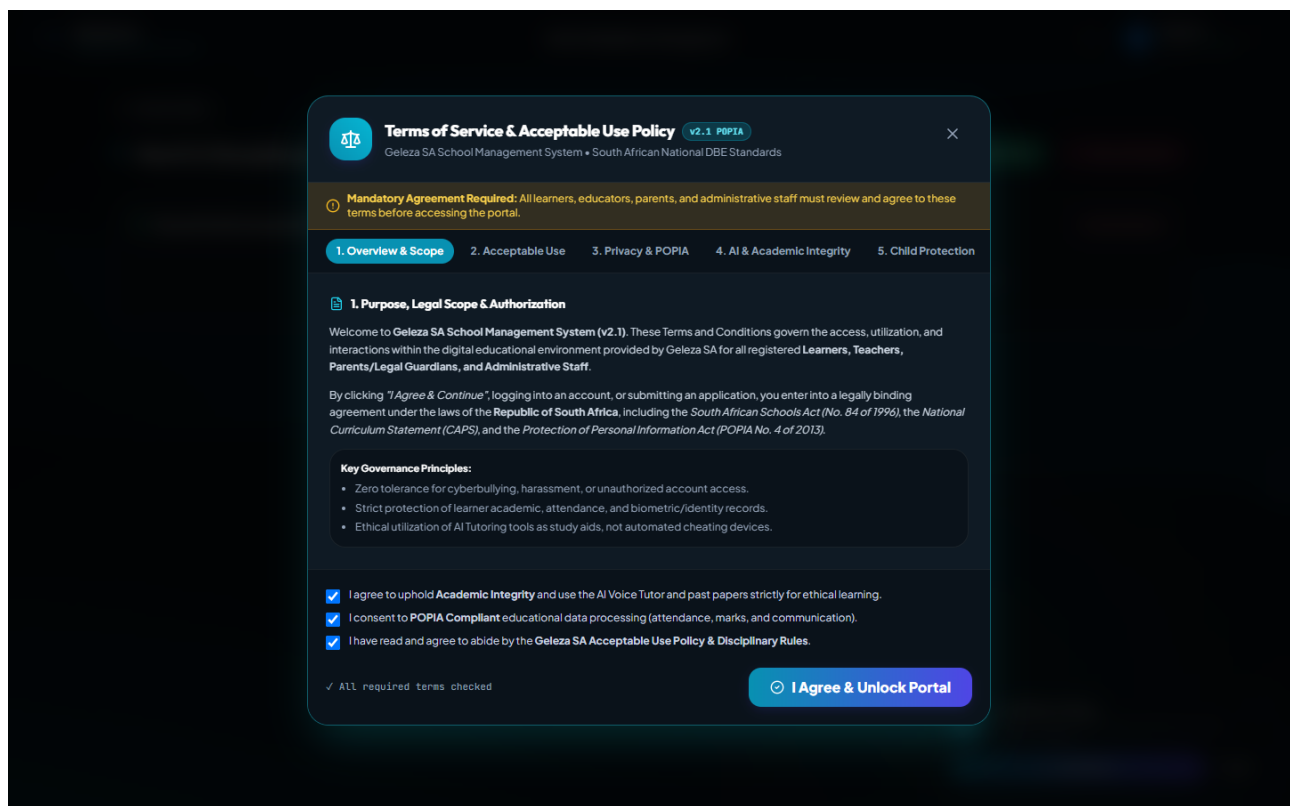

Figure 51. Teacher / Educator: Merit & Disciplinary Conduct — live Geleza SA screen.

Parent-Teacher Consultations

Why this matters in South African schools

Consultation slots collapse without a shared booking surface.

What Geleza SA provides

Teachers manage consultation availability and meetings with parents inside Geleza SA, aligning with the parent PTC module.

How users open this module

More !' Parent-Teacher Consultations.

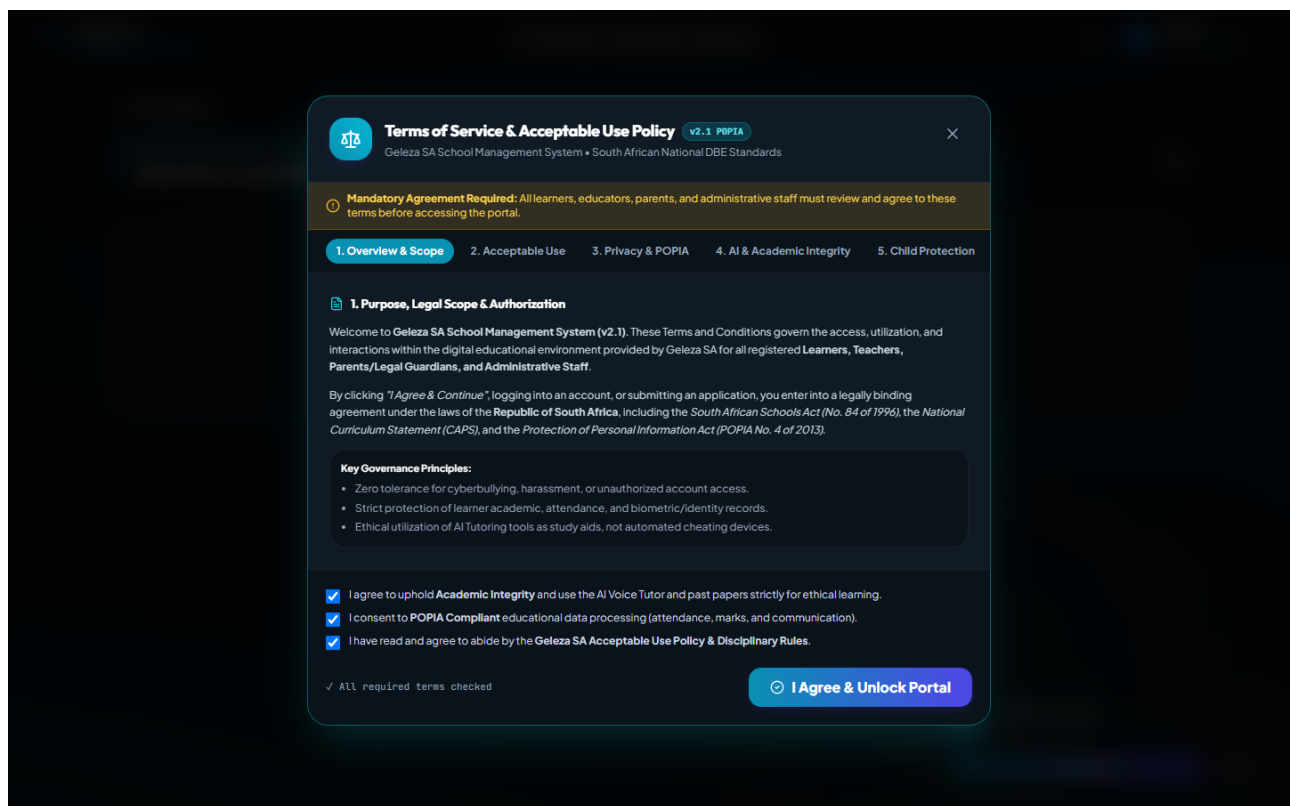

Figure 52. Teacher / Educator: Parent-Teacher Consultations — live Geleza SA screen.

App Settings

Why this matters in South African schools

Educators need the same help and security controls as other roles.

What Geleza SA provides

App Settings cover theme, notifications, security, and Help & Support — including Contact Admin for account issues.

How users open this module

More !' App & Technical Settings.

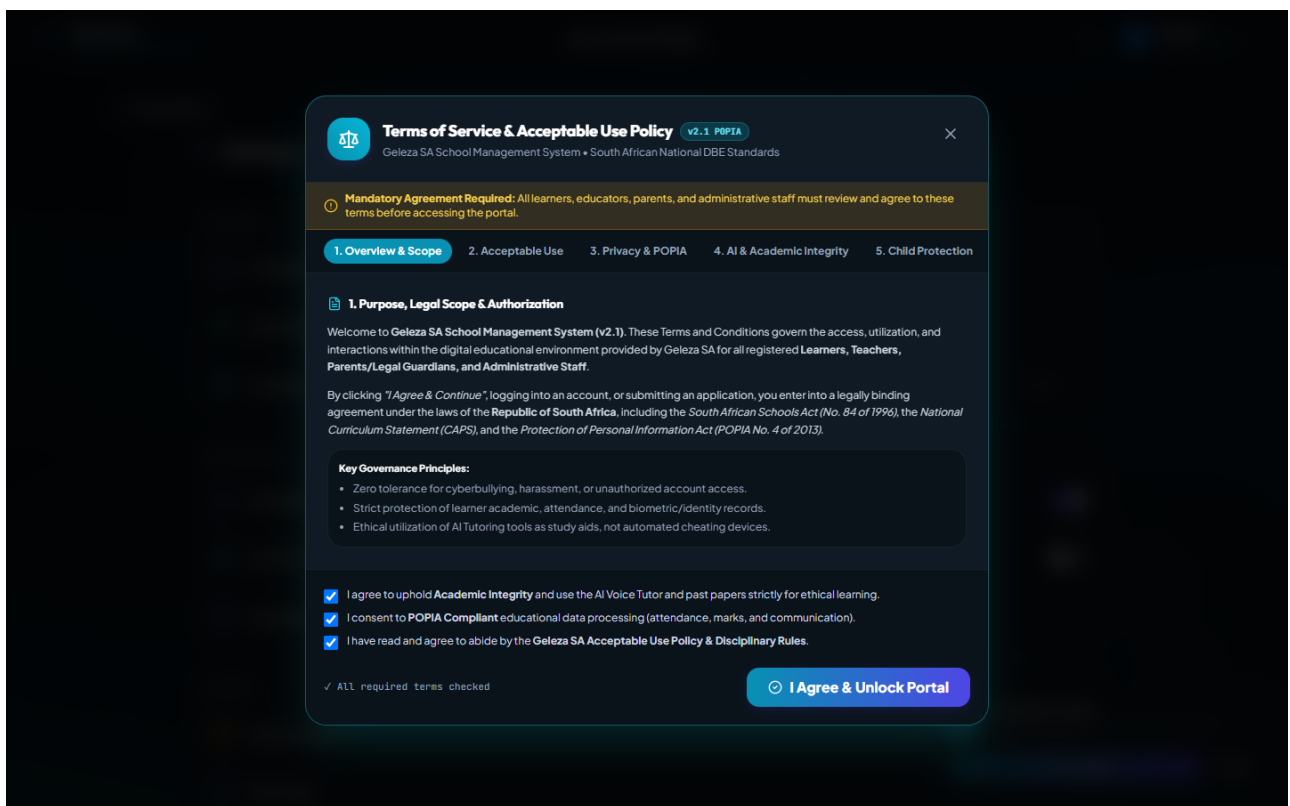

Figure 53. Teacher / Educator: App Settings — live Geleza SA screen.

11. Principal / School Admin walkthrough

Role: Principal / School Admin · Route: /dashboard/admin

Principals and school admins operate the Administrative Control Center. After Geleza SA approves the school, leadership governs users, admissions, parent applications, academics, fees, communications, and the User Support Desk from one role-based portal.

Live screenshots in this chapter were captured with tester K. E. Molepo (principal@makgoka.co.za) — Makgoka High school admin. Password used for the documentation suite: password123.

11.1 Journey map

1

Register School

From Get Started !' Register School; submit institutional application.

2

Geleza SA approval

Platform executives approve the school and enable modules.

3

Appoint admins & staff

Create school sub-admins, invite teachers/coaches, configure classes & subjects.

4

Enrol learners & review parents

Admissions + Parent Applications (Accept & Link / Reject / Correct).

5

Operate academics

Mark audits, report card studio, matric projector, timetable publish.

6

Operate school life

Fees, sports, exam seating, textbooks, consultations, announcements.

7

Support users

Support Desk tickets — correct mistaken emails/phones/IDs and resolve cases.

11.2 Home & More hub

Every principal / school admin session begins on Home and discovers the full module set through the More hub. The following screens establish that orientation before the module-by-module pages.

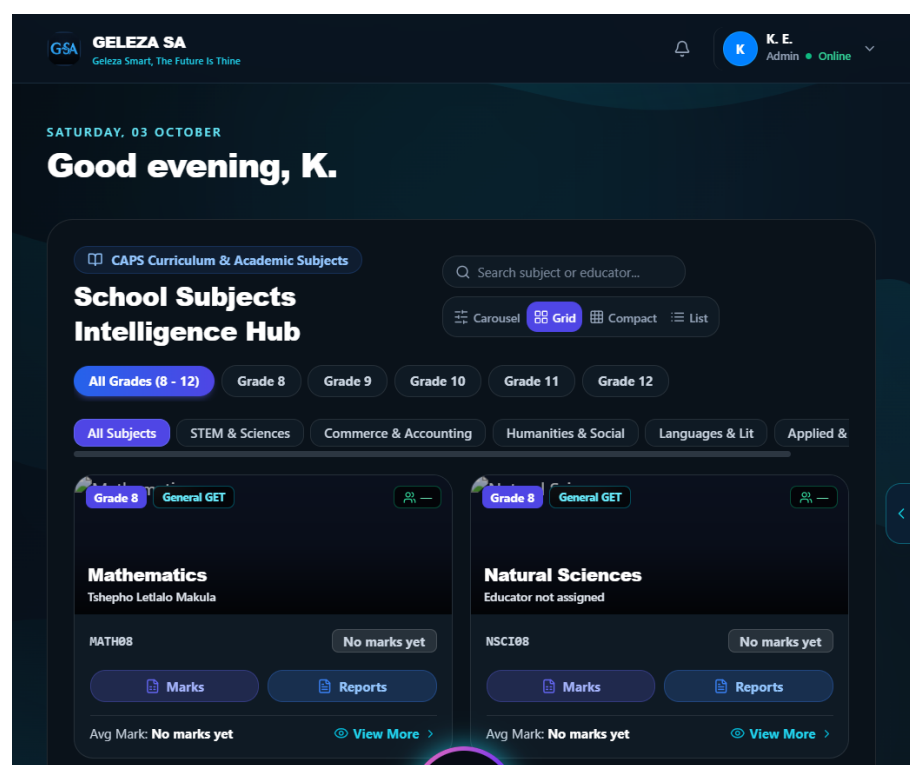

Figure 54. Principal Home — School Subjects Intelligence Hub with Marks and Reports actions.

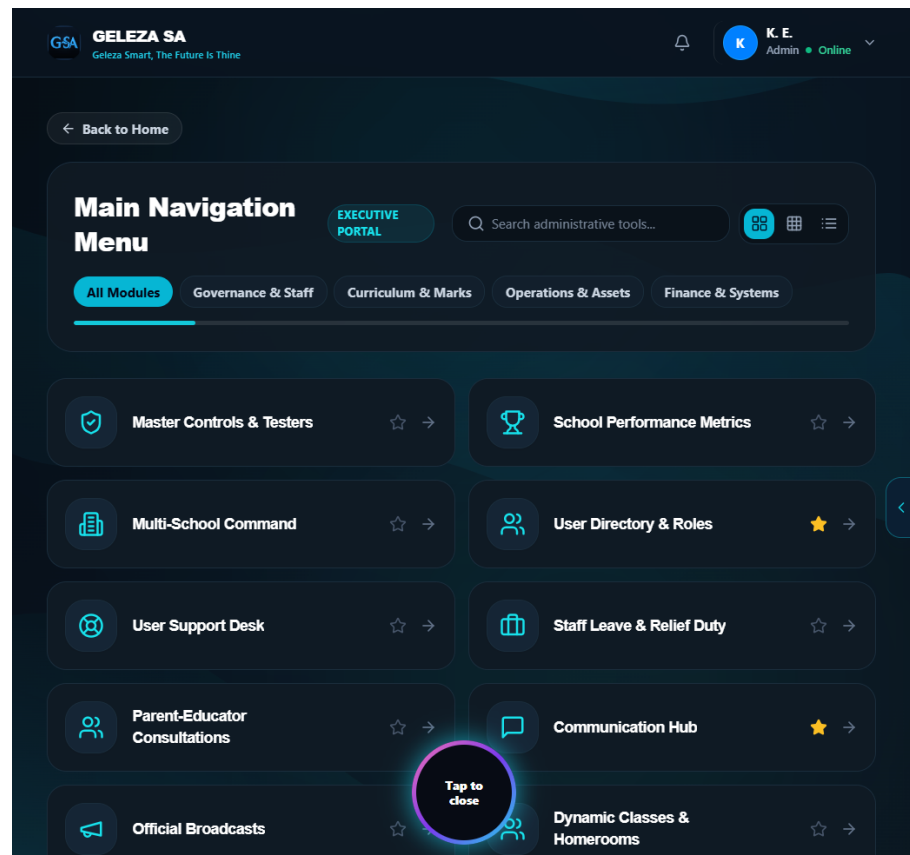

Figure 55. Executive Portal menu — User Directory, Support Desk, Multi-School Command, and operations modules.

11.3 Role principles

- Admin is the school command surface for people, academics, fees, and communications.
- Parent Applications + Support Desk deliberately grant correction privilege for mistaken contact/ID fields.
- Publishing report cards and timetables is what unlocks family-facing views.

11.4 Module-by-module guide

The next 12 pages each cover one principal / school admin module in Geleza SA: the school problem it addresses, what the app does, how to open it, and a live screenshot.

User Directory & Roles

Why this matters in South African schools

Schools cannot run without governed employee, learner, and parent accounts.

What Geleza SA provides

User Directory & Roles is the people spine of Geleza SA for a school: employees/teachers, learners, parents, admissions, parent applications, and school admins. From here principals enrol staff, lock profiles when needed, and move into Parent Applications for Accept & Link / Reject / Correct workflows.

How users open this module

More !' User Directory & Roles. Use Parent Applications for guardian onboarding and corrections.

EDUCATOR / STAFF	DESIGNATION & DEPARTMENT	ASSIGNED SUBJECTS	GRADES & CLASSES	PROFILE EDIT	CONTACT	AI
Minenhle Dlungwane teacher.commerce@gelezasa.co.za	Teacher Academic	Accounting Business Studies Economics	Grades: 10, 11 Classes: 10B	Locked	8711943962

Tshepho Letlalo Makula 202247878@myturff.ul.ac.za	Principal Administration	Physical Sciences Mathematics	Grades: 10, 11, 12 Classes: 10A, 11A, 12A	Locked	8692686618	

Figure 56. Principal / School Admin: User Directory & Roles — live Geleza SA screen.

User Support Desk

Why this matters in South African schools

Wrong email/phone/ID on applications previously stranded users.

What Geleza SA provides

User Support Desk is the human recovery lane. Tickets from Contact Admin land here. Admins correct mistaken application fields, add resolution notes, and restore access without forcing families to restart from zero. This privilege is intentional for principals and Geleza SA platform staff.

How users open this module

More ! ' User Support Desk. Open ticket !' Correct linked application or resolve with message to the requester.

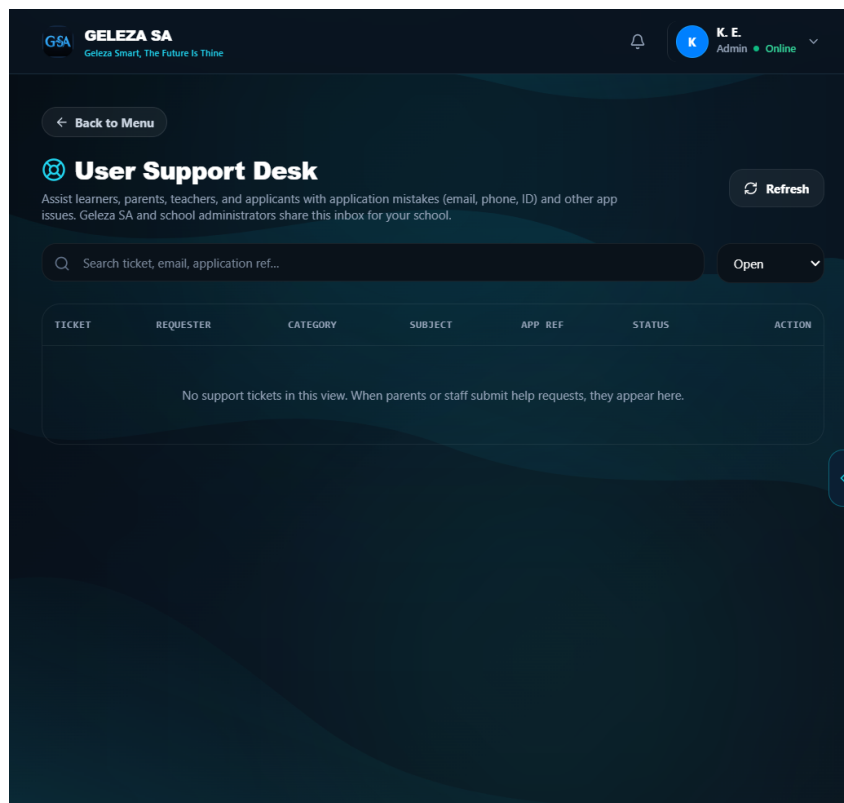

Figure 57. Principal / School Admin: User Support Desk — live Geleza SA screen.

CAPS Mark Audits

Why this matters in South African schools

Leadership must moderate SBA quality before families see results.

What Geleza SA provides

CAPS Mark Audits give principals oversight of assessment capture across subjects and classes. This is where school truth is protected before learner and parent portals reflect marks.

How users open this module

More !' CAPS Mark Audits & Report Cards / Marks pathways from Home subject cards.

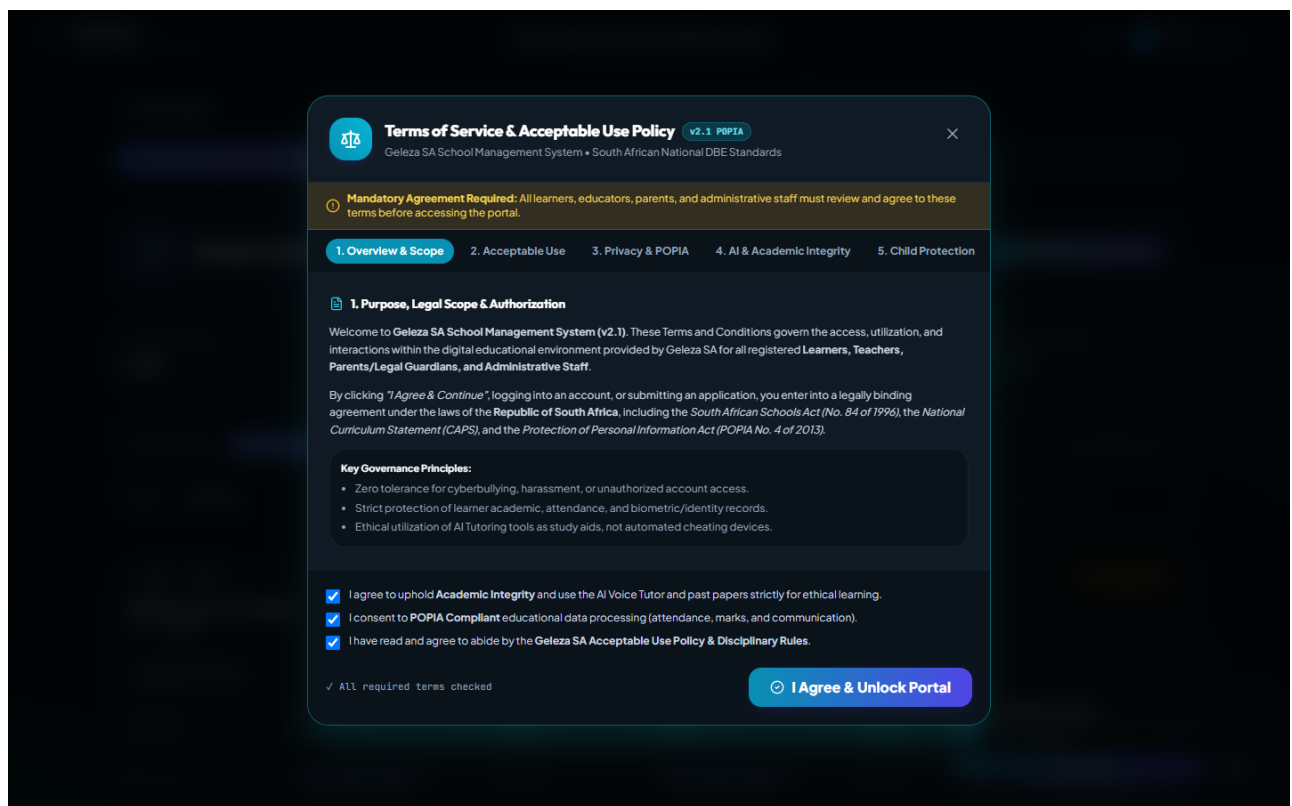

Figure 58. Principal / School Admin: CAPS Mark Audits — live Geleza SA screen.

CAPS Report Card Studio

Why this matters in South African schools

Official reports must be composed and published deliberately.

What Geleza SA provides

Report Card Studio is where the school composes and publishes CAPS term reports. Publication is the event that unlocks learner and parent report views.

How users open this module

More !' CAPS Report Card Studio or Home !' Reports actions.

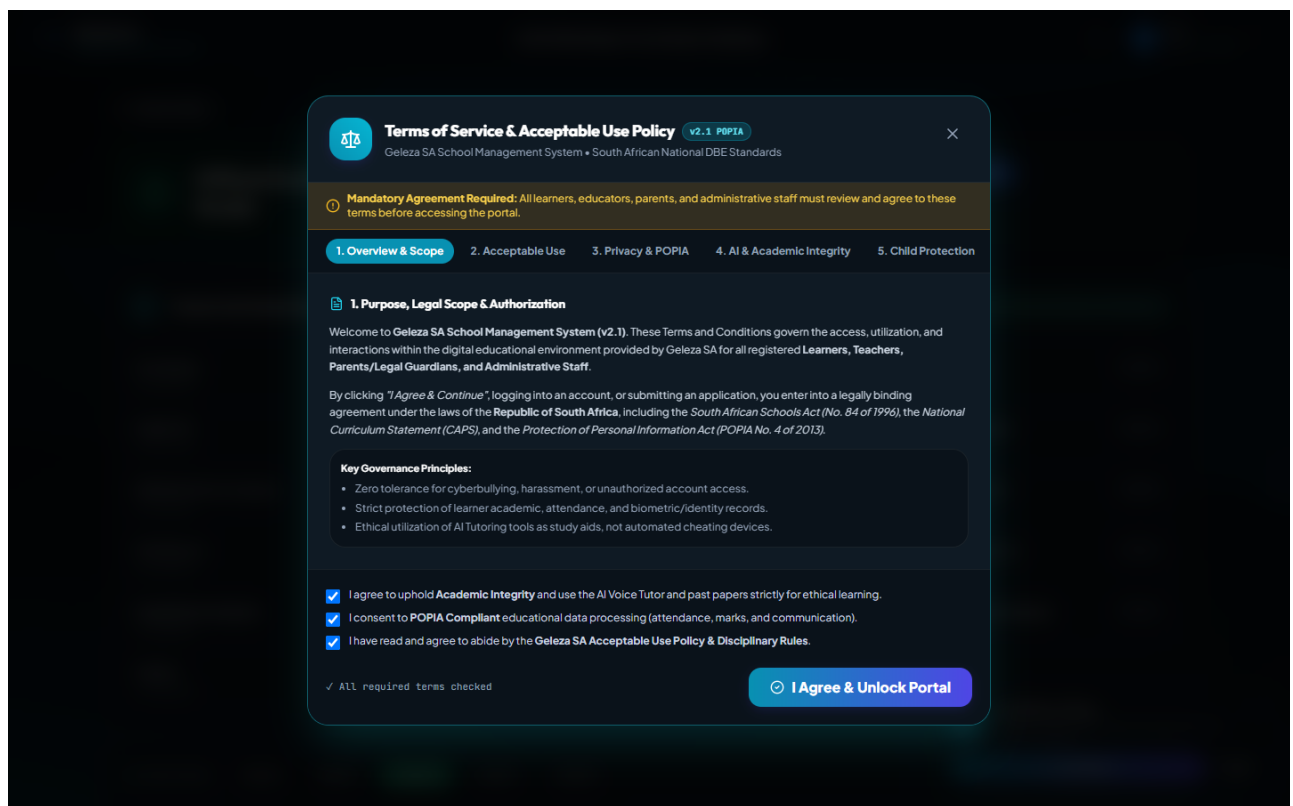

Figure 59. Principal / School Admin: CAPS Report Card Studio — live Geleza SA screen.

Dynamic Classes & Homerooms

Why this matters in South African schools

Class structures change every year and mid-year.

What Geleza SA provides

Dynamic Classes & Homerooms manage streams, class teachers, and learner placement. Timetable, attendance, and marksheets all depend on this structure.

How users open this module

More !' Dynamic Classes & Homerooms.

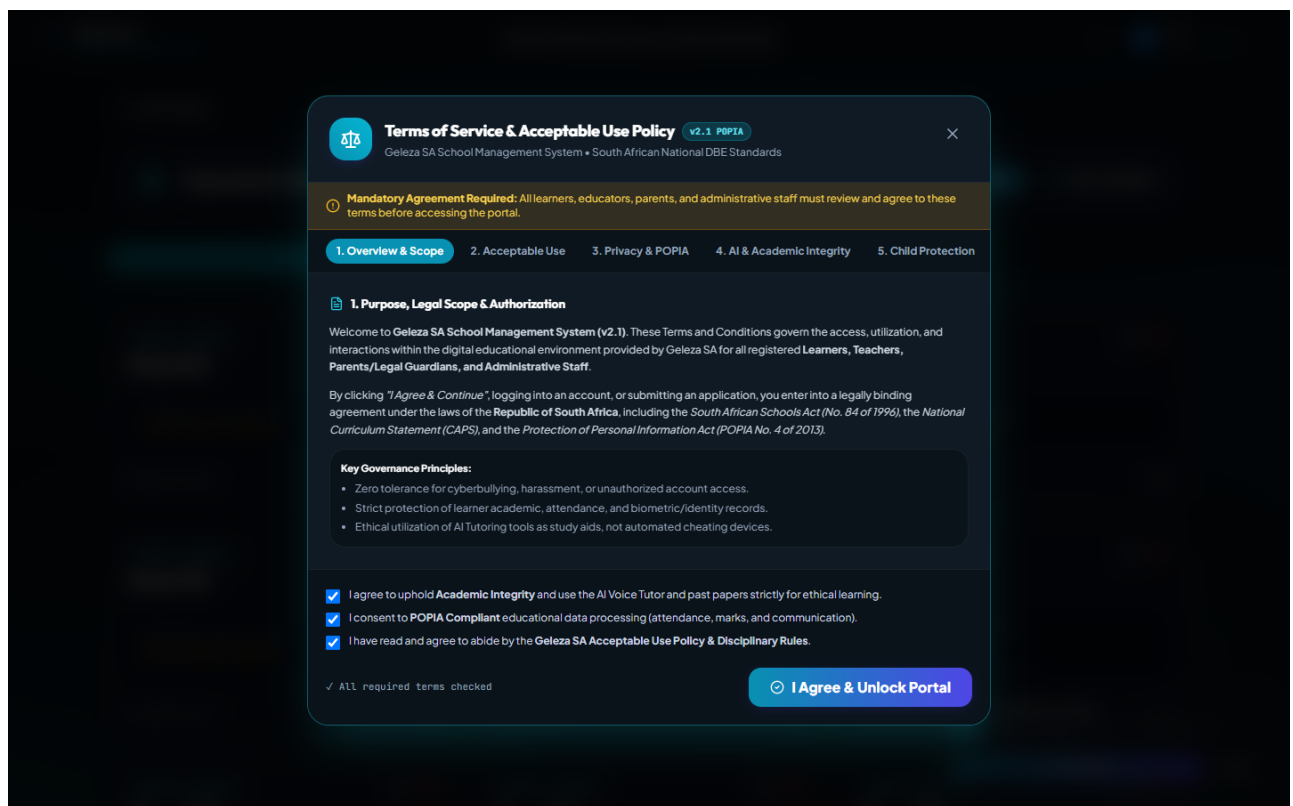

Figure 60. Principal / School Admin: Dynamic Classes & Homerooms — live Geleza SA screen.

Timetable Allocations

Why this matters in South African schools

A school runs on a published period grid.

What Geleza SA provides

Timetable Allocations let leadership build and publish the school-wide timetable that teachers, learners, and parents then consume in their portals.

How users open this module

More ! Timetable Allocations. Publish only when ready for campus-wide use.

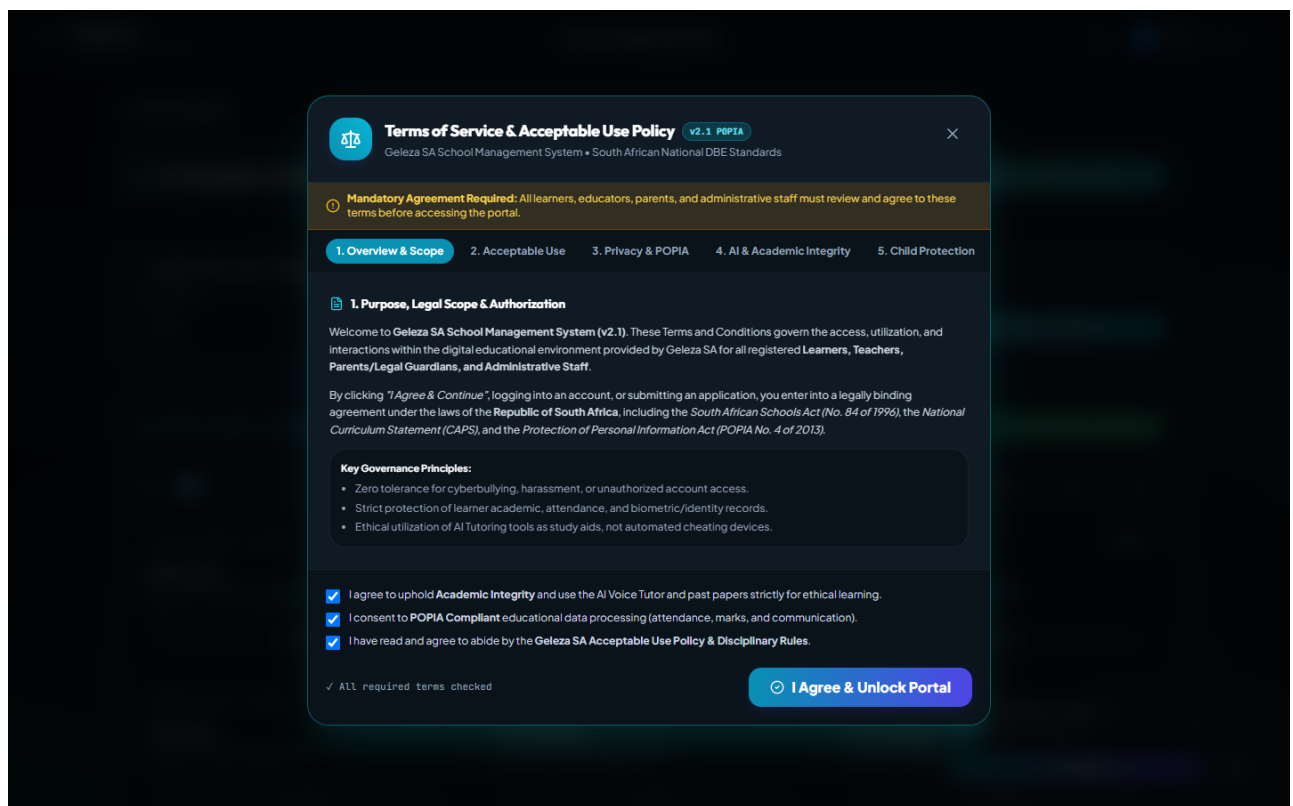

Figure 61. Principal / School Admin: Timetable Allocations — live Geleza SA screen.

School Fees & Invoicing

Why this matters in South African schools

Collections and statements need a school-owned system of record.

What Geleza SA provides

School Fees & Invoicing supports term invoices, reminders, and collections analytics where the school enables finance modules. Parent and learner fee views read from this operational truth.

How users open this module

More !' School Fees & Invoicing.

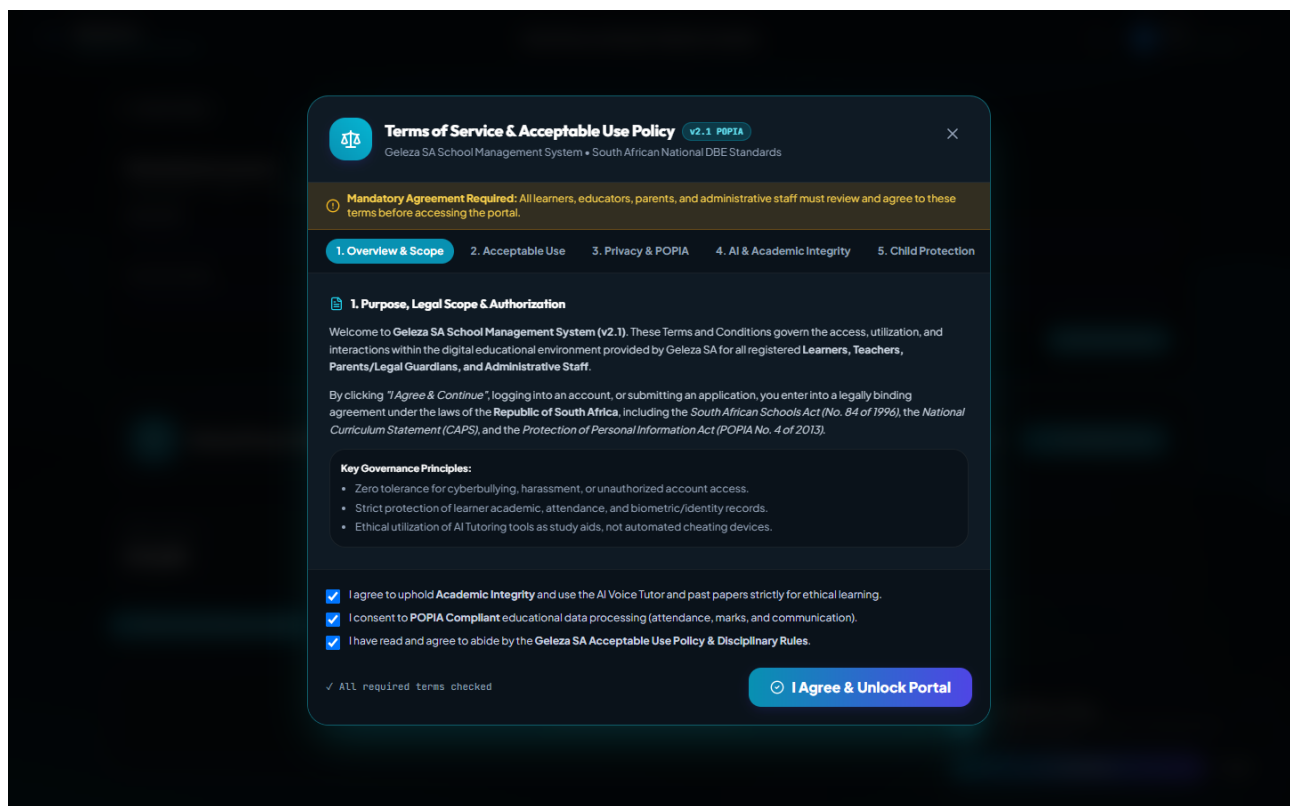

Figure 62. Principal / School Admin: School Fees & Invoicing — live Geleza SA screen.

Official Broadcasts

Why this matters in South African schools

Critical notices must reach cohorts reliably.

What Geleza SA provides

Official Broadcasts / announcements push school news to the right audiences. This reduces dependency on informal social channels for institutional messages.

How users open this module

More !' Official Broadcasts.

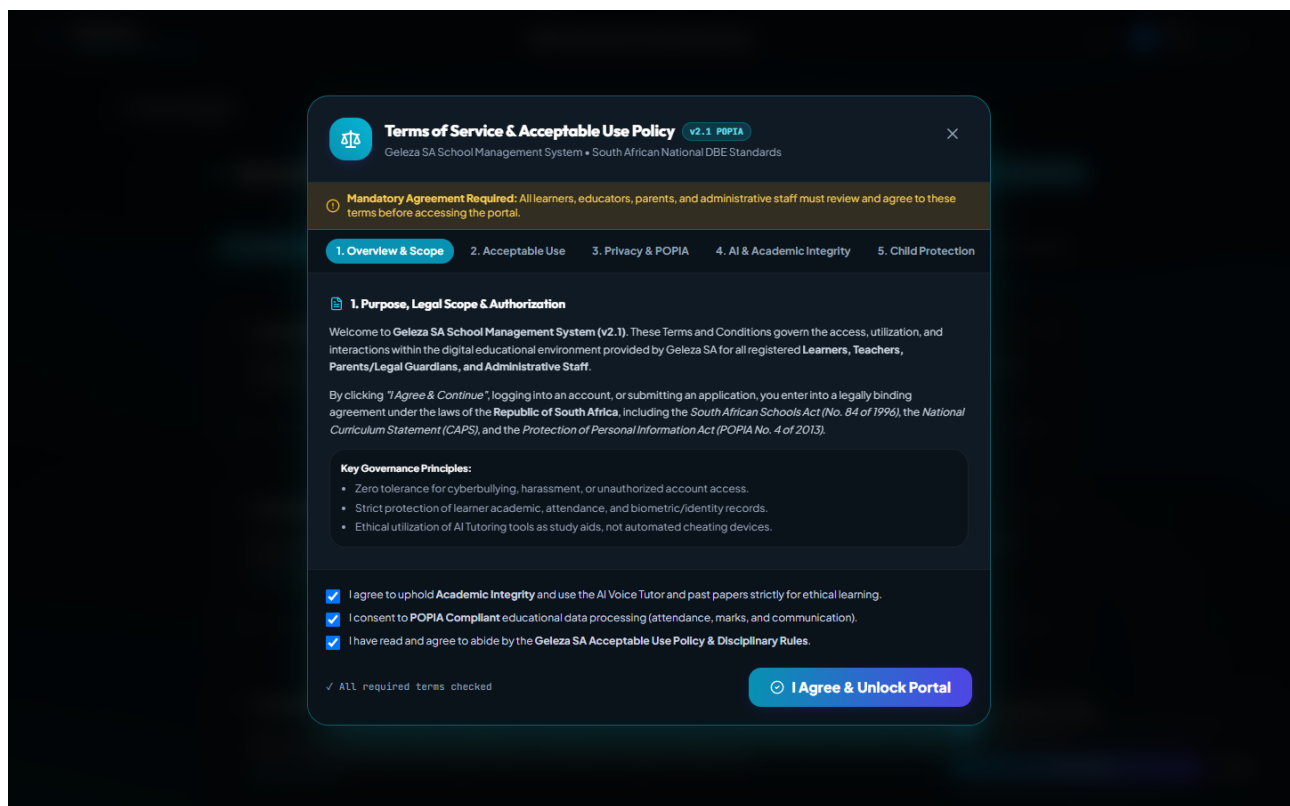

Figure 63. Principal / School Admin: Official Broadcasts — live Geleza SA screen.

Exam Seating Master

Why this matters in South African schools

Exam logistics are high-stakes and error-prone on paper alone.

What Geleza SA provides

Exam Seating Master builds hall grids and candidate slips that learners later view in their Exam Seating module.

How users open this module

More !' Exam Seating Master. Publish seating before exam week.

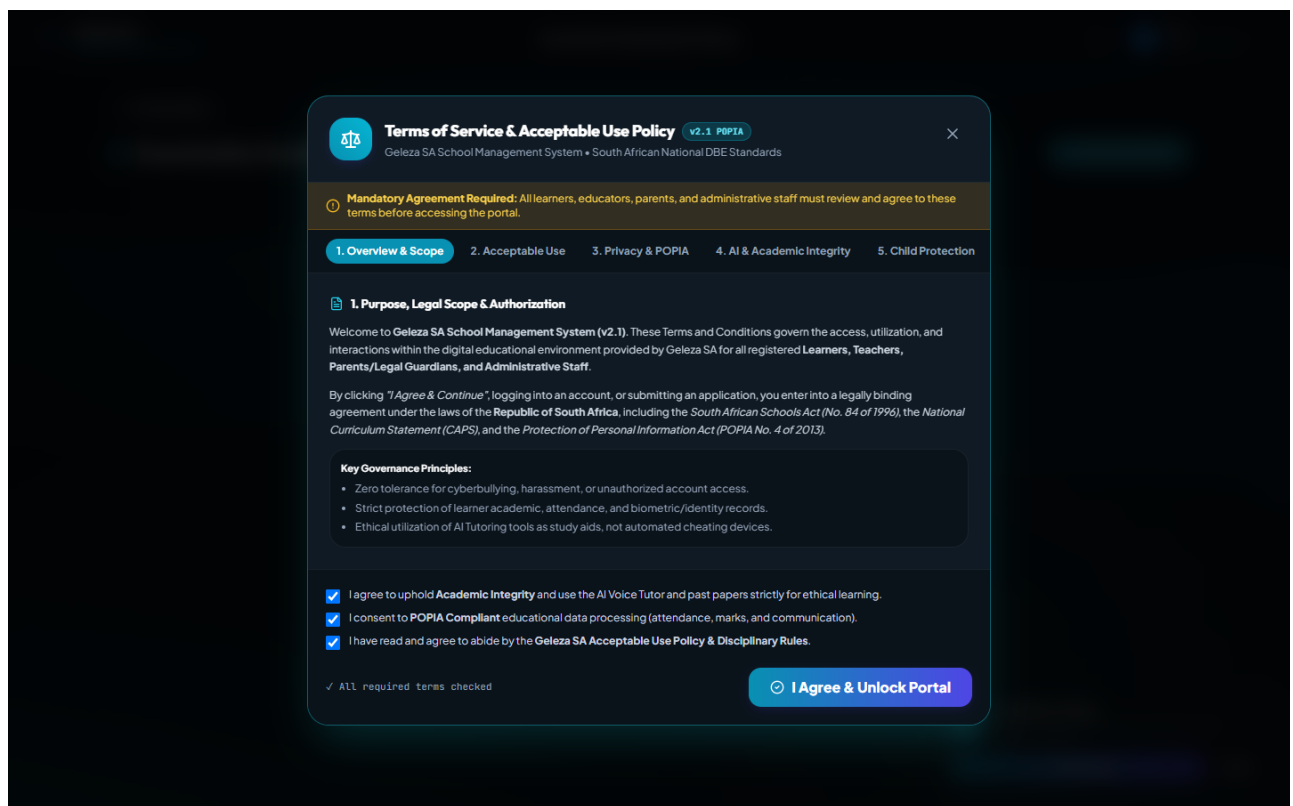

Figure 64. Principal / School Admin: Exam Seating Master — live Geleza SA screen.

Faculty & Coach Invites

Why this matters in South African schools

Staff onboarding should be controlled and auditable.

What Geleza SA provides

Faculty & Coach Invites manage teacher and coach invitation workflows so new educators join with the correct subjects and grades.

How users open this module

More !' Faculty & Coach Invites, or enrol actions in User Directory.

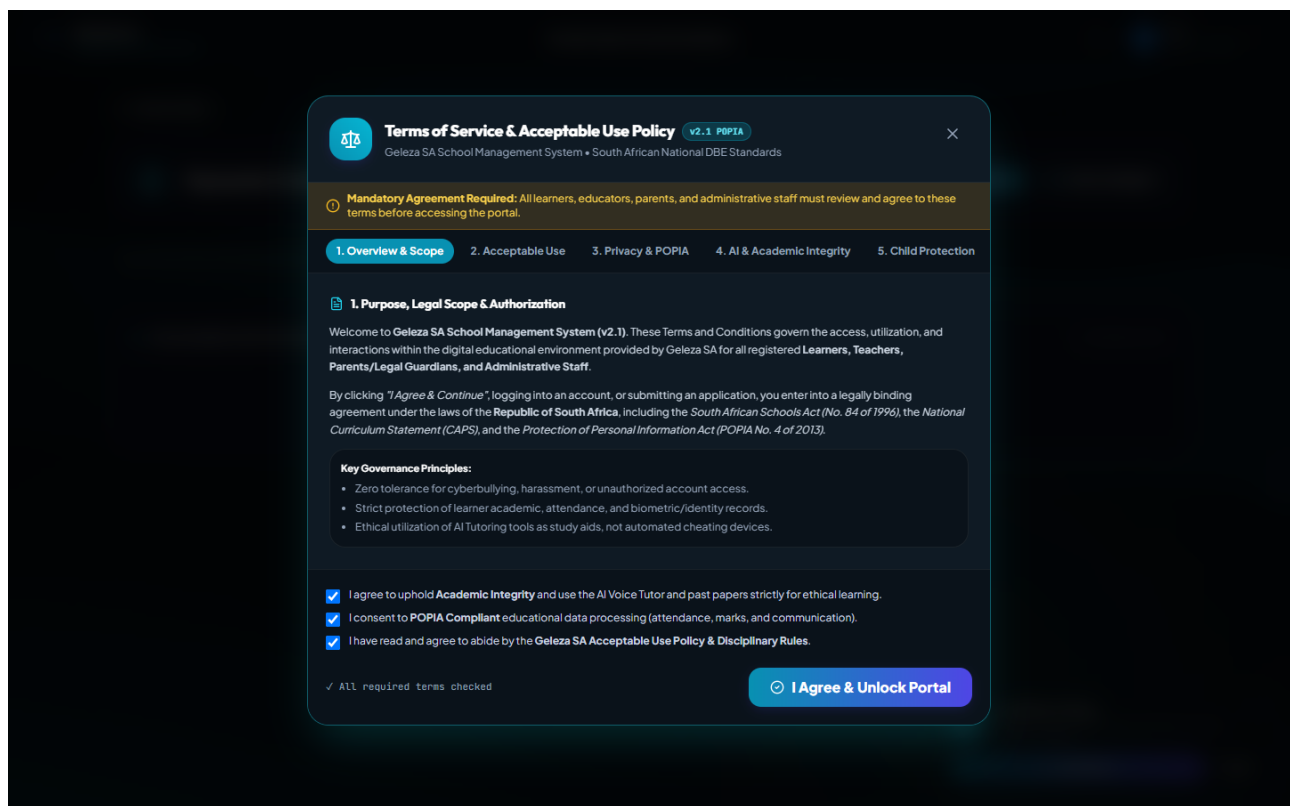

Figure 65. Principal / School Admin: Faculty & Coach Invites — live Geleza SA screen.

School Calendar

Why this matters in South African schools

Leadership owns the institutional calendar of record.

What Geleza SA provides

The admin School Calendar maintains master events that cascade into learner, parent, and teacher calendar views.

How users open this module

More !' School Calendar.

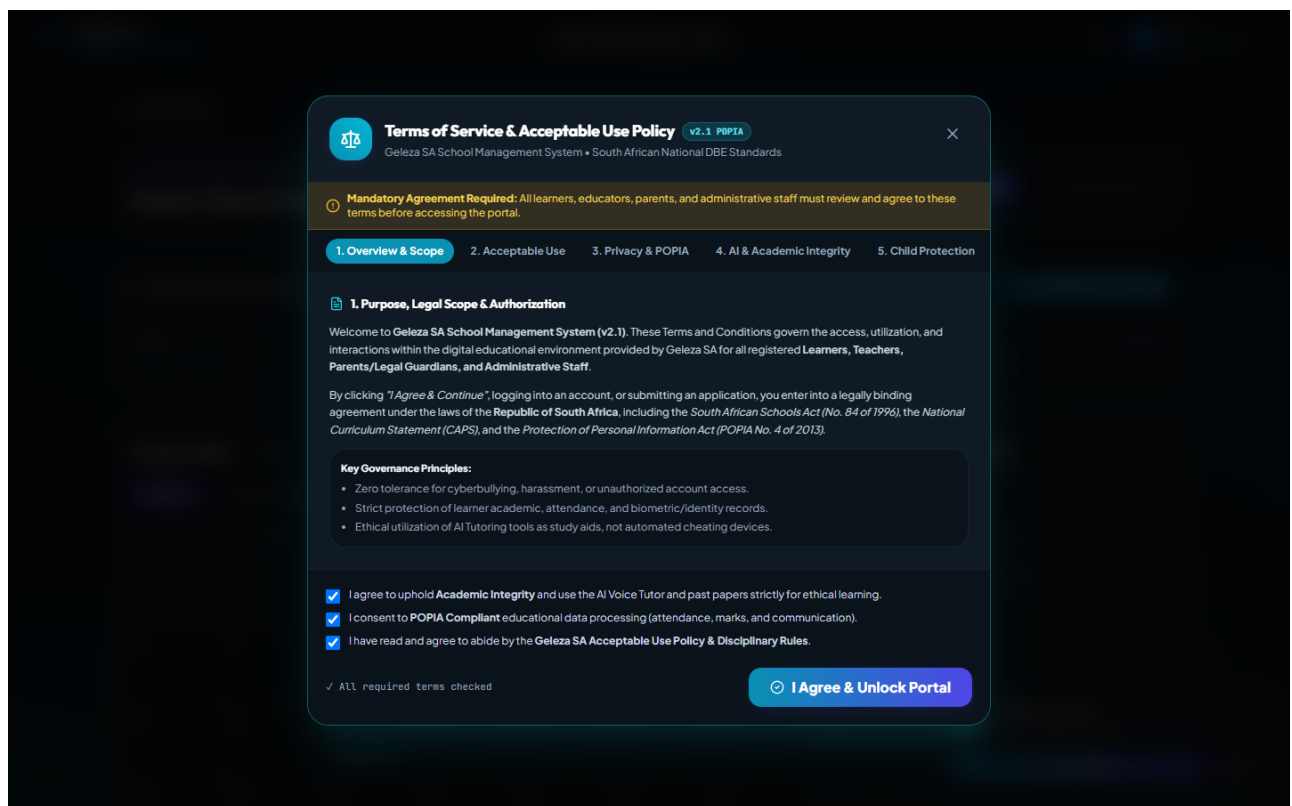

Figure 66. Principal / School Admin: School Calendar — live Geleza SA screen.

Technical Settings

Why this matters in South African schools

School portals need consistent theme, security, and help access for admins too.

What Geleza SA provides

Technical Settings cover preferences, security, and Help pathways for school administrators operating Geleza SA daily.

How users open this module

More !' Technical Settings.

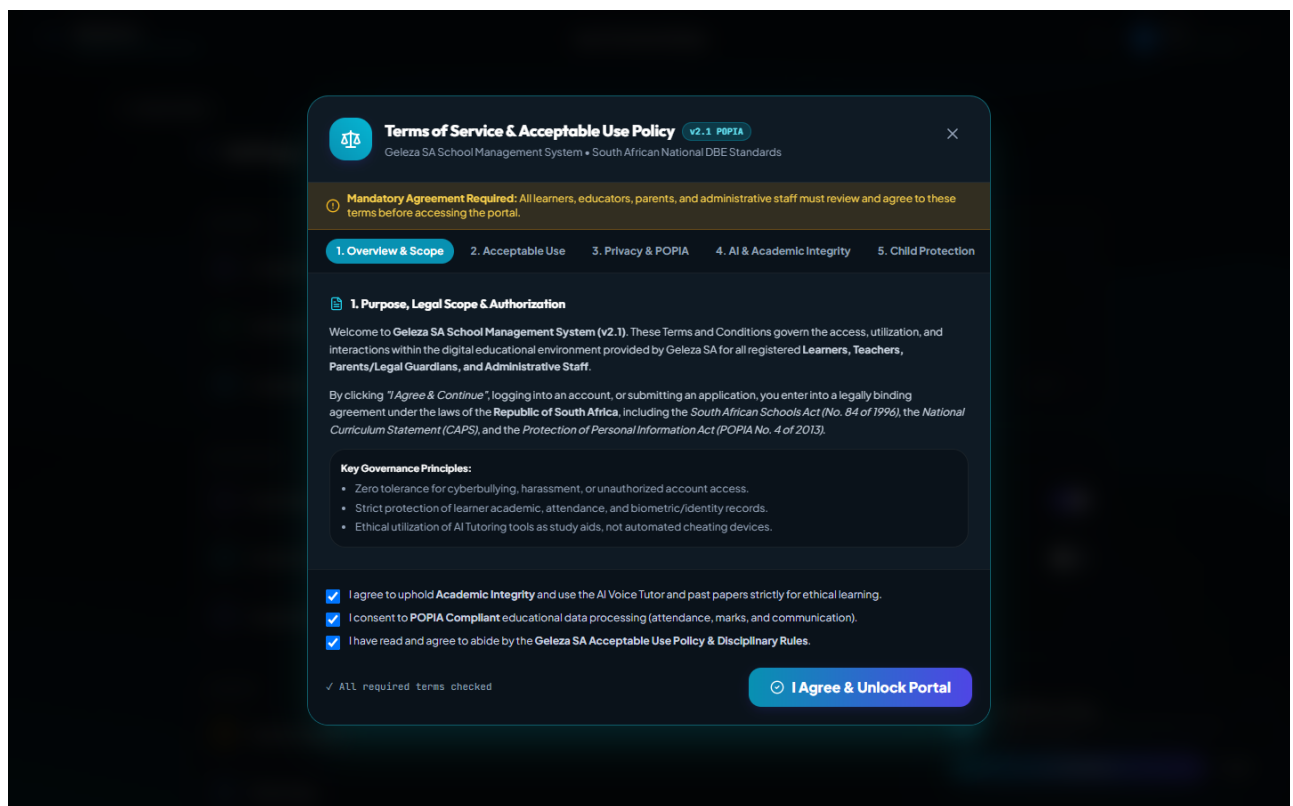

Figure 67. Principal / School Admin: Technical Settings — live Geleza SA screen.

11.5 Parent Applications & corrections (detail)

Under Users !' Parent Applications, admins see applicant contact details, claimed learners, database match hints, and status. Actions include Correct (edit email/phone/ID/names/learner fields), Accept & Link (activate parent account + link children + email welcome), or Reject with reason emailed to the parent. Approved applications can still have contact fields corrected and synced to the parent user record. This is how Geleza SA keeps the admissions and parent-portal journeys recoverable.

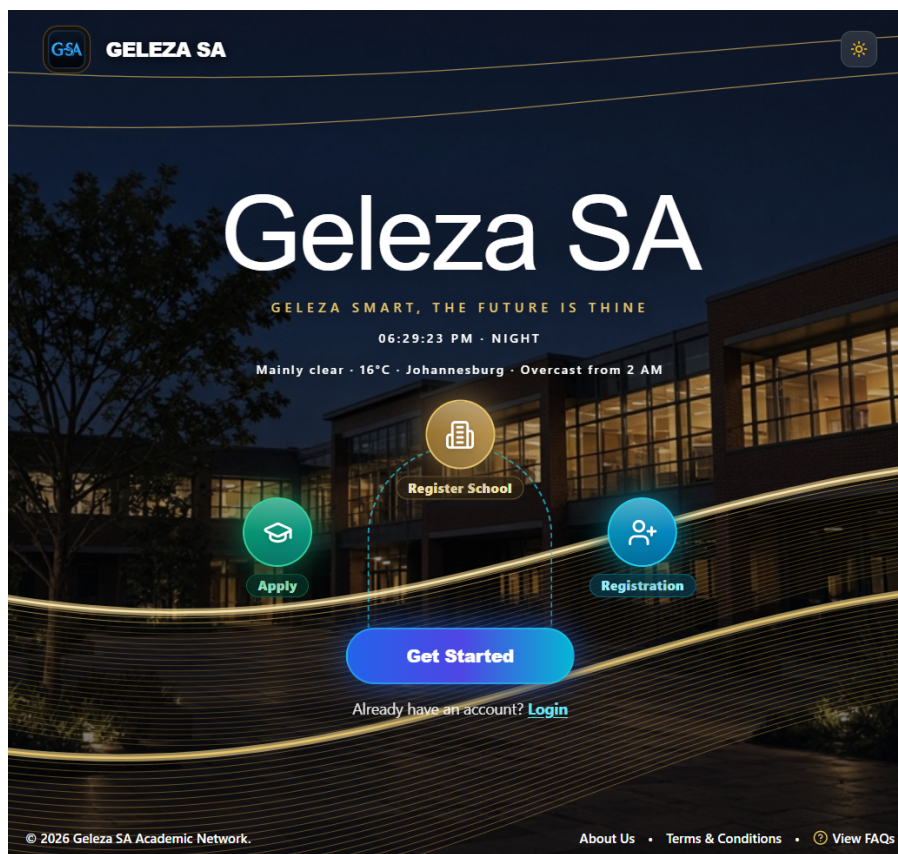

Figure 68. Principals begin public onboarding via Register School on the Get Started orbit.

The image shows a 'Geleza SA Support Documentation' form. At the top, there's a header with a headset icon, the title 'Geleza SA Support Documentation', and a reference code 'GSA-DOC-FAQ-001'. Below the header, there are three tabs: 'View FAQs', '24/7 AI Help & Support', and 'Contact Admin'. The main content area is titled 'Request help from school admin or Geleza SA' and includes a brief instruction: 'Use this form if you entered the wrong email, phone, ID, or learner details on an application, or if you need help with login or your account. Your school principal / admin can correct eligible records: Geleza SA can also assist.' The form contains several input fields: 'FULL NAME', 'CONTACT EMAIL (FOR REPLY)', 'PHONE' (with the example '0812345678'), and 'APPLICATION REF (OPTIONAL)' (with the example 'e.g. PAR-2026-48192'). There is a dropdown menu for 'WHAT WENT WRONG?' with the selected option 'Wrong email address on application / account'. A 'SUBJECT' field is labeled 'Short summary of the problem'. Finally, there is a 'DETAILS' section with a text area labeled 'Explain the mistake (e.g. I typed the wrong email on my parent application). Include the correct details we should use.'

Figure 69. End users reach principals through Contact Admin; admins action those tickets in Support Desk.

12. Geleza SA (platform) administration

Geleza SA superadmins (is_superadmin) operate above a single school. They approve school registrations, appoint school sub-admins across schools, use Multi-School Command Center analytics, and can assist any school's users via Support Desk and application corrections. Portal locks (system controls) can temporarily close parent applications or registrations during maintenance or policy freezes.

- Approve / decline school applications with executive notes.
- Configure school modules (teacher vs learner module packs).
- Oversee banking/fee configuration where applicable.
- Cross-school visibility for support and quality assurance.

13. Support Desk & application corrections

This capability closes the “wrong details” gap. Any guest or signed-in user can file a ticket. Categories include wrong email, phone, ID, learner details, parent details, application correction, login access, profile, fees, technical, and other.

13.1 End-user flow

1

Open Help

View FAQs !' Contact Admin (or AI Help for guidance).

2

Describe the mistake

Validated name (letters), phone (10 digits), email, optional PAR- reference, subject, details.

3

Receive ticket number

Acknowledgement email; school admins notified.

4

Admin corrects

Support Desk or Parent Applications !' Correct !' optional resolve message.

Search documentation (e.g. report card, link learner, session, fees)...

SECTION A — PLATFORM OVERVIEW

What is Geleza SA?

Geleza SA (Geleza South Africa) is a digital school management and learning platform for South African secondary schools. It supports CAPS-aligned administration, including attendance, assessments, report cards, communications, fees (where enabled), and authorised study tools for Grades 8–12.

Who may use Geleza SA?

How do I change between dark and light appearance?

Where can I read the official policies?

I entered the wrong email, phone, or details on my application. What should I do?

SECTION B — LEARNERS

How do I open a subject workspace?

Figure 70. FAQ entry explaining what to do after entering wrong application details.

APPLICATION REF (OPTIONAL)

WHAT WENT WRONG?

SUBJECT

DETAILS

Figure 71. Contact Admin ticket form with validation and category selection.

14. Security, sessions & compliance

- JWT / session cookie authentication with active_session_id takeover semantics.
- Role checks enforced against live PostgreSQL role data (admin, teacher, parent, learner).
- Password recovery via time-limited OTP email; password history protections on change.
- Optional WebAuthn fingerprint sign-in.
- POPIA-aware terms: schools submit only information they may lawfully process.
- Idle Stay/Log out prompt to reduce unattended device risk.
- Input validation on critical forms (letters-only names, digits-only phones/IDs).

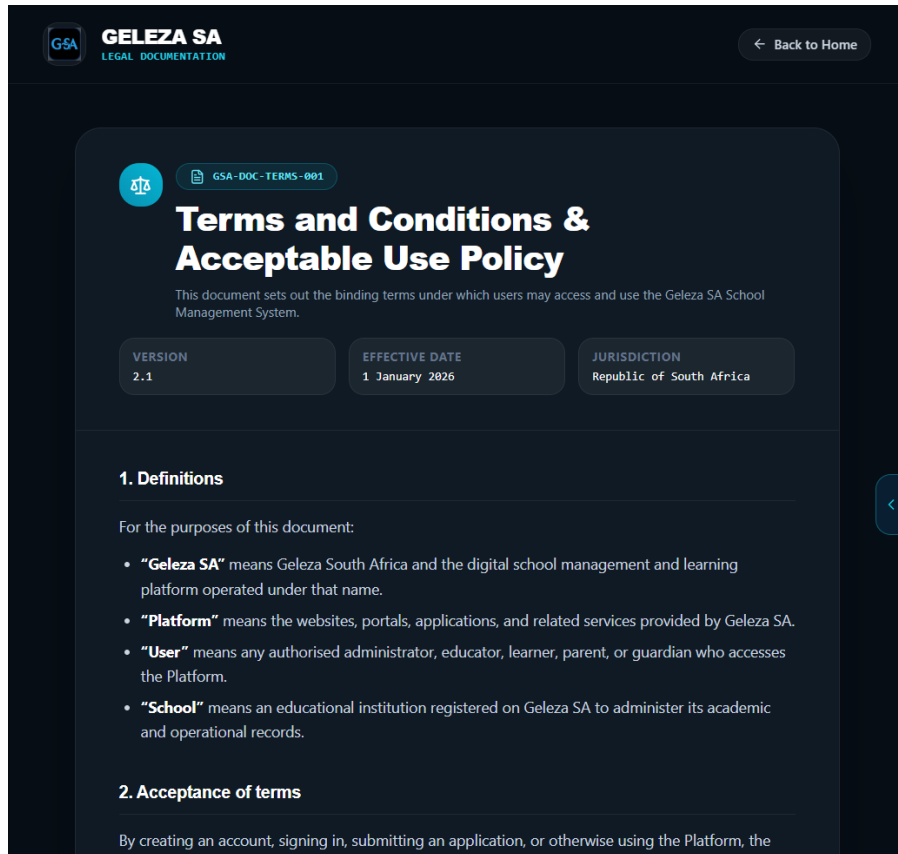

Figure 72. Legal terms covering accounts, POPIA, AI academic integrity, and parental oversight.

15. Technology overview

- Client: React + Vite TypeScript SPA (client/), built to client/dist.
- Server: Express (server.js) on Node, REST APIs under /api/*.
- Data: PostgreSQL with schema bootstrap for core tables including parent_portal_applications and support_tickets.
 - Mail: SMTP email service for OTP, admissions, parent application decisions, support acknowledgements.
 - Hosting: Firebase Hosting site fusion-high-app (https://fusion-high-app.web.app); API typically on a Node host (e.g. Render).
 - Realtime/push: web push and notification routes where configured.
 - AI: integrated services for tutoring, early warning, lesson studio, and in-app Geleza SA assistant.

16. Conclusion

Geleza SA is designed as a complete secondary-school operating system for South Africa's CAPS environment. It starts with a brand-strong public campus, routes each person into the correct role, and then

delivers a module-rich but navigable experience for learners, parents, teachers, and principals. Where humans make mistakes — especially on applications — the Support Desk and Contact Admin pathway keep the journey recoverable.

This documentation should be read together with GSA-DOC-ABOUT-001, GSA-DOC-TERMS-001, and GSA-DOC-FAQ-001. For institutional onboarding, contact Geleza SA Administration through the channels published on the platform.
